Christianity, The Other, and The Holocaust Michael R. Steele, 2003-02-28 According to the author Christianity offers a powerful system of rewards and incentives to create cultural uniformity Those who do not join in this cultural uniformity become anathematized oppressed marginalized and ultimately removed from the Christian circle of moral obligation Using culture studies as a framework for analysis Steele investigates the ways in which Christianity created cultural conditions based on a theology of violence and the use of sacred violence to foster behaviors that would lead to the involvement of millions of perpetrators and bystanders during the many instances of extreme violence used against the Other over the centuries As the original Disconfirming Other in the Christian cultural world Jews often served as the primary target Thus there was a system of definitions rewards incentives and victims already in place when the Nazis came to power Calling for a re evaluation of the cultural practices and values that have developed within Christianity over time this important new book helps account for the phenomenon of the Nazi perpetrators and bystanders during the Holocaust Framing the Holocaust as a late but logical development in a long series of violent responses by Christianity to the Other those who stand outside the Christian world either by geographical accident religious tradition or some other factor the author attempts to show how the Holocaust while not a specifically Christian event was nevertheless sanctioned and conditioned by other events in the history of Christianity Using culture studies to frame his analysis Steele focuses on historical antecedents that help account for the apathy of bystanders and point to the preexistence of a moral framework supporting and empowering the perpetrators of the Holocaust This unique perspective concludes that the Nazis invented almost nothing with regard to the Shoah and that instead a long standing insistence on cultural hegemony played a much bigger role in the attempted destruction of the Jewish community

Modern Just War Theory Michael P. Farrell, 2013-06-20 Contributions to Illuminations A Scarecrow Press Series of Guides to Research in Religion provide students and scholars lay readers and clergy with a road map to research in key areas of religious study All commonly constructed with introductions to the topic and reviews of key thinkers concepts and events each volume includes surveys of the primary and secondary sources with critical evaluations of their places in the canon of thought and research on the topic Focusing primarily on the knowledge required by today's students and scholars each guide is a must have for any student of religion The twentieth century saw an explosion of wars and an accompanying explosion of literature on the morality of war Thinking among Christian clerics and scholars on the idea of just war shifted with developments on the battlefield Alternatives to just war theory such as pacifism and realism found new proponents in the published work of the neo Anabaptists and Niebhurians Meanwhile proponents of

Christian just war theory had to address challenges from competing ideologies as well as those presented by the changing nature of warfare. **Modern Just War Theory: A Guide to Research** by scholar and librarian Michael Farrell serves as a manual for students and scholars studying Christian just war theory, helping them navigate the wealth of just war literature produced in the twentieth and twenty-first centuries. Farrell's guide provides an introduction to the major developments of just war theory in the twentieth century, including sections on how to research just war theory, an overview of some of the most important theorists and developments of the twentieth century, and discussions of key search terms and related topics. Farrell then surveys and evaluates key primary and secondary sources for researchers on just war theory, as well as related sources on Christian realism and the responses of just war theorists to proponents of pacifism and secular just war theories. **Modern Just War Theory** will appeal to students and scholars of theology, military history, international law, and Christian ethics. **By**

the Bomb's Early Light Paul Boyer, 2005-10-21. Originally published in 1985. **By the Bomb's Early Light** is the first book to explore the cultural fallout in America during the early years of the atomic age. Paul Boyer argues that the major aspects of the long-running debates about nuclear armament and disarmament developed and took shape soon after the bombing of Hiroshima. The book is based on a wide range of sources, including cartoons, opinion polls, radio programs, movies, literature, song lyrics, slang, and interviews with leading opinion makers of the time. Through these materials, Boyer shows the surprising and profoundly disturbing ways in which the bomb quickly and totally penetrated the fabric of American life, from the chillingly prophetic forecasts of observers like Lewis Mumford to the Hollywood starlet who launched her career as the atomic bomb. In a new preface, Boyer discusses recent changes in nuclear politics and attitudes toward the nuclear age.

Serve and Protect Tobias Winright, 2020-11-13. This collection of essays on policing and the use of force, while written over the course of the last twenty-five years, remains relevant and timely. Although issues in policing and questions about excessive force and brutality have been addressed by criminologists, sociologists, philosophers, and criminal justice ethicists, only a handful of theological ethicists treat this pressing matter. While the Christian moral tradition has a voluminous record of theological attention to violence and nonviolence, war and peace, there is a dearth of references to policing. And most considerations of criminal justice issues by Christians and their churches concentrate on prison reform or abolition and the death penalty, but not policing. These essays, authored by a theological ethicist possessing professional experience in law enforcement, seek to fill this curious gap. They offer a framework for moral reasoning concerning the justification for police use of force and the just application of such force, and they propose just policing as a model that is consonant with promoting a just peace in communities and society. In addition, they explore the implications of such an approach for wider international questions about just war, terrorism, the responsibility to protect, and post-war justice. **If Jesus Is Lord** Ronald J.

Sider, 2019-07-16. What does Jesus have to say about violence, just war, and killing? Does Jesus ever want his disciples to kill in order to resist evil and promote peace and justice? This book by noted theologian and bestselling author Ronald J. Sider

provides a career capstone statement on biblical peacemaking Sider makes a strong case for the view that Jesus calls his disciples to love and never kill their enemies He explains that there are never only two options to kill or to do nothing in the face of tyranny and brutality There is always a third possibility vigorous nonviolent resistance If we believe that Jesus is Lord then we disobey him when we set aside what he taught about killing and ignore his command to love our enemies This thorough comprehensive treatment of a topic of perennial concern vigorously engages with the just war tradition and issues a challenge to all Christians especially evangelicals to engage in biblical peacemaking The book includes a foreword by Stanley Hauerwas Cry of the Phoenix Gyeorgos C. Hatonn,1995-06 **After Evangelicalism** David P.

American Evangelicals and the 1960s Axel R. Schäfer, 2013-08-23 In the late 1970s the New Christian Right emerged as a formidable political force boldly announcing itself as a unified movement representing the views of a moral majority But that movement did not spring fully formed from its predecessors American Evangelicals and the 1960s refutes the thesis that evangelical politics were a purely inflammatory backlash against the cultural and political upheaval of the decade Bringing together fresh research and innovative interpretations this book demonstrates that evangelicals actually participated in broader American developments during the long 1960s that the evangelical constituency was more diverse than often noted and that the notion of right wing evangelical politics as a backlash was a later creation serving the interests of both Republican conservative alliances and their critics Evangelicalism s involvement with rather than its reaction against the main social movements public policy initiatives and cultural transformations of the 1960s proved significant in its 1970s political ascendance Twelve essays that range thematically from the oil industry to prison ministry and from American counterculture to the Second Vatican Council depict modern evangelicalism both as a religious movement with its own internal dynamics and as one fully integrated into general American history

Philosophical Perspectives on the War on Terrorism Gail M. Presbey, 2007 This book responds to the Bush Administration position on the war on terror It examines preemption within the context of just war justification for the United States led invasion of Iraq with some authors charging that its tactics serve to increase terror global terrorism and concepts such as reconciliation Islamic identity nationalism and intervention

Nonviolent Action Ronald J. Sider, 2015-02-10 There are numerous examples throughout history of effective nonviolent action Nonviolent protesters defied the Soviet Empire s communist rulers Gandhi s nonviolent revolution defeated the British Empire and Martin Luther King Jr s peaceful civil rights crusade changed American history Recent scholarship shows that nonviolent revolutions against injustice and dictatorship are actually more successful than violent campaigns In this book noted theologian and bestselling author Ron Sider argues that the search for peaceful alternatives to violence is not only a practical necessity in the wake of the twentieth century the most bloody in human history but also a moral demand of the Christian faith He presents compelling examples of how nonviolent action has been practiced in history and in current social political situations

to promote peace and oppose injustice showing that this path is a successful and viable alternative to violence **Freedom for Obedience** Donald G. Bloesch, 2002-04-15 The Christian ethic is an ethic that cannot be assimilated into the moral consensus of the wider community The way of the cross cannot be reconciled with the way of the world just as the gospel cannot be conjoined with the laws that gave stability to social order The thesis of this book is that human justice can never be a substitute for divine justification but it can be a sign and witness to the justifying grace of God in Jesus Christ Humanitarian works can never reach the heights of deeds of sacrificial love and mercy but they can point to this higher righteousness and awaken a thirst for it We must always be on guard against two perils the Scylla of legalism and rigorism and Charybdis of antinomianism An ethics of the divine commandment by uniting law and grace the imperative and the indicative shows how we can live the authentic Christian life in obedience to the highest which is not a law but a person not an ideal but the reality of the New Being the power of crucified love as we see this in Jesus Christ from **Freedom for Obedience** **ThirdWay**, 1984-05 Monthly current affairs magazine from a Christian perspective with a focus on politics society economics and culture **In Defence of Religious Schools and Colleges** Elmer John Thiessen, 2001 It is often argued that religious schools and colleges promote intolerance divisiveness and fanaticism and that they violate the principle of academic freedom Some writers also suggest that economic support for religious schools by the state violates the principle of the separation of church and state Elmer Thiessen provides a philosophical defence of religious schools and colleges against these and other standard objections He concludes with a radical proposal a pluralistic educational system will better prepare students for citizenship in pluralist liberal democracies than a monopolistic state maintained school system In placing his argument within the context of liberal democratic values Thiessen gives concrete examples of objections to religious schools and offers practical suggestions that follow from the philosophical treatment of the problem In **Defence of Religious Schools and Colleges** bridges the gap between philosophical argument and educational practice It will be of interest not only to philosophers and educational theorists but also to practitioners in education Academics policy makers political theorists lay people teachers administrators and parents those who object to religious schools and colleges and those who find themselves trying to answer the objections will benefit from reading this book **Peacemaking**, 2021-10-25 Peacemaking includes a large array of activities from local to global attempts to attain peace It includes consideration of international interstate and intertribal conflict resolution communal personal and interpersonal social justice deterrence of the use of nuclear weapons design of international treaties that prevent war or other forms of international conflict disarmament international organizations that secure the order among nations and even from some points of view war As the 20th century drew to a close we have witnessed peacemakers trying to end ethnic cleansing reinstate justly elected political leaders and reach compromises in the ideological differences that perpetuate age old conflicts We also see peacemaking in our schools homes and workplaces Philosophers have long been interested in peacemaking in one form or another and philosophical accounts of peacemaking

reflect the variety of perspectives methods and activities developed in pursuing peacemaking In some instances philosophers expand upon the situations activities and methods of the peacemaker in the field The essays in this volume propose some theoretical arguments for various aspects of peacemaking offer nonmilitary alternatives to war and discuss practical examples of peacemaking in daily life The contributors analyze power relations language social groupings and distribution of resources At times they draw insight from social and historical models of conflict and conflict resolution This collection of essays on peacemaking aims to enlighten contemporary social and political discussions and contribute to achieving the ever challenging goal of peace
