Groves, 2009-08-11 A first person account of the Manhattan Project by the general who hired and worked alongside Robert Oppenheimer General Leslie Groves and J Robert Oppenheimer were the two men chiefly responsible for the building of the first atomic bomb at Los Alamos code name the Manhattan Project As the ranking military officer in charge of marshaling men and material for what was to be the most ambitious expensive engineering feat in history it was General Groves who hired Oppenheimer with knowledge of his left wing past planned facilities that would extract the necessary enriched uranium and saw to it that nothing interfered with the accelerated research and swift assembly of the weapon This is his story of the political logistical and personal problems of this enormous undertaking which involved foreign governments sensitive issues of press censorship the construction of huge plants at Hanford and Oak Ridge and a race to build the bomb before the Nazis got wind of it The role of Groves in the Manhattan Project has always been controversial In his new introduction the noted physicist Edward Teller who was there at Los Alamos candidly assesses the general s contributions and Oppenheimer s while reflecting on the awesome legacy of their work The basic story is a thriller as strange as any chapter in American history and its drama is heightened by the general s candor and restraint *The New Yorker* **NOW IT CAN BE TOLD** A N Bali, 1949 The hundreds and thousands of unfortunate Punjabees Sarhadees and Sindhies who putting faith in the statements that everything will stand still tarried too long behind and perished in the conflagration unwept unsung unhonoured but certainly

not unremembered *NOW IT CAN BE TOLD - A War Observer's Illumination Bomb* Philip Gibbs, 2017-02-23 In this book I have written about some aspects of the war which I believe the world must know and remember not only as a memorial of men's courage in tragic years but as a warning of what will happen again surely if a heritage of evil and of folly is not cut out of the hearts of peoples Here it is the reality of modern warfare not only as it appears to British soldiers of whom I can tell but to soldiers on all the fronts where conditions were the same What I have written here does not cancel nor alter nor deny anything in my daily narratives of events on the western front as they are now published in book form They stand I may claim sincerely and humbly as a truthful accurate and tragic record of the battles in France and Belgium during the years of war broadly pictured out as far as I could see and know My duty then was that of a chronicler not arguing why things should have happened so nor giving reasons why they should not happen so but describing faithfully many of the things I saw and narrating the facts as I found them as far as the censorship would allow After early hostile days it allowed nearly all but criticism protest and of the figures of loss The purpose of this book is to get deeper into the truth of this war and of all war not by a more detailed narrative of events but rather as the truth was revealed to the minds of men in many aspects out of their experience and by a plain statement of realities however painful to add something to the world's knowledge out of which men of good will may try to shape some new system of relationship between one people and another some new code of international morality preventing or at least postponing another massacre of youth like that five years sacrifice of boys of which I was a witness Sir Philip Gibbs 1920

The Prometheus Bomb Neil J. Sullivan, 2016-12 During World War II the lives of millions of Americans lay precariously in the hands of a few brilliant scientists who raced to develop the first weapon of mass destruction Elected officials gave the scientists free rein in the Manhattan Project without understanding the complexities and dangers involved in splitting the atom The Manhattan Project was the first example of a new type of choice for congressmen presidents and other government officials life and death on a national scale From that moment our government began fashioning public policy for issues of scientific development discoveries and inventions that could secure or threaten our existence and our future But those same men and women had no training in such fields did not understand the ramifications of the research and relied on incomplete information to form potentially life changing decisions Through the story of the Manhattan Project Neil J Sullivan asks by what criteria the people in charge at the time made such critical decisions He also ponders how similar judgments are reached today with similar incomprehension from those at the top as our society dives down the potential rabbit hole of bioengineering nanotechnology and scientific developments yet to come
