Negotiating the Nuclear Non-Proliferation Treaty Roland Popp, Liviu Horovitz, Andreas Wenger, 2016-10-04 This volume offers a critical historical assessment of the negotiation of the Treaty on the Non Proliferation of Nuclear Weapons NPT and of the origins of the nonproliferation regime The NPT has been signed by 190 states and was indefinitely extended in 1995 rendering it the most successful arms control treaty in history Nevertheless little is known about the motivations and strategic calculi of the various middle and small powers in regard to their ultimate decision to join the treaty despite its discriminatory nature While the NPT continues to be central to current nonproliferation efforts its underlying mechanisms remain under researched Based on newly declassified archival sources and using previously inaccessible evidence the contributions in this volume examine the underlying rationales of the specific positions taken by various states during the NPT negotiations Starting from a critical appraisal of our current knowledge of the genesis of the nonproliferation regime contributors from diverse national and disciplinary backgrounds focus on both European and non European states in order to enrich our understanding of how the global nuclear order came into being This book will be of much interest to students of nuclear proliferation Cold War history security studies and IR

Nuclear Non-Proliferation Michael P. Fry, N. Patrick Keatinge, Joseph Rotblat, 2012-12-06 This volume appears at a time when the prospects for banishing the threat of nuclear annihilation are brighter than at any time since the first atomic device exploded over the desert at Alamogordo The last few years have seen an extraordinary change in the climate of East West relations The programme of political and economic reform which President Gorbachev initiated in the Soviet Union and which is now spreading throughout most of Eastern Europe has been paralleled by serious efforts to reach agreement on measures for conventional and nuclear disarmament This has led to new hope that international peace and security can at last be built upon the firm foundation of justice respect for international law and a determination to approach problems in a spirit of genuine co operation rather than one of distrust

and confrontation This new climate encourages us in the belief that the obvious common sense of preventing the further spread of nuclear weapons will come to be shared by all nations At the same time we have to recognize two very disturbing facts which imply that there can be no slackening of our efforts to strengthen the non proliferation regime **Reviewing the Nuclear Nonproliferation Treaty (NPT)** Henry D. Sokolski, Army War College (U.S.). Strategic Studies Institute, 2010 As currently interpreted it is difficult to see why the Nuclear Nonproliferation Treaty NPT warrants much support as a nonproliferation convention Most foreign ministries including that of Iran and the United States insist that Article IV of the NPT recognizes the inalienable right of all states to develop peaceful nuclear energy This includes money losing activities such as nuclear fuel reprocessing which can bring countries to the very brink of acquiring nuclear weapons If the NPT is intended to ensure that states share peaceful benefits of nuclear energy and to prevent the spread of nuclear bomb making technologies it is difficult to see how it can accomplish either if the interpretation identified above is correct Some argue however that the NPT clearly proscribes proliferation by requiring international nuclear safeguards against military diversions of fissile material Unfortunately these procedures which are required of all non nuclear weapons state members of the NPT under Article III are rickety at best Each chapter of this book is dedicated to clarifying the NPT's key ambiguities and the chapters are roughly structured to trace the NPT's text article by article The analysis set forth here was mostly written or commissioned by the Nonproliferation Policy Education Center Much more of course could have been included in this book But rather than seeking to be comprehensive the aim throughout is to provide a guide for both policymakers and security analysts This guide should assist in navigating the most important debates over how best to read and implement the NPT and in the process spotlighting alternative views of the NPT that are sound and supportable Related products Treaties in Force A List of Treaties and Other International Agreements of the United States in Force on January 1 2016 can be found here <https://bookstore.gpo.gov/products/sku/044-000-02684-8> The Warsaw Pact Treaty of Friendship Cooperation and Mutual Assistance Soviet East European Military Relations in Historical Perspective Sources and Reassessments can be found here <https://bookstore.gpo.gov/products/sku/041-015-00306-2> Moving Beyond Pretense Nuclear Power and Nonproliferation can be found here <https://bookstore.gpo.gov/products/sku/008-000-01098-6> *The Future of the Non-Proliferation Treaty* Darryl Howlett, John Simpson, 2016-07-27 In 1995 a Conference is to be convened to review and extend the Treaty on the NonProliferation of Nuclear Weapons NPT The Future of the NPT brings together a distinguished group of individuals including the elected President of the 1995 NPT Conference to analyse four crucial agenda areas relevant to the Conference the preConference activities to be undertaken by both States Parties and the Conference Secretariat those security issues that relate to a review of the treaty such as nuclear disarmament and security assurances peaceful uses and verification questions and regional issues With nuclear nonproliferation currently occupying a prominent position on the international security agenda the 1995 Conference offers a unique opportunity for a constructive discussion on these areas and it is hoped

that this volume will provide a contribution to that end The Nuclear Non-proliferation Treaty Ian Bellany, Coit D. Blacker, Joseph Gallacher, 1985 This study looks at the interpretations and effects of the Nuclear Non Proliferation Treaty and offers readings of its possible future effects **The Nuclear Non-Proliferation Regime** Raju G.C. Thomas, 2016-07-27

Leading international security scholars and policy advisors from universities think tanks and nuclear weapons laboratories in the United States analyze the future of nuclear weapons proliferation In April 1995 the earlier 1970 Nuclear Non Proliferation Treaty was renewed indefinitely and without change to the original clauses of the treaty The authors examine the continuing relevance or irrelevance of the old treaty the role of coercive sanctions in enforcing restraint and the impact of biological chemical and missile proliferation on the nuclear motives and ambitions of various states Attention is given to proliferation conditions in the former Soviet republics East and South Asia and the Middle East The Nuclear Nonproliferation Treaty Kelsey Davenport, 2019 **Strengthening Nuclear Nonproliferation** Kathleen C Bailey, 2019-06-26 This book examines the components of the nuclear non proliferation regime and policies which have been suggested as means to strengthen it It discusses alternatives that might lower the likelihood of further proliferation and help reduce the nuclear arms and capabilities of proliferant states **Joining the Non-Proliferation Treaty** John Baylis, Yoko Iwama, 2018-07-11 What were the calculations made by the US and its major allies in the 1960s when they faced the signing of the Non Proliferation Treaty NPT These were all states with the technological and financial capabilities to develop and possess nuclear weapons should they wish to do so In the end only the United Kingdom and France became nuclear weapon states Eventually all of them joined the non proliferation regime Leading American British Canadian French German and Japanese scholars consider key questions that faced the signatories to the NPT How imperative was nuclear deterrence in facing the perceived threat to their country How reliable did they think the US extended deterrence was and how costly would an independent deterrent be both financially and politically Was there a regional option How much future was there in the civilian nuclear energy sector for their country and what role would the NPT play in this area What capabilities needed to be preserved for the country's future and how could this be made compatible with the NPT What were the determining factors of deciding whether to join the NPT **Reviewing the Nuclear Nonproliferation Treaty (Npt)** Strategic Studies Institute, 2010-04-01 As currently interpreted it is difficult to see why the Nuclear Nonproliferation Treaty NPT warrants much support as a nonproliferation convention Most foreign ministries including that of Iran and the United States insist that Article IV of the NPT recognizes the inalienable right of all states to develop peaceful nuclear energy This includes money losing activities such as nuclear fuel reprocessing which can bring countries to the very brink of acquiring nuclear weapons If the NPT is intended to ensure that states share peaceful benefits of nuclear energy and to prevent the spread of nuclear bomb making technologies it is difficult to see how it can accomplish either if the interpretation identified above is correct Some argue however that the NPT clearly proscribes proliferation by requiring international nuclear safeguards against

military diversions of fissile material Unfortunately these procedures which are required of all non nuclear weapons state members of the NPT under Article III are rickety at best The International Atomic Energy Agency IAEA nuclear inspections which are intended to detect illicit nuclear activities and materials certainly have a mixed record Not only has the IAEA failed to find existing covert reactors and fuel making plants which are critical to bomb making the agency still cannot assure the continuity of inspections for spent and fresh reactor fuels that could be processed into bomb usable materials at roughly two thirds of the sites that it currently inspects What is easily as worrisome is that even at declared nuclear fuel making sites the IAEA routinely loses count of many bombs worth of production each year Finally in the practical world the NPT hardly admits of modification and is far too easy for violating states to withdraw from Under Article X treaty members are free to leave the NPT with no more than 3 months notice merely by filing a statement of the extraordinary events relating to the subject matter of the treaty it regards as having jeopardized its supreme interests As demonstrated by North Korea with its withdrawal from the NPT these slight requirements are all too easy to meet As for amending the treaty it is nearly impossible Not only must a majority of NPT members ratify any proposed amendments but every member of the IAEA government board and every NPT nuclear weapons state member must ratify the proposal as well and this is only to get amendments for consideration by those states that have not yet ratified the NPT Ultimately any state that chooses not to so ratify is free to ignore the amendment and therefore the treaty is functionally incapable of being amended For all of these reasons the NPT is not just seen as being weak against violators and difficult to improve but it is seen effectively as a legal instrument that enables nations to acquire nuclear weapons technology Consequently each chapter of this book is dedicated to clarifying the NPT s key ambiguities and the chapters are roughly structured to trace the NPT s text article by article The analysis set forth here was mostly written or commissioned by the Nonproliferation Policy Education Center Much more of course could have been included in this book But rather than seeking to be comprehensive the aim throughout is to provide a guide for both policymakers and security analysts This guide should assist in navigating the most important debates over how best to read and implement the NPT and in the process spotlighting alternative views of the NPT that are sound and supportable

The Nonproliferation Predicament Joseph F. Pilat, 1985-01-01 The Nonproliferation Predicament is an authoritative and comprehensive look at U S nonproliferation policy Top U S scholars analysts and policymakers focus on the period since the Reagan administration took office and address several questions about the current state of nuclear proliferation As the international non proliferation regime evolves will it continue to be responsive to the problem of proliferation Or will it become superannuated by new technologies or enmeshed in domestic and international political controversies and conflicting interests What nonproliferation policies are likely to be effective in the 1980s and beyond as nations continue efforts to establish and expand nuclear industrial bases providing them with capabilities useful for the pursuit of weapons options in the future Does the stagnation of the international nuclear market and the difficulties of nuclear threshold states

like India give reasons for hope Or will the limited proliferation of the past prove to have been a passing anomaly in military history

Nuclear Non-Proliferation in International Law - Volume I Jonathan L. Black-Branch, Dieter Fleck, 2014-07-22 The volume discusses the legal interpretation and implementation of the three pillars of the Treaty of the Non Proliferation of Nuclear Weapons 1968 regarding the non proliferation of nuclear weapons the right to develop research production and use of nuclear energy for peaceful purposes and issues relating to nuclear disarmament It examines the status of international law regarding nuclear capacity considering competing legal approaches to the development of nuclear technology non proliferation disarmament and regulating nuclear weapons within a contemporary international context

Interpreting the Nuclear Non-Proliferation Treaty Daniel Joyner, 2011-05-26 The 1968 Nuclear Non Proliferation Treaty is one of the most controversial instruments in international law This text argues that countries with nuclear weapons misrepresent the Treaty to prevent other states from developing peaceful nuclear energy holding back nuclear disarmament in the process

Non-Proliferation Stockholm International Peace Research Institute, 2020-11-19 Is the appearance of

new nuclear weapon states inevitable Who are the sponsors and apologists of nuclear weapons and why are others in favour of renouncing them What are the implications for international security of the increasingly wide use of nuclear energy How can nuclear threats be defused Originally published in 1985 SIPRI's study suggests some answers to these questions The book examines the situation in a number of countries of key importance for non proliferation the two nuclear weapon states which have declined to join the 1968 Non Proliferation Treaty China and France a group of nuclear threshold states also remaining outside the Treaty Argentina Brazil India Israel Pakistan South Africa and Spain and a group of states both developed and developing which for various reasons have joined the Treaty Canada Egypt South Korea Sweden Switzerland and Taiwan The focus of the book is on motivations for and against nuclear proliferation An analysis of these motivations leads the editor to make detailed recommendations aimed at halting the spread of nuclear weapons Appendices include a list of nuclear facilities in the countries studied specifying the degree of their coverage by international controls and other relevant documentation
