Nuclear Madness

Nick Lower

Nuclear Madness:

Nuclear Madness Ira Chernus, 1991-02-12 This book builds on Robert Jay Lifton's theory of psychic numbing and takes madness as a guiding metaphor. It shows that public perceptions of the Bomb are a kaleidoscope of ever-changing ideas and images. Recent changes in public awareness only signal new symptoms of this public madness, symptoms unwittingly fostered by the antinuclear movement. Since the newest nuclear images follow the same psychological pattern as their predecessors, they are likely to lead us deeper into nuclear madness. Chernus offers new interpretations of four major theorists in the psychology of religion: Paul Tillich, R. D. Laing, Mircea Eliade, and James Hillman, to trace the roots of nuclear madness back to the onset of modernity when the West gained technological mastery at the price of losing religious imagination and ontological security. The author develops an interpretation of Lifton's own thought as an ontological and religious psychology. Drawing on the work of Eliade and Hillman, he goes on to suggest that madness reflects a repressed desire to transform life by opening up the floodgates of imagination. A conscious cultivation of the play of imagination can lead the way through madness to sanity and peace. But imagination can only respond to the nuclear threat if it is acted out in a new brand of peace activism that blends pragmatic politics with psychological and religious transformation. *Nuclear Madness* Helen

Caldicott, 1994 Nuclear waste dumping has further poisoned our environment and developing nuclear technology in the Third World poses still further risks. **Nuclear Madness** Helen Caldicott, Nancy Herrington, Nahum Stiskin, Menahum Nahum Stiskin, 1980 First published in 1978 Helen Caldicott's *cri du coeur* about the dangers of nuclear power became an instant classic. In the intervening sixteen years much has changed: the Cold War is over, nuclear arms production has decreased, and there has been a marked growth in environmental awareness. But the nuclear genie has not been forced back into the bottle. The disaster at Chernobyl and the incidents at other plants around the world have disproven the image of safe nuclear power. Nuclear waste dumping has further poisoned our environment and developing nuclear technology in the Third World poses still further risks. In this completely revised, updated, and expanded edition, Dr. Caldicott defines for the 1990s the dangers of this madness, including the insidious influence of the nuclear power industry and the American government's complicity in medical experiments using nuclear material, and calls on us to accept the moral challenge to fight against it both for our own sake and for that of future generations. **Nuclear Madness** Ira Chernus, 1991-01-01 This book builds on Robert Jay Lifton's

The Nuclear-Water Nexus Per Hogselius, Siegfried Evens, 2025-07-01 An edited collection that takes a deep dive into the complex interactions between nuclear energy and water Splitting atoms is a water intensive business To operate efficiently and safely a standard nuclear reactor needs around 50 cubic meters 13 000 gallons of water per second equivalent to the flow of a mid sized river or large irrigation canal In *The Nuclear Water Nexus* Per Hogselius and Siegfried Evens bring together 25 authors from 12 countries to explore the resulting entanglements between society technology and nature to show how nuclear energy's dependence on water has shaped the atomic age in decisive ways Water has been the key factor in forging a global nuclear geography as the water needs of nuclear facilities require them to be located near the sea major rivers canals or lakes As an unintended consequence of such locations nuclear facilities have become vulnerable to droughts floods erosion and climate change with much higher stakes than most other energy installations Consequently the wet geography of nuclear energy translates into threats to the wet environment in the form of both radioactive contamination and thermal pollution Water has over the years generated social conflicts and cooperation between nuclear energy and other water intensive activities such as agriculture fisheries navigation military activities hydropower production drinking water supply landscaping leisure and tourism and even fossil fuel extraction This book examines these processes through a set of in depth case studies Contributors Elisabetta Bini Kate Brown Peter Burt Joanna L Dyl Siegfried Evens Carlos Gonzalvo Elizabeth Hameeteman Per Hogselius Sonali Huria Roman Khandozhko Achim Klu ppelberg Maximilian P Lau Sabine Loewe Hannatzsch Ana l Marrec Victor McFarland Jan Henrik Meyer Sarah E Robey Diego Sesma Mart n S Duygu Sever Kumar Sundaram Jonathon Turnbull Thomas Turnbull Mar Rubio Varas Agn s Villette Heather Williams **Filmonomics** André de Palma, Luc Leruth, 2025-04-08 What could movies as diverse as *The Last Samurai* *Cl o* from 5 to 7 or *Dr Strangelove* have in common *Filmonomics* has a simple yet intriguing answer economics as the main driving force of the plot or as the main motivation of the characters actions This book analyses how movie makers use economic and financial motives in their plots or to build their characters Have they done it in line with economic theory Or are they proposing a new angle a new perspective that economists should take note of The authors here do not discuss wages in the film industry or the economics of movies What interests them is the economic motivations underpinning the behaviour of fictional characters in their favourite films They argue that credible movie characters can behave in irrational ways and movie makers occasionally introduce new ideas that economists should take note of A unique contribution this book will be of interest to readers eager

Physicians and the Peace Movement Nick Lewer,2013-09-13 First Published in 1992 This book was written in recognition of the many physicians and other health workers who since the formation of the first peace societies in 1815 have dedicated their lives to make the world a more peaceful and just place to live The intention is to introduce the field to illustrate the main issues and avenues that have motivated individuals and groups to work directly for peace The conclusion draws these threads together and considers some ways in which the health professions may contribute to peace work in the future

The Realities of Reality - Part IV: The Reality Behind Achieving World Peace Fritz Dufour, MBA, DÉSS,2020-04-05 This book is organized in seven chapters Chapter one looks at the origins and the causes of war The chapter argues that war is a consequence of how we as a species have evolved War has both endogenous and exogenous

causes While the former depends on our biology and psychology the latter has to do primarily with international relations Chapter two makes the case for the paradoxical nature of war While war takes lives it is legitimate under certain circumstances For example armed humanitarian interventions are allowed to save lives among local populations at the expense of the oppressors by employing all necessary means ethical or not Chapter three asks if peace among nations is achievable which is the main theme of this book However it does not elaborate on the question entirely Instead it gives sort of a prelude of what will be discussed in the remaining of the book by talking about the concepts of world order and American hegemony arms race and peacebuilding Chapter four builds on three by looking at realism idealism and pacifism in international relations As to pacifism the chapter attempts to answer the question what was the most peaceful time in history Chapter five presents the elements of hope for world peace by considering the role played by the following 1 the United Nations 2 the North Atlantic Treaty Organization NATO 3 the Organization for Security and Cooperation in Europe OSCE 4 the non governmental organizations NGOs 5 the role of nuclear deterrence 6 globalization 7 transnationalism 8 diplomacy 9 sports 10 international cooperation in space exploration 11 the Nobel Prize and 12 the declining of war and violence in modern times On the other hand chapter six presents the opposite argument or the barriers to world peace using the following points 1 the proliferation of nuclear weapons 2 geoeconomics 3 terrorism 4 the global refugee crisis 5 the profitability of arms sales and 6 the profitability of wars It makes an interesting argument especially as to the profitability of wars by showing how the United States first emerged as an imperial and a world power in the 1890s then as the only world s superpower after World War II Finally chapter seven takes a proactive approach by peering into the future of armed conflict which is likely to take place in new environments Cyberspace the littoral choke points near space and increasingly in expanding cities or slums War The chapter concludes with a discussion on the Doomsday Clock a concept stemmed from the uncertainty as to the future of mankind because of armed conflicts and which is a symbol that represents the likelihood of a man made global catastrophe

The Illusion of Progress Alexander Gillespie,2014-05-14 Is sustainable development a charade sold to an increasingly misled public This book presents a wide ranging penetrating critique of sustainability and what it actually means The author argues that despite the rhetoric of socially and environmentally sustainable development and the ever increasing number of legislative environmental policies the real issues such as consumption population growth and equity are either sidestepped or manipulated in international policy and law Analyzing the main areas of concern economic growth market structure trade aid debt security and sovereignty he shows that the entire development structure and the underpinnings of the debate are leading down quite a different path to that intended by sustainability

Women on War Daniela Gioseffi,2003 An international anthology of women s writings from antiquity to the present Freeze! Henry Richard Maar III,2022-01-15 In Freeze Henry Richard Maar III chronicles the rise of the transformative and transnational Nuclear Weapons Freeze Campaign Amid an escalating Cold War that pitted the nuclear arsenal of the United

States against that of the Soviet Union the grassroots peace movement emerged sweeping the nation and uniting people around the world The solution for the arms race that the Campaign proposed a bilateral freeze on the building testing and deployment of nuclear weapons on the part of two superpowers of the US and the USSR That simple but powerful proposition stirred popular sentiment and provoked protest in the streets and on screen from New York City to London to Berlin Movie stars and scholars bishops and reverends governors and congress members and ultimately US President Reagan and General Secretary Gorbachev took a stand for or against the Freeze proposal With the Reagan administration so openly discussing the prospect of winnable and survivable nuclear warfare like never before the Freeze movement forcefully translated decades of private fears into public action Drawing upon extensive archival research in recently declassified materials Maar illuminates how the Freeze campaign demonstrated the power and importance of grassroots peace activism in all levels of society The Freeze movement played an instrumental role in shaping public opinion and American politics helping establish the conditions that would bring the Cold War to an end Final Environmental Impact Statement ,1988 **Why I Believe Jesus Is Coming Back Soon** Eric M Hill, Generation after generation since the Lord s ascension to heaven believed they could or would be the generation to see the Lord return Time proved them wrong What mistake did they make interpreting the signs of the end times And why does the author believe this generation is uniquely qualified to witness the glorious return of Christ Many modern watchmen have accurately noted the greatest uniquely fulfilled sign of this generation to be the return of the Jews to the land of Israel and its miraculous re establishment as a nation They ve also noted the unique fulfillment of the Jews gaining control of Jerusalem These two uniquely fulfilled prophecies are the greatest signs of the soon return of the Lord But they are not the only signs There are a host of other signs that are jumping up and down and waving their arms to be noticed Eric M Hill identifies and insightfully provides original insight into what he calls macro and micro prophetic trends and events These are small and large trends and events that either fulfill prophecy or help create the environment for it to be fulfilled His method of interpreting the signs of the times allows him to distinguish between what he calls prophetic and non prophetic trends and events After reading Why I Believe Jesus Is Coming Back Soon How I Interpret the Signs of the Times you will understand why Eric M Hill is convinced Jesus is coming back soon You will also be equipped to identify and understand prophetic trends and events that point to the second coming of our great God *Special Isotope Separation Project Construction & Operation Using Atomic Vapor Laser Isotope Technology (ID,WA,SC)* ,1988
