The Lost Language of Plants Stephen Harrod Buhner, 2002-03-06 Enraged Energized Exultant You won't know how to feel after reading Stephen Harrod Buhner's The Lost Language of Plants This is a devastating expose about how we are polluting our environment with the pharmaceuticals that Western medicine has developed to heal us We are ingesting Prozac Premarin and antibiotics whether we want to or not Yet as we foul air and water with toxic residues we overlook the power of the planet's natural healers stabilizers and chemists plants Buhner sees plants as fully sentient beings adjusting and fine tuning to the environment just as they have done for the past 500 million years Until recently humans shared the language of plants but increasingly we have lost our ability to communicate with the natural world Buhner shows us a path back to our shamanic roots

BOOK JACKET One Hundred Centuries Of Solitude James Flynn, James Chalmers, Doug Easterling, Roger Kasperson, Howard Kunreuther, 2019-06-04 Time is both the ally of high level nuclear waste HLNW managers and the enemy It is the ally because the radioactivity in elements and isotopes decreases with age making the waste progressively less dangerous to human health and safety and the environment This rate of radioactive decline varies in some cases diminishing by half the half life in seconds minutes hours days weeks months or years In other cases the decay process takes centuries or hundreds of thousands of years before the wastes are safe for human contact The problem as now conceptualized for HLNW managers is simple to state if not easy to achieve The HLNW needs to be secured in some fashion until it decays by virtue of its physical nature to safe levels Another possible future solution not currently available might be to change the structure of HLNW through high technology processing and thus decompose the waste into units with different and less lengthy radioactivity Learning whether this processing is a future option will require patience and generous amounts of time for research
