information needed to design chemical **Structure Elucidation by Modern NMR** Helmut Duddeck, Wolfgang Dietrich, 2012-12-06 For several years we have been organizing seminars and workshops on the application of modern one and two dimensional NMR methods at the faculty of chemistry in the Ruhr University Bochum FRG and elsewhere addressing researchers and graduate students who work in the field of organic and natural products chemistry In 1987 we wrote a workbook *Strukturaufklärung mit moderner NMR Spektroskopie* Steinkopff Darmstadt FRG 1988 in German language based on our experience in these courses Many of the exercises described therein have been used in such courses and some of them have been shaped by the participants to a great extent The response of readers and discussions with colleagues from many countries encouraged us two years later to produce an English translation in order to make the book accessible to a wider audience Moreover the content has been increased from 20 exercise examples in the German to 23 in English version Now after the rapid development of basic multipulse NMR methods in the early 1980s the avantgarde in modern NMR is concentrating on the invention and optimization of advanced techniques e.g. three dimensional experiments For the beginners however the situation has not changed markedly since the appearance of the first edition of this book Therefore we decided not to add new techniques to this second edition but rather to increase the number of exercises from 23 to 33 the new ones being basically single spectrum problems **Nuclear Magnetic Resonance**, 1989 *NMR in Biological Systems* K.V.R. Chary, Girjesh Govil, 2008-04-08 During teaching NMR to students and researchers we felt the need for a text book which can cover modern trends in the application of NMR to biological systems This book covers the entire area of NMR in Biological Sciences Biomolecules cells and tissues animals plants and drug design As well as being useful to researchers this is an excellent book for teaching a course on NMR in Biological Systems **Nanoscale Magnetic Materials and Applications** J.
