Nuclear Issues In The Canadian Energy Context:

Nuclear Issues in the Canadian Energy Context E. P. Hincks, Committee on Nuclear Issues, Royal Society of Canada, Science Council of Canada, 1979
 環境放射線健康影響調査報告書 (Japan), 1900
Report of the Interagency Task Force on the Health Effects of Ionizing Radiation United States. Interagency Task Force on the Health Effects of Ionizing Radiation, 1979
The Brundtland Challenge and the Cost of Inaction Royal Society of Canada, Institute for Research on Public Policy, 1988
 From the back cover
 Environment is now at the top of the public agenda
 This publication reports on two workshops held in early 1988 to discuss aspects of environmental issues
 The workshop members were drawn from number of professions and came with wide experience
 They were much concerned about environmental issues and determined to recommend action on them
 Accordingly they refused to be constrained by workshop titles or fixed agendas and ranged widely over a number of important questions
 These included the basic nature of the environmental issue the apparent failure over the past couple of decades of our decision making processes and institutions in attacking the causes why have we not done better and the reasons for that and what now must be done
 They ended with a series of recommendations which set out the results of their best thinking at that time
Canadian Energy Policy and the Struggle for Sustainable Development G. Bruce Doern, 2005-01-01
 In recent years energy policy has been increasingly linked to concepts of sustainable development
 In this timely collection editor G Bruce Doern presents an overview of Canadian energy policy gathering together the top Canadian scholars in the field in an examination of the twenty year period broadly benchmarked by energy liberalization and free trade in the mid 1980s and by Canada's ratification of the Kyoto Protocol in 2002
 The contributors examine issues including electricity restructuring in the wake of the August 2003 blackout the implications of the Bush Administration's energy policies energy security northern pipelines and Aboriginal energy issues provincial changes in energy policy and overall federal provincial changes in regulatory governance
 They also demonstrate that since per capita energy usage has actually increased in the past several years sustainable development remains very much a struggle rather than an achievement
 When the Kyoto Protocol and its requirements for reductions in greenhouse gas emissions are factored in the Canadian record is especially dubious in basic energy terms
Canadian Energy Policy and the Struggle for Sustainable Development is key to understanding many of the issues in Canada's endeavour to live up to its energy related environmental responsibilities
Report United States. Interagency Task Force on the Health Effects of Ionizing Radiation, 1979
