**Nuclear Catholics and Other Essays** James Munro Cameron, 1989      Nuclear Catholics and Other Essays James M. Cameron,      *Nuclear Catholics and Other Essays* James Munro Cameron, 1989      **The End of Ethics in a Technological Society** Lawrence E. Schmidt, Scott Marratto, 2008-02-06 Lawrence Schmidt and Scott Marratto challenge modern liberal ethics arguing that there is no consistent ethical framework to deal with the long range negative consequences of certain technological developments They examine established ethical approaches to such urgent contemporary concerns as environmental degradation nuclear energy high tech militarism and fetal genetic testing showing that the prevailing viewpoint valorizes autonomy above all other goods and considers technological advances as mere extensions of the range of human freedoms Modern ethics thus fails to take into account the moral intuition that some possibilities in the realm of techno science simply ought not to be pursued A comprehensive assessment of modern western society's commitment to technological progress **The End of Ethics in a Technological Society** presents a convincing argument in favour of a post liberal approach one that rejects the ideology of progress supports caution and accepts limitation      Social Ethics in the Making Gary Dorrien, 2011-04-06 In the early 1880s proponents of what came to be called the social gospel founded what is now known as social ethics This ambitious and magisterial book describes the tradition of social ethics one that began with the distinctly modern idea that Christianity has a social ethical mission to transform the structures of society in the direction of social justice Charts the story of social ethics the idea that Christianity has a social ethical mission to transform society from its roots in the nineteenth century through to the present day Discusses and analyzes how different traditions of social ethics evolved in the realms of the academy church and general public Looks at the wide variety of individuals who have been prominent exponents of social ethics from academics and self styled public intellectuals through to pastors and activists Set to become the definitive reference guide to the history and development of social ethics Recipient of a CHOICE Outstanding Academic Title for 2009 award      **Theology as an Ecclesial Discipline** J Augustine Di Noia, 2024-07 The practice of theology depends in part on asking the right questions Not any sorts of questions not idle questions nor questions framed entirely by our own experience or the great issues of our times but good theological questions focus the mind of the inquirer on the endlessly intelligible self revelation of God to which the Sacred Scripture bears witness Our own questions and the great questions of our times have a place as long as they are purged of the ideological outlooks that can suppress or obscure the questions that the sacra pagina itself presses upon us Among the essays gathered in **Theology as an Ecclesial Discipline** the first set directs the reader's attention precisely to questions that trace the distinctive features of the nature of theology itself What are the principles and scope of the field of theology as practiced by believers in an ecclesial context Are historical critical methods of exegesis compatible with a properly theological interpretation of the Scriptures How can theology have a place in the academy as an intellectual discipline if the Magisterium seems to limit the scope of its inquiries The second part

considers a range of questions that preoccupy contemporary Protestant and Catholic theologians Can the names Father Son and Holy Spirit be replaced by more inclusive titles in doctrine and liturgy By placing humanity at the center of theological investigation is Christian humanism distinct from secular humanism How can we be guilty of a sin committed by our first ancestors Can the Christian vision of procreative human sexuality survive the cultural onslaught of the sexual revolution The questions in the third part of this book arise from Catholic dialogue with non Christian religions or with other Christian communities or with conceptions of a cosmos in ecological crisis Is there a future for Catholic theology of religions How can people who do not believe in Christ be saved Is the cosmos a safe environment for human beings or alternatively how can the cosmos be protected from human depredation Can the concept of church stretch far enough to encompass Christian communities that see themselves as strictly local and independent bodies [Making Saints](#) Kenneth L.

Woodward,2016-04-26 From inside the Vatican the book that became a modern classic on sainthood in the Catholic Church Working from church documents Kenneth Woodward shows how saint makers decide who is worthy of the church s highest honor He describes the investigations into lives of candidates explains how claims for miracles are approved or rejected and reveals the role politics papal and secular plays in the ultimate decision From his examination of such controversial

candidates as Archbishop Oscar Romero of El Salvador and Edith Stein a Jewish philosopher who became a nun and was gassed at Auschwitz to his insights into the changes Pope John Paul II has instituted Woodward opens the door on a 2 000 year old tradition **The Catholic Periodical and Literature Index** ,2002 *The Frontiers of Catholicism* Gene

Burns,1994-08-17 Discusses ideological changes in the Catholic Church since the early nineteenth century **The Sword of Justice** James A. Barry,1998-10-28 Through an examination of the relationship between ethics and international coercion The Sword of Justice compares the actual practice of the United States to the standards established by the just war framework Historical cases are considered from nuclear deterrence conventional war and humanitarian intervention to covert action economic sanctions and coercive diplomacy analyzed from the perspective of the just war tradition to provide practical tools to improve the moral content of policy decisions An enduring feature of the international system is the use or threat of force The most systematic critique of this practice is found in the just war tradition begun by Augustine and further elaborated by Aquinas This book explores the relationship between ethics and international coercion by presenting historical case studies in which the United States has taken such measures to achieve their goals and by comparing the actual practice of the United States to the standards established by the just war framework Based on the comparison a number of concrete recommendations are made about specific measures that could strengthen the moral content of policy decisions and at the same time meet tests of political feasibility in the American system of government **Morality And Modern Warfare**

**Social Catholicism for the Twenty-First Century?--Volume 1** William F. Murphy,2024-09-12 This first of two volumes introduces the tradition of social Catholicism not only in its earlier realizations but regarding how a contemporary renewal might address the crisis in which constitutional democracies and the postwar liberal order are under assault by populist and even neo fascist movements that could soon usher in a frighteningly dark future unless a broad movement in defense of constitutional democracy quickly arises In this context some of the most influential voices among American Catholics are focused on criticizing liberal democracy on advocating a postliberal order and the establishment of a Catholic integralist state or on insisting that abortion should be the primary sociopolitical concern for Catholics treating these threats to democracy as largely irrelevant This volume shows the rich tradition of social Catholicism and how the Social Doctrine of the Church came to appreciate the key tenets of constitutional democracy As Pope Benedict XVI wrote this social doctrine leads us to take a stand for the common good to take the institutional or political path of charity to be solicitous for the institutions that give structure to the life of society juridically civilly politically and culturally It engages some of the most

influential contemporary Catholic thinkers and argues that they too should recognize the grave threats facing the human family and join in working to defend and renew our constitutional democracy

**The Oxford Encyclopedia of Women in World History** Bonnie G. Smith, 2008 The Encyclopedia of Women in World History captures the experiences of women throughout world history in a comprehensive 4 volume work Although there has been extensive research on women in history by region no text or reference work has comprehensively covered the role women have played throughout world history The past thirty years have seen an explosion of research and effort to present the experiences and contributions of women not only in the Western world but across the globe Historians have investigated women's daily lives in virtually every region and have researched the leadership roles women have filled across time and region They have found and demonstrated that there is virtually no historical social or demographic change in which women have not been involved and by which their lives have not been affected The Oxford Encyclopedia of Women in World History benefits greatly from these efforts and experiences and illuminates how women worldwide have influenced and been influenced by these historical social and demographic changes The Encyclopedia contains over 1 250 signed articles arranged in an A Z format for ease of use The entries cover six main areas biographies geography and history comparative culture and society including adoption abortion performing arts organizations and movements such as the Egyptian Uprising and the Paris Commune women's and gender studies and topics in world history that include slave trade globalization and disease With its rich and insightful entries by leading scholars and experts this reference work is sure to be a valued go to resource for scholars college and high school students and general readers alike
