## **Nuclear Strategy And Arms Control:**

*Strategy and Arms Control* Thomas C. Schelling, Morton H. Halperin, 1961      *Nuclear Strategy, Arms Control, And The Future* P. Edward Haley, 2019-03-05 Balanced and comprehensive in approach this text assembles classic statements on nuclear strategy and arms control made by Soviet and U S policymakers military thinkers and opinion leaders during the last forty years Major Soviet statements rarely appearing in translation reflect the disagreement over whether victory or parity is the goal      **Nuclear Strategy, Arms Control, And The Future** P. Edward Haley, Jack Merritt, 1988-12-04      *Strategic Stalemate* Michael Krepon, 1984-06-18      The Arms Control, Disarmament, and Military Security Dictionary Jeffrey M. Elliot, Robert Reginald, 2007-09-01 This facsimile reprint of the 1989 edition is according to Library Journal a wonderfully concise and comprehensive resource on a very important topic In 268 detailed entries the authors provide a wealth of information on such topics as the arms race conventional and nuclear weapons nuclear strategy and disarmament The entries are cross referenced and there is an index Of great value to general readers as well as specialists      Nuclear Strategy and Arms Control: A Comparison , 1996 The objective of the research was to determine what if any relationship existed between the United States nuclear weapons employment policy and its arms control policy from the 1950s to the present Specifically we sought to determine if one policy was a causal factor for the other or if the policies evolved in a cooperative manner The research involved building a comparative chronology of the development and implementation of the two policies After examining the history it was apparent they are linked in every case Because the relationship was so variable it must be described as a function of time the driving force behind the relationship changed with successive US administrations and as the relative balance of nuclear strength shifted between the US and the Soviet Union However running through the decades were two discernible threads One was that the short term goal for arms control always seemed to be to create an equivalence of capability and the other was that the long term goal for both employment policy and arms control was to create the appropriate conditions to avoid nuclear war The conclusion is that long term stability must take priority over short term numerical equivalence      *Nuclear Strategy and Arms Control* Steven P. Ernst, 1996      *House of Cards* Colin S. Gray, 1992 If peace breaks out can arms control be far behind According to Colin S Gray this sardonic motto describes events of the 1990s just as well as it did those of the 1920s Gray offers a provocative history of twentieth century attempts at arms limitation as he challenges the fundamental assumptions of arms control theory Arms control has never worked he concludes because it never can Existing approaches to arms control appeal to common sense but they are logically unsound and inherently impractical Gray argues because they fail to take political realities into account He outlines their inadequacies in what he calls the Arms Control Paradox the more motivated nations are to fight one another the less interested they will be in supporting significant arms limitations Under these conditions arms control agreements must be to echo a phrase of George Will s either impossible or unimportant Documenting the naval treaties of the 1920s and 1930s and the initiatives to limit

strategic nuclear arms from 1969 to the present Gray seeks to demonstrate that the fortunes of negotiated arms limitation have merely reflected the temperature of international relations rather than influencing those relations National security analysts students and scholars of international relations and others interested in arms control issues will want to read House of Cards and debate its conclusions      **Understanding Weapons and Arms Control** Teena Mayers,1991 An introduction to modern weapons and the issues surrounding them      Interim Report North Atlantic Assembly. SPECIAL COMMITTEE ON NUCLEAR STRATEGY AND ARMS CONTROL.,1985      *A New Nuclear Century* Stephen J. Cimbala,James Scouras,2002-05-30 Cimbala and Scouras examine the issues related to the control of nuclear weapons in the early 21st century These issues are both technical and policy oriented science and values are commingled This means that arguments about nuclear strategy arms control and proliferation are apt to be contentious and confusing The authors seek to provide readers with a fuller more accurate understanding of the issues involved They begin by analyzing the crazy mathematics of nuclear arms races and arms control that preoccupied analysts and policymakers during the Cold War After examining stability modeling they argue for a more comprehensive definition of strategic stability and they relate this more inclusive concept to the current relationship between the United States and Russia one characterized by cooperation as well as competition They then use the concept of friction to analyze how the gap between theory and practice might influence nuclear force operations and arms control The problem of nuclear weapons spread or proliferation is then considered from the vantage point of both theory and policy They conclude with an analysis of whether the United States might get by in the 21st century with fewer legs of its strategic nuclear triplet than weapons based on land at sea and airborne A provocative analysis for arms control policymakers strategists and students scholars and other researchers involved with nuclear weapons issues      *Nuclear Arguments* Lynn Eden,Steven E. Miller,1989 Computer disk A collection of computer programs and databases that you can use to simulate nuclear wars under scenarios that you posit      **The New Nuclear Rules** James Lloyd George,1990      **Flawed Logics** James H. Lebovic,2013-11-15 Can a nation accept limits in an arms competition James H Lebovic explores the logic of seeking peace in an arms race Flawed Logics offers a compelling intellectual history of U S Russian strategic nuclear arms control Lebovic thoroughly reviews the critical role of ideas and assumptions in U S arms control debates tying them to controversies over U S nuclear strategy from the birth of the atomic age to the present Each nuclear arms treaty from the Truman to the Obama administration is assessed in depth and the positions of proponents and opponents are systematically presented discussed and critiqued Lebovic concludes that the terms of these treaties with the Russians were never as good as U S proponents claimed nor as bad as opponents feared The comprehensive analysis in Flawed Logics is objective and balanced challenging the logic of hawks and doves Democrats and Republicans and theorists of all schools with equal vigor Lebovic s controversial argument will promote debate as to the very plausibility of arms control      *Milestones in strategic arms control 1945-2000...* ,      Understanding Nuclear Weapons and Arms Control Teena

Mayers,1986      Current Problems in Nuclear Strategy and Arms Control Brent Scowcroft,1984      **Nuclear Strategy and Arms Control** Stanley R. Sloan,Robert C. Gray,1982      *Bulletin of the Atomic Scientists* ,1985-12 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world      The Amateur Strategist James DeNardo,1995-08-25 This book first published in 1995 explores how the everyday person reasons about nuclear strategy
