Nuclear Defence Shaping The Arsenal:

Nuclear Defence Gurmeet Kanwal,2001 This book suggests a comprehensive national security strategy for the nuclear environment recommends a counter value targeting philosophy for a retaliatory Indian nuclear strike and examines whether tactical nuclear weapons would serve any useful purpose **Nuclear Doctrines and Strategies** Mark Fitzpatrick,A. I. Nikitin,Sergei Oznobishchev,2008 Focuses on the overarching importance that nuclear strategies and doctrines continue to play in the modern world and in relations among the leading states **Nuclear Command and Control Norms** Salma Shaheen,2018-09-28 This book offers a new analytical framework for studying nuclear command and control C2 based on a comparative study of four nuclear weapons states NWS The subject of nuclear operations management has long been shrouded in secrecy and whilst the importance of nuclear C2 cannot be disputed there are few academic studies into how and why states develop these systems This volume includes a comparative study of the development of nuclear C2 by four different NWS Britain China India and Pakistan and demonstrates that despite several differences there is a central set of factors that remain constant The analytical framework used in this study identifies key factors that can potentially shape the evolution and stability of nuclear C2 These factors include geostrategic threat environment international norms leadership and control of nuclear operations civil military control The book also analyses the interaction among different stakeholders within the nuclear C2 enterprise It recognises that politicians the military and scientists all have key but different roles to play and the way these stakeholders have learned to co exist with each other is explored This volume offers a set of dynamics that could form a global norm for nuclear C2 serving as a standard for new entrants into the nuclear club This book will be of much interest to students of nuclear proliferation global governance and International Relations in general Indian Nuclear Strategy Sanjay Badri-Maharaj,2019-11-05 This book examines India s nuclear strategy as it confronts the potential threat from both China and Pakistan The potential threats traditional as well as non traditional CBRN threats will be examined as will India s approach to dealing with them India s nuclear arsenal its dual purpose civil military space program and its nascent BMD capability will be explored with a view to informing the reader as to the steps taken by India to confront its nuclear challenges Please note Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka **Nuclear South Asia** Rajesh Rajagopalan,2015-08-12 This dictionary provides a comprehensive and ready guide to the key concepts issues persons and technologies related to the nuclear programmes of India and Pakistan and other South Asian states This will serve as a useful reference especially as the nuclear issue continues to be an important domestic and international policy concern **Pakistan's Nuclear Policy** Zafar Khan,2014-07-17 In May 1998 in reaction to India s nuclear weapons tests Pakistan tested six nuclear weapons Following this the country opted for a policy of minimum deterrence and within a year Pakistan had altered its policy stance by adding the modifier of minimum credible deterrence This book looks at how this seemingly innocuous shift seriously impacted on Pakistan s nuclear policy

direction and whether the concept of minimum has lost its significance in the South Asian region's changed changing strategic environment. After providing a brief historical background exploring why and how Pakistan carried out the nuclear development program, the book questions why Pakistan could not sustain the minimum deterrence that it had conceptualized in the immediate aftermath of the 1998 test. It examines the conceptual/theoretical framework of the essentials of minimum deterrence in order to question whether Pakistan's nuclear policy remained consistent with this as well as to discover the rudimentary factors that are responsible for the inconsistencies with regard to minimum deterrence conceived in this study. The book goes on to look at the policy options that Pakistan had after acquiring the nuclear capability and what the rationale was for selecting minimum deterrence. The book not only highlights Pakistan's deterrent force building but also analyzes closely Pakistan's doctrinal posture of first use option. Furthermore, it examines the policy towards arms control and disarmament and discusses whether these individual policy orientations are consistent with the minimum deterrence. Conceptually providing a deeper understanding of Pakistan's post 1998 nuclear policy, this book critically examines whether the minimum deterrence conceived could be sustained both at the theoretical and operational levels. It will be a useful contribution in the field of Nuclear Policy, Security Studies, Asian Politics, Proliferation, Non-Proliferation Studies, and Peace Studies. This book will be of interest to policy makers, scholars, and students of nuclear policy, nuclear proliferation, and arms control related research. *Indian Defence Review*, *Pakistan's Tactical Nuclear Weapons* Inderjit Panjra, 2018-01-01. Amidst many developments in the constantly evolving Indo-Pak conflict paradigm, the latest and perhaps the most intriguing has been the induction of Tactical Nuclear Weapons (TNWs) by Pakistan. While nuclear sabre rattling is not new to Pakistan's strategy, this time around there seems to be a strong pitch among security analysts to project these as the proverbial Brahmastra in its possession, foreclosing any sort of military retaliatory strike by India. This is significant at a time when sporadic Pak-sponsored terror attacks on Indian soil continue unabated. For the Indian security analysts, this raises some pertinent questions: Is the threat of TNWs credible enough to deter India from launching a suitable military response to a Pakistan-supported terror attack? Does induction of TNWs by Pakistan materially alter the Indo-Pak nuclear balance and consequently the direction any future conflict may assume? What are the response options for India to retain/restore the nuclear as well as overall security balance? This book is an endeavour to find answers to all these. In the process, the author attempts to explore how the two protagonists view nuclear deterrence, what is the relevance of nuclear weapons for both of them, how are the fundamental drivers of the ongoing conflict and the ever-changing dynamics and influences in the region affecting it. Using these parameters and the technical capabilities of TNWs believed to be held by Pakistan, the author constructs five possible scenarios for the foreseeable future. The outcome is interesting as it answers the fundamental question: are Pakistan's TNWs indeed the game-changer they are being touted as, or are we giving the devil more than his due?

Pakistan's Tactical Nuclear Weapon: Conflict Redux Brigadier Gurmeet Kanwal, Dr. Monika Chansoria, 2013-10-15

Tactical Nuclear Weapons TNWs often referred to as battlefield sub strategic or non strategic nuclear weapons usually have a plutonium core and are typically distinct from strategic nuclear weapons Therefore they warrant a separate consideration in the realm of nuclear security The yield of such weapons is generally lower than that of strategic nuclear weapons and may range from the relatively low 0.1 kiloton to a few kilotons Pakistan's quest to acquire tactical nuclear weapons has added a dangerous dimension to the already precarious strategic equation in South Asia The security discourse in the subcontinent revolves around the perennial apprehension of a conventional or sub conventional conflict triggering a chain reaction eventually paving the way for a potential nuclear crisis haunting peace and stability in the region Pakistan believes that the successful testing of the 60 km nuclear capable short range missile Hatf 9 Nasr adds deterrence value to Pakistan's strategic weapons development programme at shorter ranges In paradox the fact remains that this step has further lowered Pakistan's nuclear threshold through the likely use of TNWs The introduction of TNWs into the tactical battle area further exacerbates credibility of their control Pakistan has not formally declared a nuclear doctrine but it is well known that nuclear weapons are its first line of defence The use of TNWs in the India Pakistan case will alter the strategic scenario completely as Pakistan would threaten India with the use of TNWs in the event of New Delhi responding against Islamabad with a conventional strike in reaction to a 26/11 style terrorist attack Pakistan forgets that given its offensive strategic posture and continuing involvement in terror strikes in India it is New Delhi which is confronted with the problem of developing a strategy to counter Pakistan's first strike and proxy war in the light of its declared no first use policy This edited volume attempts to address and decipher complex issues including aspects such as China's WMD collaboration with Pakistan nuclear command and control dynamics within Pakistan overall rationale and implications of TNWs safety and security of nuclear weapons scenarios for nuclear usage India's potential response options and more specifically the technical aspects of the Nasr delivery system

Minimum Deterrence and India's Nuclear Security Rajesh M. Basrur, 2009 In this book the leading authority on India's nuclear program offers an informed and thoughtful assessment of India's nuclear strategy Basrur shows

that the country's nuclear culture is generally in accord with the principle of minimum deterrence but sometimes drifts into a more open ended view *Deterrence and the New Global Security Environment* Ian R. Kenyon, John Simpson, 2013-10-18

This collection of papers rigorously examines the current place of deterrence in international security relations delivering the best of contemporary thinking This is a special issue of the leading journal Contemporary Security Policy It shows how and why nuclear deterrence was the central organizing mechanism for international security relations in the second half of the twentieth century It has been replaced by a new global security environment in which the central role of deterrence both nuclear and otherwise appears to have diminished The Cold War has been succeeded by a new state of play This book will be of interest to students of military and naval history and security studies *Managing India's Nuclear Forces* Verghese

Koithara, 2012-04-16 India is now enmeshed in the deterrence game actively with its traditional adversary Pakistan and potentially with China At the same time it is finding easier access to fissile materials and strategic technologies In order to deal with these developments safely and wisely the nation needs a much more sophisticated and multidisciplinary understanding of the strategic technological operational and cost issues involved in nuclear matters In this important book Indian strategic analyst Verghese Koithara explains and evaluates India's nuclear force management encouraging a broad public conversation that may act as a catalyst for positive change before the subcontinent experiences unthinkable carnage The defense management system of a nuclear power absolutely needs to be sound and thorough In addition to the considerable demands of managing its nuclear forces it also must control conventional forces in a manner that forestalls nuclear escalation of a conflict by either side Expanding and upgrading nuclear forces without enhancing deterrence is dangerous and should be avoided India's nuclear force management system is grafted onto a woefully inadequate overall system of defense management Koithara dissects all of these issues and suggests a way forward drawing on recent developments in deterrence theory around the world **India's Doctrine Puzzle** Ali Ahmed, 2014-09-25 The balance of

power in South Asia is tenuous Neighbouring states with nuclear arsenal pose a serious threat in times of conflict and the danger of escalation into a nuclear holocaust in South are ever present This book locates the change in India's war doctrine at the turn of the century following the Kargil War in 1999 between India and Pakistan It examines how war policy was shaped by the threat posed by India's neighbours and the need for greater strategic assertion It also reveals that this change was forced by the military's need to adapt itself to the nuclear age Finally it raises questions of whether the Limited War doctrine has made India more secure An astute analysis of not only India's military strategy but also of military doctrine in general this book will be valuable to scholars and researchers of defence and strategic studies international relations peace and conflict studies South Asia studies as well as government and military institutions **South Asia's Cold War** Rajesh M. Basrur, 2008-04-28 This book is a groundbreaking analysis of the India Pakistan nuclear confrontation as a form of cold war that is a hostile relationship between nuclear rivals Drawing on nuclear rivalries between similar pairs the work examines the

rise process and potential end of the Cold War between India and Pakistan Aftermath of a Nuclear Attack Anil Chauhan, 2010 Aims to demystify aspects and effects of nuclear weapons so that civil and military defence planners have a reasonable idea about the scale and magnitude of disaster that will follow a nuclear attack As a natural corollary the book examines the type and nature of post attack disaster management operations that may have to be launched following a counter value strike **Changing Dynamics of National Security** Dr. Hemant Kumar Pandey, Akhilesh Dwivedi, Aman Bora, 2021-12-31 The contemporary geopolitical affairs anywhere around the globe directly influence the national security of a state Growing conventional as well as non conventional threats are influencing the policies of the nation both at the national and international levels The book throws light on how the different dimensions of national security are constantly changing in this globalized and modernized world This book focuses on how the 21st century is witnessing the new unconventional menaces like Cyber terrorism Proxy wars Elite capture etc the book also discusses how new threats for Indian interests have emerged in and across physical borders and how these threats are going to be countered The NPT and the Developing Countries Jita Mishra, 2008 India's National Security Satish Kumar, 2017-11-22 The global security environment in the last five years has been characterised by a state of no war no peace among major powers resulting in a state of uncertainty about their national security objectives For instance the US has been concerned about the attitudes of Iran Russia North Korea China and others and yet did not expect a direct military conflict with them On the other hand China has expanded its naval strategy from a mere off shore defence to open seas protection and has called for both defence and offence instead of merely territorial air defence thereby indicating preparedness for the possibility of a military confrontation The major powers have been thus groping for suitable responses to their threat perceptions It is in this kind of a complex and confusing international environment that India as a rising power has been called upon to wade through its strategic partnerships with major powers and nurture friendships with various Asian and African countries This sixteenth volume of India's National Security Annual Review offers indispensable information and evaluation on matters pertaining to national security It undertakes a thorough analysis of the trends to provide a backdrop to India's engagement with various countries The volume also discusses persisting threats from China and Pakistan With contributions from experts from the fields of diplomacy academia and civil and military services the book will be one of the most dependable sources of analyses for scholars of international relations foreign policy defence and strategic studies and political science and practitioners alike
