 Elizabeth D. Zwicky, Simon Cooper, D. Brent Chapman, 2000-06-26 In the five years since the first edition of this classic book
 was published Internet use has exploded The commercial world has rushed headlong into doing business on the Web often
 without integrating sound security technologies and policies into their products and methods The security risks and the need
 to protect both business and personal data have never been greater We've updated Building Internet Firewalls to address
 these newer risks What kinds of security threats does the Internet pose Some like password attacks and the exploiting of

 attacks that crippled Yahoo E Bay and other major e commerce sites in early 2000 are in current headlines Firewalls critical
 components of today's computer networks effectively protect a system from most Internet security threats They keep damage
 on one part of the network such as eavesdropping a worm program or file damage from spreading to the rest of the network
 Without firewalls network security problems can rage out of control dragging more and more systems down Like the
