**Nuclear Weapons and British Strategic Planning, 1955-1958** Martin S. Navias, 1991 During the 1950s nuclear weapons began to play an increasingly important role in Britain's defence policy The development of thermonuclear bombs and assessments of the great destruction that would result from an exchange of nuclear warheads helped alter Britain's planning for war and influenced the structure and deployment of her armed forces In this study Martin Navias seeks to analyse the significance of the 1957 White Paper on Defence in the context of British strategic planning during the mid 1950s He assesses claims that the White Paper represented a culmination of trends already prevalent in British defence planning discusses whether the basis for a truly independent deterrent was established during 1955-6 and identifies continuities and discontinuities in strategic policies A major theme throughout is the relationship between nuclear deterrence and the shape and size of conventional forces Before Duncan Sandys became Minister of Defence that ministry seemed unable to impose itself on the service departments Sandys however was able to override many traditional service preferences The result was the adoption of a British New Look conventional forces were reduced greater relative importance was placed on the nuclear deterrent but once more the requirements of a truly independent deterrent did not receive priority

The Bomber In British Strategy S. J. Ball,2022-04-30 Between 1945 and 1960 Great Britain constructed a substantial nuclear armed bomber force The creation of this force had ramifications that extended well beyond the confines of military policy The process played a large part in defining relations with the United States and the belief that these bombers could replace conventional forces convinced successive British governments that Great Britain could maintain a significant global military role Originally published in 1995 and drawing on both archives and oral testimony this book analyses British strategic discourse and its influence on British foreign policy in the early decades of the Cold War *The Two Germanies and Military Security in Europe* C. James,2001-11-28 During the Cold War the small state of Cyprus was of great strategic importance to the West Britain the United States and Nato all had valuable installations there and any armed conflict between Greek and Turkish Cypriots could easily suck two nearby Nato members Greece and Turkey into war When therefore intercommunal fighting broke out in Cyprus in December 1963 the West was deeply embarrassed This book examines the consequential efforts of first Britain and then the UN to keep the peace The British Way in Cold Warfare Matthew Grant,2011-10-20 By utilising the latest research readers will be given a complete picture of the way Britain fought the Cold War moving the focus away from the now familiar crises of Suez and Cuba and onto the themes that underpinned the British war strategy Intelligence civil defence and nuclear diplomacy are all examined within the context of modern British history at a time of national decline There is a growing interest in the contexts of the Cold War and this collection will establish itself as the leading volume on the UK s wartime strategy

**Churchill and Empire** Lawrence James, 2013-07-18 A genuinely original biography of Churchill focusing on his contradictory and lifelong relationship with the British Empire. A superb history of a memorable subject. Andrew Roberts, bestselling author of *CHURCHILL WALKING WITH DESTINY*. One of our finest narrative historians and journalist for the *SUNDAY TIMES* and *LITERARY REVIEW*. Lawrence James has written a genuinely new biography of Winston Churchill set within a fully detailed historical context but solely focusing on his relationship with the British Empire. As a young army officer in the late 19th century Churchill's first experience of the Empire was serving in conflicts in India, South Africa and the Sudan. His attitude towards the Empire at the time was the stereotypical Victorian paternalistic approach: a combination of feeling responsible and feeling superior. Conscious even then of his political career ahead, Churchill's natural benevolence towards the Empire was occasionally overruled for political reasons and he found himself reluctantly supporting or at least not publicly condemning British atrocities. As a politician he consistently relied on the Empire for support during crises but was angered by any demands for nationalisation. He held what many would regard today as racist views in that he felt that some nationalities were superior to others but he didn't regard those positions as fixed. His somewhat obsequious relationship with America reflected that view: America was a former colony where the natives had become worthy to rule themselves but he felt still had that tie to Britain. Thus he overlooked the frequently expressed American view that the Empire was a hangover from a bygone era of colonisation and reflected poorly on Britain's ability to conduct herself as a political power in the current world order. This outmoded attitude was one of the reasons the British voters rejected him after a Second World War in which it was universally felt he had led the country brilliantly. His attitude remained Victorian in a world that was shaping up very differently. However it would be a mistake to consider Churchill merely as an anachronistic soldier. He grasped the problems of the Cold War immediately believing that immature nations prematurely given independence would be more likely to be sucked into the vortex of Communism. This view chimed with American foreign policy and made the Americans rather more pragmatic about their demands for self governance for Empire countries. Lawrence James has written a fascinating portrait of an endlessly interesting statesman and one that includes tantalising vignettes about his penchants for silk underwear and champagne.
