Henry of Ofterdingen Novalis,2018-09-03

Novalis Friedrich von Hardenberg did not live long on the earth but lived long enough to leave his mark on great writers and thinkers such as George MacDonald and C S Lewis Though unfinished at his death his novel Heinrich von Ofterdingen with its resplendent blue flower left an enduring mark in the imaginations of many writers of fantasy and romance The blue flower signifies the deep dissatisfaction that humanity has with its own lot its striving for the fulfillment which can only come through an encounter with the transcendent which seems always to be just out of reach Just out of reach yes but real nonetheless

On Being and Becoming Jennifer Anna Gosetti-Ferencei, 2020-10-09 While existentialism has long been associated with Parisian Left Bank philosophers sipping cocktails in smoke filled cafés or with a brooding angst filled outlook on life Gosetti Ferencei shows how vital and heterogeneous the movement really was In this concise accessible book Gosetti Ferencei offers a new vision of existentialism As she lucidly demonstrates existentialism is a rich and diverse philosophy that encourages meaningful engagement with the world around us offering a host of fascinating concepts that pertain to life as we experience it The movement was as heterogeneous as it is now misunderstood influenced by jazz music involving diverse thinkers from around the world challenging received ideas about the meaning of human existence Part of the difficulty in defining existentialism is that it was never a unified philosophy but came to identify a set of shared concerns about the meaning and possibility of human freedom as it may be expressed in authentic choices actions and projects Existentialists all explored how in the absence of traditional reassurances about the meaning of life we may transcend our present circumstances and give our situation new meaning With existentialism concrete lived experience of the single individual emerged from the shadow of abstract systems and long defended traditions and became subject matter in its own right for philosophical inquiry Far from solipsistic Gosetti Ferencei shows that existentialist attention to the human self can be intertwined with ways of conceiving the world our being with others the earth and the encompassing concept of being Fully appreciating what existentialism has to offer requires recognizing the rich diversity of its prospects which involve not only anxiety absurdity awareness of death and the loss of religious meaning but also hope the striving for happiness and a sense of the transcendent *On Being and Becoming* unpacks this philosophical movement's insights and reveals how its core ideas promote creative responses to the question of life's meaning

The Literature of Weimar Classicism Simon Richter, 2005 New essays providing an account of the shaping beliefs preoccupations motifs and values of Weimar Classicism In Germany Weimar Classicism roughly the period from Goethe's return to Germany from Italy in 1788 to the death of his friend and collaborator Schiller in 1805 is widely regarded as an apogee of literary art But outside of Germany Goethe is considered a Romantic and the notion of Weimar Classicism as a distinct period is viewed with skepticism This volume of new essays regards the question of literary period as a red herring Weimar Classicism is best understood as a project that involved the ambitious attempt not only to imagine but also to achieve a new quality of wholeness in human life and culture at a time when fragmentation division and alienation appeared to be the norm By not succumbing to the myth of Weimar and its literary giants but being willing to explore the phenomenon as a complex cultural system with a unique signature this book provides an account of its shaping beliefs preoccupations motifs and values Contributions from leading German British and North American scholars open up multiple interdisciplinary perspectives on the period Essays on the novel poetry drama and theater are joined by accounts of politics philosophy visual culture women writers and science The reader is introduced to the full panoply of cultural life in Weimar its accomplishments as well as its excesses and follies Emancipatory and doctrinaire by turns the project of Weimar

Classicism is best approached as a complex whole Contributors Dieter Borchmeyer Charles Grair Gail Hart Thomas Saine Jane Brown Cyrus Hamlin Roger Stephenson Elisabeth Krimmer Helmut Pfothner Benjamin Bennett Astrida Orle Tantil W Daniel Wilson Simon J Richter is Associate Professor of German at the University of Pennsylvania *"The Space of Words"* Jennifer Miller Hoyer, 2014 Nelly Sachs 1891-1970 has long been regarded as one of the most significant Holocaust poets Her conception of language and words as a landscape has been understood by scholars and critics as an exilic ersatz Heimat for the lost German homeland of a displaced poet This reading however is based entirely on her postwar poems Such an isolated approach to her complex body of work is increasingly historically problematic it is also at odds with Sachs's generally cyclical poetic process In *The Space of Words* Jennifer Hoyer offers the first sustained critical analysis of Sachs's largely unanalyzed prewar poetry and prose as well as the first analysis that examines structural and thematic ties between the prewar works and the Nobel Prize winning postwar poetry Through close readings of both Sachs's prewar and postwar works Hoyer reveals a diasporic rather than exilic conception of the landscape of language a position of constant wandering rather than static longing for return This diasporic poetics promotes the intellectual and linguistic power of the wanderer and opens new insights into Sachs's essential significance as a Holocaust poet and a twentieth century German Jewish writer wary of the link of literary language to geopolitics and the narrative of nations Jennifer M Hoyer is Assistant Professor of German at the University of Arkansas *Forces of Nature* Adrian Renner, Frederike Middelhoff, 2022-09-06 By the end of the 18th century notions of forces of nature Naturkräfte were increasingly discussed across disciplinary bounds attraction and repulsion vital forces and electric fluids formative drives and biological organisms were examined as forces linked to natural processes German Romantic literature science and philosophy from Schelling and Novalis to Genderröde and Hölderlin pondered interrelated notions of forces considered as dynamic and continually active in nature forces which in turn also appeared to shape human actions social structures and cultural developments This volume explores the points of reference for approaches to and afterlives of Romantic conceptions and representations of natural forces at the intersection of natural sciences and cultural imaginaries *The Vegetative Soul* Elaine P. Miller, 2012-02-01 The *Vegetative Soul* demonstrates that one significant resource for the postmodern critique of subjectivity can be found in German Idealism and Romanticism specifically in the philosophy of nature Miller demonstrates that the perception of German Idealism and Romanticism as the culmination of the philosophy of the subject overlooks the nineteenth century critique of subjectivity with reference to the natural world This book's contribution is its articulation of a plant-like subjectivity The vision of the human being as plant combats the now familiar conception of the modern subject as atomistic autonomous and characterized primarily by its separability and freedom from nature Reading Kant Goethe Hölderlin Hegel and Nietzsche Miller juxtaposes two strands of nineteenth century German thought comparing the more familiar animal understanding of individuation and subjectivity to an alternative plantlike one that emphasizes interdependence vulnerability and metamorphosis While providing the

necessary historical context the book also addresses a question that has been very important for recent feminist theory especially French feminism namely the question of the possible configuration of a feminine subject The idea of the vegetative subject takes the traditional alignment of the feminine with nature and the earth and subverts and transforms it into a positive possibility Although the roots of this alternative conception of subjectivity can be found in Kant's third Critique and its legacy in nineteenth century Naturphilosophie the work of Luce Irigaray brings it to fruition *British Museum Catalogue of printed Books*, 1888 A Primer of the Novel David Madden, Charles Bane, Sean M. Metamimesis Mattias Pirholt, 2012 Reconsiders the role played by mimesis and by Goethe's Wilhelm Meister as a mimetic work in the novels of Early German Romanticism God & the Gothic Alison Milbank, 2018-11-10 God and the Gothic Romance and Reality in the English Literary Tradition provides a complete reimagining of the Gothic literary canon to examine its engagement with theological ideas tracing its origins to the apocalyptic critique of the Reformation female martyrs and to the Dissolution of the monasteries now seen as usurping authorities A double gesture of repudiation and regret is evident in the consequent search for political aesthetic and religious mediation which characterizes the aftermath of the Glorious Revolution and Whig Providential discourse Part one interprets eighteenth century Gothic novels in terms of this Whig debate about the true heir culminating in Ann Radcliffe's melancholic theology which uses distance and loss to enable a

new mediation Part two traces the origins of the doppelgänger in Calvinist anthropology and establishes that its employment by a range of Scottish writers offers a productive mode of subjectivity necessary in a culture equally concerned with historical continuity In part three Irish Gothic is shown to be seeking ways to mediate between Catholic and Protestant identities through models of sacrifice and ecumenism while in part four nineteenth century Gothic is read as increasingly theological responding to materialism by a project of re enchantment Ghost story writers assert the metaphysical priority of the supernatural to establish the material world Arthur Machen and other Order of the Golden Dawn members explore the double and other Gothic tropes as modes of mystical ascent while raising the physical to the spiritual through magical control and the M R James circle restore the sacramental and psychical efficacy of objects

A Companion to the Works of Stefan George Jens Rieckmann, 2005 Stefan George 1868 1933 is along with Hugo von Hofmannsthal and Rainer Maria Rilke one of the pre eminent German poets of the twentieth century He also had an important albeit controversial and provocative role in German cultural history It is generally agreed that he played a significant part in the transition of German literature to Modernism particularly in poetry At the same time he was an outspoken critic of modernity He believed that only an all encompassing cultural renewal could save modern man Although George is often linked with the *Die Kunst der Zukunft* movement and although his artistic consciousness was formed by European aestheticism his poetry and the writings that emerged from the poets and intellectuals he gathered around him in the George Circle are above all a scathing commentary on the political social and cultural situation in Germany at the turn of the century George who was imbued with the idea of the poet as a prophet and priest saw himself as the Messiah of a New Hellenism and a New Reich led by an intellectual and aesthetic elite consisting of men who were bonded together through their allegiance to a charismatic leader Some of the values that George proclaimed among them a glorification of power of heroism and self sacrifice were seized upon by the National Socialists and subsequently his writings and those of his circle were considered by some to be proto fascist It did not help his reputation that after the Second World War much of the criticism of his works was practiced by uncritical hagiographic George worshippers In recent years however there has been a renewed and unbiased interest among scholars and critics in George and his circle The wide ranging and original essays in this volume explore anew George's poetry and his contribution to Modernism the relation between his vision of a New Reich and fascist ideology and his importance as a cultural critic Jens Rieckmann is Professor of German at the University of California Irvine

Mahoney, 1994 Critical history of classic 19th century German Romantic novel Since its posthumous publication in 1892 German French British and American critics have regarded the novel Heinrich von Ofterdingen by Friedrich von Hardenberg Novalis as the epitome of German Romanticism A critical history of Heinrich von Ofterdingen thus provides an exemplary opportunity to analyze changing patterns of German and international literary criticism over the past two hundred years particularly with respect to the changing definitions of Romanticism Critical response to the Klingsohr tale in the novel is a constant point of reference in this study providing a record of successive approaches to the work
