*Understanding Directory Services*clarifies the complex topic of directory services starting with basic theory and archetypes and then working its way up to the current directory service implementations It describes the basic idea behind directory services explaining the underlying conceptual models design characteristics and methods of managing distributed information The book begins with an overview of directory services and their core characteristics highlighting critical aspects of directory information distribution and storage The evolving nature of the information the directory contains and the factors involved in organizing and managing it are discussed in detail and then methods of information distribution and storage are examined at length After exploring the basics of directory service the book progresses to in depth chapters on each of the critical technologies being used to implement directory services The X 500standards are explained to help you understand the foundations of directory services and provide a basis for comparison of the other directory technologies Lightweight Directory Access Protocol LDAP and its emerging role as a directory access standard is described in detail with thorough explanations of models naming and operations The Domain Name System DNS is examined from a directory service perspective noting parallels in structures and operations This knowledge of directory services is then used to describe the design of X 500 and LDAP based directory service products as well as NDS eDirectory and Active Directory highlighting the architectural and operational implications of vendor s design decisions This book Explores X 500 based directory products eTrust DirX Nexor and highlights implementation approaches and capabilities Describes the LDAP based directory products OpenLDAP SecureWay iPlanet identifying similarities and differences between them ExplainsNDS eDirectorydescribing the underlying directory architecture and its foundations in X 500 and its evolution from an NOS based directory to a general purpose directory service Examines howActive Directoryintegrates NT 4 LDAP and DNS technologies into a directory service that leverages established Windows networks Explores the information management issues that meta directories Siemens DirXmetahub iPlanet meta directory Microsoft Meta directory Services Novell DirXML are designed to address and characteristics of different types of meta directory solutions as well as Radiant Logic sRadiant Onevirtual directory server Identifies the design of XML based directory markup languages that map directory schema objects and operations providing directory interoperability The final chapter is focused on helping you evaluate directory services in the context of your business and network environment Information business and network control factors are identified and key factors in directory service assessment are explained *Understanding Directory Services*is an excellent reference for directory service

technologies that includes extensive references and a glossary containing 385 directory service terms. By explaining key directory technologies and the integration of those technologies, this book provides the information you need to understand the design and operations involved in all directory services. From the Back Cover: Understanding Directory Services is the most in-depth resource available on directory services theory, architecture, and design. It provides the conceptual framework and critical technical information for IT professionals who are using directory services in their networks or e-business solutions. The 1st edition of this book covered the underlying directory service technologies: X.500, LDAP, DNS, and integrated the information from a networking perspective with a special focus on eDirectory and Active Directory. The 2nd Edition extends this coverage to the LDAP-based directories such as iPlanet and SecureWay and the X.500-based enterprise directory services including eTrust, DirX, and Nexor, as well as the emerging meta-directory technologies and products which are crucial to the integration of the multiple directories in an enterprise networking environment. By explaining the origins and technologies of directory services and clarifying the integration of key directory technologies into network and e-commerce platforms, Understanding Directory Services gives you the information you need to understand the underlying design and operations involved in all directory services.

Reviews of the first edition: Warren E. Wyrstek, MCP Magazine: superb comprehensive, highly recommend it to all network professionals, a must read for anyone wrestling with deploying a directory service. Douglas Ludens, About.com: clearly organized and well-written, a great book I highly recommend, essential to doing well with Windows 2000.

NetWare Administration Mark Foust, 2001-10-25: NetWare Administration contains information from a consultant's or administrator's viewpoint. There are no other NetWare books like it. The author went right to the meat: the NetWare client starts Chapter 1. This book provides tips, tricks, high-level explanations, and Foust's hardcore experience in the field for Novell. He includes information that his clients had to pay 10,000 a week to receive, including practical coverage of NDS upgrading to 6.0 and thousands of detailed instructions to accomplish virtually any enterprise-wide task. This book has more specific information than any you have ever seen on NetWare. It covers NetWare 4.x through 5.x up to NetWare 6, due out end of this year. Covers new features in v. 6.0. Great for troubleshooting client problems. Learn how to re-design your NDS tree.

Novell's Guide to Troubleshooting NDS Peter Kuo, Jim Henderson, 1999-09-30: An advanced network administrator's guide to managing the performance of Novell Directory Services, which has over 40 million users. The focus is on resolving and/or preventing problems that may occur with NDS, including discussions on diagnostic tools and techniques, recovery tools, programming for NDS disaster recovery, and error codes.
