**The Use of Nuclear Weapons and the Protection of the Environment during International Armed Conflict** Erik V Koppe, 2008-04-25 In 1996 the International Court of Justice delivered an Advisory Opinion on the legality of the use of nuclear weapons in which the Court stated that while the existing international law relating to the protection and safeguarding of the environment does not specifically prohibit the use of nuclear weapons it indicates important environmental factors that are properly to be taken into account in the context of the implementation of the principles and rules of the law applicable in armed conflict The present work analyses this conclusion focusing on the question whether or not the use of nuclear weapons during international armed conflict would violate existing norms of public international law relating to the protection and safeguarding of the environment Although the use of weaponry during armed conflict is usually related to the protection of individuals the rapidly emerging appreciation of and the worldwide realization of the intrinsic value of the natural environment as an indispensable asset for the continuation of life including human life on this planet both for present and future generations warrants a thorough and extensive examination of the question of the il legality of the employment of nuclear weapons from the point of view of international environmental protection law The book consists of two parts Part I discusses the historical development and the effects of nuclear weapons Part II discusses the protection of the environment during international armed conflict under ius in bello ius ad bellum and ius pacis Only then is it possible to assess the legality of the use of nuclear weapons under this particular set of rules

Military Weapons and Environment Wing Commander (Dr) Umesh Chandra Jha, 2017-10-15 Armed conflicts have become more complicated with the emphasis shifting towards new weapons such as drones, cybercrime, and autonomous weapons. In July 2017, the UN General Assembly adopted the Treaty on the Prohibition of Nuclear Weapons. This treaty prohibits a full range of nuclear weapon-related activities such as undertaking to develop, test, produce, manufacture, acquire, possess, or stockpile nuclear weapons or other nuclear explosive devices, as well as the use or threat of use of these weapons. The ongoing conflicts have shown that the consequences of the use of explosive weapons are not limited to death, physical injury, and disability but also include long-term impacts on mental well-being. The use of improvised weapons by States and non-State actors is an area of concern for the environment. Every State must therefore ensure that weapons used by their armed forces are explicitly adjudged under International Humanitarian Law (IHL) and Human Rights Law. While reviewing a new weapon, the States must adopt multilateral approaches drawing upon relevant legal, health, environmental,

and military expertise This book describes the environmental effects of eight weapons and explosive remnants of war that have caused extensive environmental harm in the recent past It also makes specific recommendations addressed to the international community and the States for protecting the natural environment from the impact of weapons of war This book will contribute towards a better understanding of the environmental harm caused by military weapons      *Weapons of War: Environmental Impact* ,2013-08-15 The Indian Air Force from a humble beginning in 1932 with 4 Wapiti aircraft six Indian officers and 22 hawaii sepoys have traversed a long journey of eighty one years and crossed noteworthy milestones to become the fourth largest air force in the world While facing several limitations challenges IAF have met all the national defence requirements and made several strategic contributions With growing economic interests and national aspirations expanding interests well beyond our territorial boundaries and prevailing internal security challenges India s national defence requirements are also increasing The first Gulf War was a monumental turning point in the war time employment of aerospace power Ever since significance of aerospace power in war crisis and peace time has been gaining ascendancy Kosovo and Libya are the two pertinent examples of the allies virtually relying on aerospace power without committing any soldiers on the ground Scrutiny of the emerging global and national trends suggests that employment of the aerospace assets as well as nation s expectation from the IAF will continue to rise Alongside there is an unplanned fall in flying platforms weapon systems and pilot strength of the IAF This study is an attempt to analyse the history of the IAF in war as well as other than war operations to appreciate the emerging trends in geopolitics aerospace technology and doctrine and to identify the likely challenges IAF would be facing in the next two decades and beyond Road map for transformation of the national security framework indigenous aerospace industry and the IAF has also been suggested      *Understanding Contemporary Strategy* David J. Lonsdale,Thomas M. Kane,2019-11-20 This textbook provides a comprehensive introduction to modern strategy covering the context theory and practice of military strategy in all its different forms Covering all the main issues in the field the book explores the major themes through a combination of classical and modern strategic theory history and current practice It is split into three main sections The first provides the context for contemporary strategy and includes discussions of the human technological intelligence ethical and grand strategic dimensions The second part explores the theory and practice of strategy in different geographical domains including land sea air space and cyberspace The final part engages with three of the most challenging forms of strategy in the contemporary era nuclear weapons terrorism and insurgency This second edition brings the book up to date by including discussions of the rise and fall of the Islamic State of Iraq and Syria ISIS the emergence of robotics and artificial intelligence major events in space and cyberspace and the growing profile of nuclear weapons Each chapter presents the reader with a succinct summary of the topic provides a challenging analysis of current issues and finishes with key points questions for discussion and further reading This book will be essential reading for upper level students of strategic studies war studies military history and international security

**The Nature of War in the Information Age** David J. Lonsdale, 2004-06 Much of today's Revolution in Military Affairs RMA literature subscribes to the idea that the information age will witness a transformation in the very nature of war In this book David Lonsdale puts that notion to the test *The Second Nuclear Age* Colin S. Gray, 1999 The author takes issue with the complacent belief that a happy mixture of deterrence arms control and luck will enable humanity to cope adequately with weapons of mass destruction arguing that the risks are ever more serious

**Armed Conflict and Environmental Damage** Dr. U C Jha, 2014-08-01 Armed conflict and military activities have serious adverse impacts on the environment Modern weaponry troop movements landmines hazardous military waste and the destruction of forests for military use are a few sources of harm to the environment both during armed conflict and peacetime military activities Ecological assaults in combat areas are often kept a secret by the government resulting in even greater humanitarian and environmental harm Environmental degradation is increasingly being recognized as one of the most significant challenges of the 21st century and its effects are being felt worldwide Both domestic and international legislations have been inadequate in mitigating the impact of military activities This book provides details of the environmental destruction wreaked during international and non international armed conflicts and argues that the existing legal regime for the protection of the environment during armed conflict requires substantial modification It puts forward the view that though it is inconceivable to impose an absolute ban on environmental damage during military operations strengthening and clarifying the existing laws protecting the environment in times of conflict and enforcing environment friendly practices among military forces could go a long way in protecting natural assets of our earth
