Nuclear Power Development Stanley M. Nealey, 1990 **Nuclear Power** National Research Council, Division on Engineering and Physical Sciences, Commission on Engineering and Technical Systems, Energy Engineering Board, Committee on Future Nuclear Power Development, 1992-02-01 The construction of nuclear power plants in the United States is stopping as regulators reactor manufacturers and operators sort out a host of technical and institutional problems This volume summarizes the status of nuclear power analyzes the obstacles to resumption of construction of nuclear plants and describes and evaluates the technological alternatives for safer more economical reactors Topics covered include Institutional issues including regulatory practices at the federal and state levels the growing trends toward greater competition in the generation of electricity and nuclear and nonnuclear generation options Critical evaluation of advanced reactors covering attributes such as cost construction time safety development status and fuel cycles Finally three alternative federal research and development programs are presented **Forum for Applied Research and Public Policy**, 1991 LDC Nuclear Power Prospects, 1975-1990 Richard J. Barber Associates, 1975 **Biosphere 2000** Donald G. Kaufman, Cecilia M. Franz, 2000 **Biological Environmental Science** William V Dashek, 2019-04-29 Biological Environmental Science is an introductory textbook for undergraduate students who desire a one semester course or alternatively a springboard course for advanced environmental offerings This book features timely issues such as global warming air ground and water pollutions population growth species extinction and environmental policy Unique features of this book include the use of research data and literature copious illustrations and appendices for the scientific method *Nuclear Science Abstracts*, 1975 *Public Reactions to Nuclear Waste* Riley E. Dunlap, Michael E. Kraft, Eugene A. Rosa, 1993 Nuclear waste is going nowhere and neither is the debate over its disposal The problem growing every day has proven intractable with policymakers on one side armed with daunting technical data and the public on the other declaring not in my backyard This timely volume offers a look past our present impasse into the nature and roots of public viewpoints on nuclear waste disposal A much needed supplement to the largely technical literature on this problem the book provides extensive studies of the reaction of citizens whether rural or urban near site residents or prospective visitors to proposed nuclear waste sites around the nation particularly Nevada s Yucca Mountain Conducted by distinguished sociologists psychologists political scientists and economists these studies constitute the most comprehensive account available of the impact of public perceptions and opinions on the nuclear waste policy process in the United States As such the collection will clarify the politics of nuclear waste siting and will give impetus to the stalled debate over the issue Contributors Rodney K Baxter Julia G Brody Bruce Clary Lori Cramer William H Desvousges Riley E Dunlap Douglas Easterling Judy K Fleishman James Flynn William R Freudenburg Michael E Kraft Richard S Krannich Howard Kunreuther Mark Layman Ronald L Little Robert Cameron Mitchell Alvin H Mushkatel Joanne M Nigg K David Pijawka Eugene A Rosa Paul Slovic **International Energy Outlook**

(1995) DIANE Publishing Company, 1995-10 Presents an assessment of the outlook for international energy markets between 1990-2010. Hundreds of tables, charts. *Science, Technology, And Politics* Gary Bryner, 2019-06-21. This book began several years ago as a project organized by members of the Science and Technology Studies section of the American Political Science Association. It is part of an ongoing attempt by members of the section and others to focus scholarly attention on the political and social implications of technological change and scientific advances. Part of the concern is to identify theories, conceptual frameworks, and concepts from political science that can usefully be applied to the study of science and technology. Part of the concern is to explore how science and technology-related concerns help illuminate and test some of the enduring theories of political science. We hope to contribute to the development of a strong theoretical underpinning for science and technology studies. We hope that such an enrichment of the theoretical bases for understanding science and technology-related phenomena will also contribute to more effective and appropriate public policies for regulating and encouraging scientific and technological developments. This book is an attempt to marry theoretical exposition and applied policy inquiry. **A Short History of Nuclear Regulation, 1946-1990** J. Samuel Walker, 1993. *Lights Out* Jason Makansi, 2007-09-10. A behind-the-scenes exposure of why our electricity system is headed for a state of emergency and what can be done to head it off. Most people don't realize that skyrocketing global energy demand and economic growth severely affect the supply of electricity. Between production, power plants, and delivery is an antiquated third-world transmission grid that is in desperate need of hardening against breakdowns, terrorist attacks, inadequate carrying capacity, and operational obsolescence. And while electricity doesn't hold the headlines or dramatic power of oil, the ability to ensure its uninterrupted supply at a reasonable price is even more essential to global survival and prosperity. *Lights Out* is today's most detailed, in-depth examination of this largely unreported, looming energy crisis. Written by one of the world's top electricity industry experts, this powerful book covers numerous hot-button economic and political issues: free markets versus regulation, energy independence versus foreign imports, nuclear power, global warming, and other environmental issues, and much more. Beyond just uncovering and illuminating the problems, however, it proposes a comprehensive road map of technical solutions and regulatory reform from both the production and demand sides of the equation, a framework for rethinking, rebuilding, and enhancing the entire electricity production and delivery infrastructure. Prescriptive and provocative, *Lights Out* will redefine the simmering debate on how the world can and must act now to head off a global catastrophe, one that could eventually wreak even more havoc than the ongoing oil crisis. Jason Makansi is the President of Pearl Street Inc., a consulting firm; Principal of PS Liquidity Advisors, an advisory service for energy technology companies raising capital; and Executive Director of the Energy Storage Council, a public policy advocacy organization. A prolific author, respected industry thought leader, and seasoned communicator, Mr. Makansi has been analyzing the technological, business, and regulatory issues in electricity production and delivery for over twenty-five years. He earned a BS in chemical engineering from Columbia University. His
