**Nuclear Ambush** Earl H. Voss, 2013-07      Kennedy, Khrushchev and the Test Ban Glenn T. Seaborg, 2023-11-15 This is one of the most important books to come from a university press within the last year Seaborg Nobel Prize laureate was chairman of the old Atomic Energy Commission AEC when the treaty was negotiated With a decent time interval now past he has opened the detailed diary he kept during his AEC tenure Together with auxiliary materials including interviews with other participants he has now written an incisive account of events leading up to the treaty and of the negotiations and their successful conclusion Christian Science Monitor Drawn from Seaborg's personal journal this book focuses on Kennedy's quest for a comprehensive test ban and on why despite some near misses this glittering prize which carried with it the opportunity to arrest the viciously spiralling arms race eluded our grasp More than a memoir the book draws upon documents and observations of other key participants It also provides insights into Kennedy and his Administration as well as giving us the substance of the nuclear test ban debate Mr Seaborg is refreshingly fair in his assessment of the merits and failures of the limited treaty that Kennedy achieved New York Times A detailed and absorbing history of what seems in retrospect the innocent and halcyon days of nuclear arms control Seaborg rightly lays claim to having been an insider in the test ban negotiations and his first person account benefits from close friendship with other Kennedy insiders As might be expected the book is most interesting for the light it throws upon the thoughts and actions of Kennedy a surprise is its insight reflected through the eyes of Kennedy and Harriman into the personality of Khrushchev Implicit in Seaborg's portrait of Khrushchev is a view which perhaps had some currency in the Kennedy administration but more recently seems to have fallen out of vogue that it is possible to deal with the Russians Washington Post This is one of the most important books to come from a university press within the last year Seaborg Nobel Prize laureate was chairman of the old Atomic Energy Commission AEC when the treaty was negotiated With a decent time interval now past      **Eisenhower, Science Advice, and the Nuclear Test-Ban Debate, 1945-1963** Benjamin P. Greene, 2007 Based on extensive research in government archives and private papers this book analyzes the secret debate within the Eisenhower administration over the pursuit of a nuclear test ban agreement In contrast to much recent scholarship this study concludes that Eisenhower strongly desired to reach an accord with the Soviet Union and the United Kingdom to cease nuclear weapons testing For Eisenhower a test ban would ease Cold War tensions slow the nuclear arms race and build confidence toward disarmament however he faced continual resistance from his early scientific advisers most notably Lewis L Strauss and Edward Teller Extensive research into previously unavailable government archival sources and collections of private manuscripts reveals the manipulative acts of test ban opponents and other factors that inhibited Eisenhower's actions throughout his presidency Meticulously analyzed these sources underscore Eisenhower's dependence on the counsel of his science advisors such as Strauss James R Killian and George B Kistiakowsky to determine the course he pursued in regard to several components of his national security

strategy In addition to its comprehensive analysis of the test ban debate this book makes important contributions to the scholarly literature assessing Eisenhower's leadership and his approach to arms control

**Brotherhood of the Bomb** Gregg Herken, 2013-08-13 The scientists who made the nuclear bomb are the focus of this detailed engrossing history of one of the greatest scientific discoveries of the 20th century Publishers Weekly The story of the twentieth century is largely the story of the power of science and technology Within that story is the incredible tale of the human conflict between Robert Oppenheimer Ernest Lawrence and Edward Teller the scientists most responsible for the advent of weapons of mass destruction The story of these three men builders of the atomic and hydrogen bombs is fundamentally about loyalty to country to science and to each other and about the wrenching choices that had to be made when these allegiances came into conflict In *Brotherhood of the Bomb* Gregg Herken gives us the behind the scenes account based upon a decade of research interviews and newly released Freedom of Information Act and Russian documents
