Now You Can Read About Sharks And Whales:

Now You Can Read about ... Sharks and Whales Mary Hoffman, 1986 **Growing Readers** Kathy Collins, 2023-10-10

Primary grade teachers face an important challenge teaching children how to read while enabling them to build good habits so they fall in love with reading. Many teachers find the independent reading workshop to be the component of reading instruction that meets this challenge because it makes it possible to teach the reading skills and strategies children need and guides them toward independence, intention, and joy as readers. In *Growing Readers*, Kathy Collins helps teachers plan for independent reading workshops in their own classrooms. She describes the structure of the independent reading workshop and other components of a balanced literacy program that work together to ensure young students grow into strong, well-rounded readers. Kathy outlines a sequence of possible units of study for a yearlong curriculum. Chapters are devoted to the individual units of study and include a sample curriculum as well as examples of mini lessons and reading conferences. There are also four Getting Ready sections that suggest some behind-the-scenes work teachers can do to prepare for the units. Topics explored in these units include print and comprehension strategies, reading in genres such as poetry and nonfiction, connecting in school reading and out of school reading, developing the strategies and habits of lifelong readers. A series of planning sheets and management tips are presented throughout to help ensure smooth implementation. We want our students to learn to read and we want them to love to read. To do this, we need to lay a foundation on which children build rich and purposeful reading lives that extend beyond the school day. The ideas found in *Growing Readers* create the kind of primary classrooms where that happens.

Effective intentional teaching begins with a strong set of beliefs, but even the best teachers, including author Debbie Miller, struggle to make sure that their classroom practice consistently reflects their core convictions. In *Teaching with Intention*, Defining Beliefs, Aligning Practice, Taking Action, K-5, Miller defines her actions to ensure that children are the true beneficiaries of her teaching. As Peter Johnston writes, "Through this book, we have Debbie's teaching mind on loan. She engages us in the details of a teaching life from inside her mind, showing the thinking behind her teaching and the consequences of her actions." *Teaching with Intention* brings us into classrooms of teachers and children Miller has met over the last five years in her work as a literacy consultant. From setting up the classroom environment to the intentional use of language from comprehension instruction to lesson design, Miller is explicit about what she does and why. At the same time, she encourages teachers to develop their own belief statements concerning teaching and learning and includes key questions to guide them in this important process. In an environment where the handing down of scripted programs and foolproof curricula is increasingly the norm, *Teaching with Intention* offers a compelling reminder that truly transformative

teaching is built from the ground up and is rebuilt every year by every teacher in every classroom with every new group of students
