Nuclear Deterrence:

Nuclear deterrence--does it deter? Honoré Marc Catudal,1985 **Nuclear Deterrence and Defense** James M. Smith,2001 **Nuclear Deterrence in the 21st Century** Thérèse Delpech,2012-03-28 Deterrence remains a primary doctrine for dealing with the threat of nuclear weapons in the 21st century The author reviews the history of nuclear deterrence and calls for a renewed intellectual effort to address the relevance of concepts such as first strike escalation extended deterrence and other Cold War era strategies in today s complex world of additional superpowers smaller nuclear powers and nonstate actors *Real-World Nuclear Deterrence* David G. Coleman,Joseph M. Siracusa,2006-06-30 The threat of nuclear weapons did not fade away with the collapse of the Soviet Union Rather the geopolitical disorders of the post Cold War era and the rise of global terrorism have ensured that they remain conspicuously present on the world stage as a serious international concern With the eight or nine nuclear powers maintaining about 27 000 nuclear weapons in their arsenals to this day it is clear that they are here to stay for the foreseeable future The primary mission of these nuclear forces has been and remains deterrence Using plain language rather than policy jargon this historically focused book shows how nuclear deterrence has worked rather than how it should It then shows how the growing threat of nuclear proliferation threatens to create a far more complicated international situation largely because of the attendant proliferation of state nuclear deterrents By drawing on a wide array of new sources from international archives and the latest in international scholarship Coleman and Siracusa put some of the most important and enduring problems of nuclear deterrence over the past sixty years into global context Nuclear deterrence in the real world often operates very differently from how it should according to the prevailing theories and Coleman and Siracusa take a fresh look at how nuclear weapons policy has been made finding that it often has had surprisingly little to do with what works and what does not By studying in depth how governments here and abroad have confronted and dealt with some of the most important issues in nuclear weapons policy for example How many nuclear weapons are enough and What is it that will deter they find that the making of nuclear weapons policy is a complex fluid bargaining process subject to the tides of politics budgets threat perception ideology technology parochial service rivalries flawed information and sometimes just plain wishful thinking Nuclear Deterrence In U.s.-soviet Relations Keith B. Payne,2019-03-04 This book critically examines U S attempts to establish a nuclear deterrent against the Soviet Union and offers new approaches to dealing with the changing strategic environment Dr Payne maintains that the most influential theories of nuclear deterrence Assured Vulnerability and Flexible Targeting are unrealistic given Soviet foreign policy and attitudes toward nuclear war and no longer adequately meet the requirements of U S national security Identifying an approach compatible with U S security commitments he argues that future U S policy should focus on defeating the Soviet theory of victory on threatening Soviet military forces and domestic and external political control assets while also defending the U S against nuclear attack The discussion covers recent developments among them the new nuclear strategy of the

Carter administration and President Reagan's new weapons program *The United Kingdom and Nuclear Deterrence*
Jeremy Stocker, 2013-05-13 In December 2003 the British government announced that within a few years it would need to take decisions about the future of Britain's strategic nuclear deterrent. Exactly three years later its plans were revealed in a White Paper. The existing Trident system is to be given a life extension which includes building new submarines to carry the missiles costing 15-20 billion. Britain has a substantial nuclear legacy having owned nuclear weapons for over half a century. The strategic context for the deterrent has changed completely with the end of the Cold War but nuclear weapons retain much of their salience. This Adelphi Paper argues that it makes sense to remain a nuclear power in an uncertain and nuclear armed world. Given that deterrence needs are now less acute but more complex than in the past, the paper asserts that deterrence also needs to be aligned with non-proliferation policies which seek to reduce the scale of threats that need to be deterred. Somewhat overlooked in current policy are appropriate measures of defence which can raise the nuclear threshold and if required mitigate the effects of deterrence failure. It concludes that the government's decisions about the future form of the deterrent are very sensible but cautions that they still need to be integrated into a broader policy that embraces diplomacy, deterrence and defence to counter the risks posed by nuclear proliferation. **Nuclear Deterrence in a**

Multipolar World Stephen Cimbala, 2017-07-05 The view that America and Russia have burned their candles on security cooperation with respect to nuclear weapons is simply mistaken. This timely study identifies twelve themes or issue areas that must be addressed by the United States and Russia if they are to provide shared successful leadership in the management of nuclear world order. Designed as supplementary reading in upper division and graduate courses in national security policy, defense and nuclear arms control, it is also suitable for courses taught at military staff and command colleges and/or war colleges. *Deterrence in the Second Nuclear Age* Keith B. Payne, 1996 Mother Ann Lee, founder of the Shakers, articulated a vision of a community that embraced sacrifice over the needs of the individual; the result was one of the most successful utopian experiments of nineteenth century America. The Shakers, an idealistic offshoot of the ascetic Quaker religion, grew to as many as six thousand members in nineteen communities reaching from New England to the Midwest. Lee's experiment focused mainly on simplicity, celibate communal living and sexual equality; provided a model of prosperity for more than one hundred years. Founded in 1806, Shaker Village of Pleasant Hill, Kentucky, was a thriving community located in the center of the bluegrass region. After the Civil War, a steadily shrinking membership resulted in the gradual decline of this remarkable community, and the last remaining Shaker to reside at Pleasant Hill died in 1923. In the years immediately following, it appeared as though the village would fall prey to neglect and a lack of historic preservation. In 1961, however, local citizens formed a private, not-for-profit organization to preserve and restore the village and to interpret the rich heritage of the Pleasant Hill Shakers for future generations. Over several years and against incredible odds, this group succeeded in raising the funds necessary for the restoration projects. By 1968, eight buildings at Shakertown, carefully adapted for modern use,

while retaining their historical and architectural significance had been opened to the public Thomas Parrish's *Restoring Shakerstown* masterfully explains how the Shaker settlement was saved from the ravages of time and transformed into a nationally renowned landmark of historic preservation In chronicling how the hopes of the early fund raisers quickly were challenged by the harsh reality of economic hardships the book serves as a valuable study in modern philanthropy Parrish also details the village's negotiation of legal challenges and how its final plans for creating awareness of the Shakers legacy set the standard for later museum developments around the country In addition to recounting the remarkable history of the formation and eventual demise of the Shaking Quakers Parrish presents a dramatic chronicle of the village's evolving fortunes From describing the challenges of financing the restoration to finding preservation experts to achieve the highest standards of authenticity *Restoring Shakerstown* reveals the complexities and rewards of the preservation of one of Kentucky's most significant historical and architectural sites

Asia, the US and Extended Nuclear Deterrence Andrew O'Neil, 2013-09-02 Since the end of the Cold War significant attention has focussed on the issue of nuclear deterrence and in particular whether formal nuclear security guarantees from nuclear weapons states to non nuclear weapons states involving the possible use of nuclear weapons have a place in the twenty first century global strategic landscape Growing support for nuclear disarmament in the US and elsewhere has seen serious doubts being raised about the ongoing utility of extended nuclear deterrence This book provides the first detailed analysis of the way in which extended nuclear deterrence operates in contemporary Asia It addresses the following key questions What does the role of extended nuclear deterrence in Asia tell us about the broader role of extended nuclear deterrence in the contemporary international system Is this role likely to change significantly in the years ahead O'Neil uses a theoretical and historical framework to analyse the contemporary and future dynamics of extended nuclear deterrence in Asia and challenges many of the existing orthodox perspectives on the topic Providing a new perspective on debates surrounding extended nuclear deterrence this book will be of interest not only to students and scholars of Asian politics international relations and security studies but also to policy makers and professionals

certain large looming cases including the possible acquisition and deployment of nuclear weapons by Iran and the continuing tensions created by North Korea's nuclear arsenal. The Obama pivot of national security and defense emphasis to Asia reflects not only the growing economic importance of that region but also the growing number of security dilemmas in a region that is already awash in nuclear forces. The management of nuclear crises and even the possible need to terminate nuclear wars before they expand beyond a single region are among the possible challenges facing future U.S. and allied policy makers and military leaders.

Nuclear Arms Control Tom Sauer, 1998-11-12. The proliferation of nuclear weapons has been defined as the gravest potential threat to international peace and security. The concept of nuclear deterrence has to be revisited in this regard. The longer the Nuclear Weapon States hold on to their nuclear weapons, the bigger the chance that nuclear weapons will be spread and will be used once again by accident in an authorized or unauthorized way or that nuclear terrorism becomes reality. The marginalizing of nuclear weapons resulting in a Nuclear Weapon Free World should be considered as a viable alternative.

The future of the UK's strategic nuclear deterrent Great Britain: Parliament: House of Commons: Defence Committee, 2007-03-07. future of the UK's strategic nuclear Deterrent. The White Paper ninth report of session 2006-07 Vol 2 Oral and written Evidence.

Nuclear deterrence between the two superpowers during the Cold War cannot be considered a conflict because of the abstract nature of nuclear strategy. Discuss. Patrick Wagner, 2003-11-20. Essay from the year 2003 in the subject Politics Topic Peace and Conflict Security grade 1 A University of Kent Department of Politics and International Relations language English abstract. When the USA dropped two nuclear bombs on the Japanese cities of Nagasaki and Hiroshima in August 1945, the world witnessed the first and so far the last use of these weapons. Their devastating effect led to a worldwide fear of atomic bombs but could not however prevent a number of states from developing these fatal devices. In fact, the two superpowers engaged in the subsequent arms race during the Cold War, which in the end left both with a nuclear arsenal big enough to destroy the entire world several times over. Although these weapons exist in huge amounts, they have never been used for military purposes since. This distinction is important to make because the superpowers did make use of their nuclear arsenal on a political level, namely with the strategy of nuclear deterrence. Based on the US assurance that a Soviet attack on the USA or its allies would be answered with massive retaliation, this strategy has prevented a nuclear war. By looking at the concept of nuclear deterrence in more detail, this essay will argue that nuclear deterrence must be seen as a conflict even though arguments can be found underlining the view that it is not. It is certainly true that the abstract nature of nuclear strategy makes an explanation in the traditional Clausewitzian sense of conflict impossible. However, recognising the fact that the arrival of the nuclear bomb has changed the purpose of military strategy fundamentally, namely from the purpose of winning wars to the purpose of preventing wars, inevitably leads to a new concept of conflict. Nuclear strategy has introduced a shift of strategic thinking away from the military towards politics. This does of course mean that conflict now has to be defined in political terms.

Conflict can no longer only be seen as the confrontation of armies in the battlefield but must include the threat of use of force as the political dimension of conflict as well Ambiguity and Deterrence John Baylis,1995 This text focuses on the disagreements which existed in British political and military circles over nuclear strategy directly after World War II Based on recently released documents it argues that British policy in this important area was much more ambiguous than is commonly supposed *Future of Strategic Deterrence* Christoph Bertram,1981-06-18
