*Nuclear Nightmares* Joseph Cirincione, 2013-11-26 There is a high risk that someone will use by accident or design one or more of the 17 000 nuclear weapons in the world today Many thought such threats ended with the Cold War or that current policies can prevent or contain nuclear disaster They are dead wrong these weapons possessed by states large and small stable and unstable remain an ongoing nightmare Joe Cirincione surveys the best thinking and worst fears of experts specializing in nuclear warfare and assesses the efforts to reduce or eliminate these nuclear dangers His book offers hope in the 1960s twenty three states had nuclear weapons and research programs today only ten states have weapons or are seeking them More countries have abandoned nuclear weapon programs than have developed them and global arsenals are just one quarter of what they were during the Cold War Yet can these trends continue or are we on the brink of a new arms race or worse nuclear war A former member of President Obama's nuclear policy team Cirincione helped shape the policies unveiled in Prague in 2009 and as president of an organization intent on reducing nuclear threats he operates at the center of debates on nuclear terrorism new nuclear nations and the risks of existing arsenals From Energy Dreams to Nuclear Nightmares Horace Herring, 2005 This book challenges the existing histories and explanations for the growth of the anti nuclear power movement in the United Kingdom from 1955 to 1979 Arguing that opposition to nuclear power emerged in the 1970s because of the concerns of a minority of people about the dangers of atomic energy based on the ecological messages contained in bestselling science fiction novels from the late 1940s to mid 1960s Showing how a minority of the 1960s underground press blended old conservation ideas with counterculture styles to create new radical groups such as Friends of the Earth this analysis also seeks to answer questions such as Why an anti nuclear power movement instead of an anti coal or anti asbestos movement What was it about nuclear power that generated such opposition its environmental impact its cost its

prospects or its symbolism and Could wind power in the 21st century face the same forces that opposed nuclear power 30 years ago     Nightmares Alex Lukeman,2000 Lukeman delves into nightmares examining causes such as illness medications stress and trauma and presents simple practical processes for dealing with terrifying dreams     **Nightmare Movies** Kim Newman,2011-04-18 Now over twenty years old the original edition of Nightmare Movies has retained its place as a true classic of cult film criticism In this new edition Kim Newman brings his seminal work completely up to date both reassessing his earlier evaluations and adding a second part that assess the last two decades of horror films with all the wit intelligence and insight for which he is known Since the publication of the first edition horror has been on a gradual upswing and taken a new and stronger hold over the film industry Newman negotiates his way through a vast back catalogue of horror charting the on screen progress of our collective fears and bogeymen from the low budget slasher movies of the 60s through to the slick releases of the 2000s in a critical appraisal that doubles up as a genealogical study of contemporary horror and its forebears Newman invokes the figures that fuel the ongoing demand for horror the serial killer the vampire the werewolf the zombie and draws on his remarkable knowledge of the genre to give us a comprehensive overview of the modern myths that have shaped the imagination of multiple generations of cinema goers Nightmare Movies is an invaluable companion that not only provides a newly updated history of the darker side of film but a truly entertaining guide with which to discover the less well trodden paths of horror and re discover the classics with a newly instructed eye     *Nuclear Rites* Hugh Gusterson,1996-11-29 An extremely important work It demonstrates the power that ethnographic analysis can have when directed at an examination of our own society s central nervous system Faye Ginsburg author of Contested Lives Essential reading for anyone trying to understand what Cold War science was in all its cultural aspects and what this same science now in transformation might yet be George E Marcus co editor of The Traffic in Culture     Nuclear Deterrence in the 21st Century Thérèse Delpech,2012-03-28 Deterrence remains a primary doctrine for dealing with the threat of nuclear weapons in the 21st century The author reviews the history of nuclear deterrence and calls for a renewed intellectual effort to address the relevance of concepts such as first strike escalation extended deterrence and other Cold War era strategies in today s complex world of additional superpowers smaller nuclear powers and nonstate actors     **The Laws of War** Michael Howard,George J. Andreopoulos,Mark R. Shulman,Michael Eliot Howard,1994-01-01 This book explores not only the formal constraints on the conduct of war throughout Western history but also the unwritten conventions about what is permissible in the course of military operations Ranging from classical antiquity to the present eminent historians discuss the legal and cultural regulation of violence in such areas as belligerent rights the treatment of prisoners and civilians the observing of truces and immunities the use of particular weapons siege warfare codes of honor and war crimes The book begins with a general overview of the subject by Michael Howard The contributors then discuss the formal and informal constraints on conducting war as they existed in classical antiquity the age of chivalry early modern Europe colonial America and the age of

Napoleon They also examine how these constraints have been applied to wars at sea on land and in the air planning for nuclear war and national liberation struggles in which one of the participants is not an organized state The book concludes with reflections by Paul Kennedy and George Andreopoulos on the main challenges facing the quest for humanitarian norms in warfare in the future      **State of Doom** Barry Scott Zellen,2011-12-15      **Chain Reactions** Lucy Jane

Santos,2024-11-05 Tracing uranium's past and how it intersects with our understanding of other radioactive elements Chain Reactions aims to enlighten readers and refresh our attitudes about the atomic world Chain Reactions looks at the fascinating often forgotten stories that can be found throughout the history of uranium From glassworks to penny stocks from medicines to atomic weapons from something to be feared to a powerful source of energy this global history explores the scientific narrative of this unique element but also shines a light on its cultural and social impact By understanding our nuclear past we can move beyond the ideological opposition to technologies and encourage a more nuanced dialogue about whether it is feasible and desirable to have a genuinely nuclear powered future      *BUTTON UP* Dr. Ronald A.

Hardert,2014-02 This book calls into question building additional nuclear weapons and nuclear power plants given the attendant health problems mainly childhood leukemia thyroid cancer breast and testicular cancer Our inquiry is based on our continuing involvement in the peace and social justice movements and researching oil chemical and nuclear disasters New findings support the social power theories of C Wright Mills Michel Foucault and Jurgen Habermas Data analyzed in our book are based on the experiences of ordinary people attempting to deal with nuclear secrecy and deception      **South Asian**

**Cultures of the Bomb** Itty Abraham,2009-03-26 Since their founding as independent nations nuclear issues have been key elements of nationalism and the public sphere in both India and Pakistan Yet the relationship between nuclear arms and civil society in the region is seldom taken into account in conventional security studies These original and provocative essays examine the political and ideological components of national drives to possess and test nuclear weapons Equal coverage for comparable issues in each country frames the volume as a genuine dialogue across this contested boundary      The Realist

Tradition in International Relations Barry Scott Zellen,2011-08-19 This comprehensive foundation for the study of realism will introduce students in disciplines as varied as philosophy international relations and strategic studies to the majestic breadth of the realist tradition that unifies them all The Realist Tradition in International Relations The Foundations of Western Order introduces the principal theorists who have shaped and defined the realist tradition This once dominant theory of international politics has reemerged to provide a shared foundation for understanding political theory international relations theory and strategic studies The work is comprised of four volumes each focusing upon a distinct period and the pivotal contributors writing in that era Volume 1 State of Hope looks at the classical era when chaos reigned supreme Volume 2 State of Fear goes through the early modern period and the emergence of the modern state Volume 3 State of Awe explores the age of total war with its unprecedented dangers Volume 4 State of Siege examines the present era of insurgency

and asymmetrical conflict A truly monumental work this sweeping study will surely foster a new appreciation of the rich tapestry of realist thought and its continuing relevance to the study of world politics      Cartographies of Danger Mark Monmonier, 2008-04-15 No place is perfectly safe but some places are more dangerous than others Whether we live on a floodplain or in Tornado Alley near a nuclear facility or in a neighborhood poorly lit at night we all co exist uneasily with natural and man made hazards As Mark Monmonier shows in this entertaining and immensely informative book maps can tell us a lot about where we can anticipate certain hazards but they can also be dangerously misleading California for example takes earthquakes seriously with a comprehensive program of seismic mapping whereas Washington has been comparatively lax about earthquakes in Puget Sound But as the Northridge earthquake in January 1994 demonstrated all too clearly to Californians even reliable seismic hazard maps can deceive anyone who misinterprets known fault lines as the only places vulnerable to earthquakes Important as it is to predict and prepare for catastrophic natural hazards more subtle and persistent phenomena such as pollution and crime also pose serious dangers that we have to cope with on a daily basis Hazard zone maps highlight these more insidious hazards and raise awareness about them among planners local officials and the public With the help of many maps illustrating examples from all corners of the United States Monmonier demonstrates how hazard mapping reflects not just scientific understanding of hazards but also perceptions of risk and how risk can be reduced Whether you live on a faultline or a coastline near a toxic waste dump or an EMF generating power line you ignore this book s plain language advice on geographic hazards and how to avoid them at your own peril      Building a Special Relationship Asa McKercher, Michael D. Stevenson, 2024-06-15 Building a Special Relationship offers thoughtful insight into Canadian and American foreign relations during the 1950s when Canada and the United States found new diplomatic footing as allies in the shadow of the Cold War This book shows how the Eisenhower years were crucial in forming the bilateral relationship that currently exists between Canada and the United States Under President Eisenhower and Prime Ministers St Laurent and Diefenbaker policy makers on both sides of the border collaborated with an air of tolerant accommodation on significant issues of the day Despite frequent differences they established frameworks for defence foreign policy economic growth and resource management many of which endure today For scholars and readers of political history international relations and diplomacy Building a Special Relationship makes a compelling case that the Eisenhower era is key to understanding the ongoing bond between these two nations      *Better Safe Than Sorry* Michael Krepon, 2009-01-02 In 2008 the iconic doomsday clock of the Bulletin of the Atomic Scientists was set at five minutes to midnight two minutes closer to Armageddon than in 1962 when John F Kennedy and Nikita Khrushchev went eyeball to eyeball over missiles in Cuba We still live in an echo chamber of fear after eight years in which the Bush administration and its harshest critics reinforced each other s worst fears about the Bomb And yet there have been no mushroom clouds or acts of nuclear terrorism since the Soviet Union dissolved let alone since 9 11 Our worst fears still could be realized at any time but Michael Krepon argues that

the United States has never possessed more tools and capacity to reduce nuclear dangers than it does today from containment and deterrence to diplomacy military strength and arms control The bloated nuclear arsenals of the Cold War years have been greatly reduced nuclear weapon testing has almost ended and all but eight countries have pledged not to acquire the Bomb Major powers have less use for the Bomb than at any time in the past Thus despite wars crises and Murphy's Law the dark shadows cast by nuclear weapons can continue to recede Krepon believes that positive trends can continue even in the face of the twin threats of nuclear terrorism and proliferation that have been exacerbated by the Bush administration's pursuit of a war of choice in Iraq based on false assumptions Krepon advocates a back to basics approach to reducing nuclear dangers reversing the Bush administration's denigration of diplomacy deterrence containment and arms control As he sees it The United States has stumbled before but America has also made it through hard times and rebounded With wisdom persistence and luck another dark passage can be successfully navigated

*Heart Politics* Fran Peavey, Myra Levy, Charles Varon, 1986 Fran Peavey of the internationally touring Atomic Comics tells of her encounters with elderly tenants facing eviction from their residential hotel with alcoholics and street people longing for self respect with ordinary citizens awakening to the threat of nuclear war with Indians dedicated to cleaning up the Ganges River with prostitutes in Bangkok worried about their children's education with civilians caught up in the tragedy of the Middle East conflict Compassionate thought provoking and extremely funny *Heart Politics* shows us that we can respond to critical issues with humanity and humour

**Conflict And Arms Control** Paul Viotti, 2019-03-08 Management of superpower relations and in particular arms control continue to be among the most pressing issues on the international agenda In a world without central governance states face a security dilemma made critical by the presence of weapons of mass destruction Contributors to this volume address a broad range of concerns in arms control

**The Year Book Of World Affairs 1984** George W Keeton, Georg Schwarzenberger, 2019-08-22 First published in 1984 The final volume The Council of the London Institute of World Affairs has carefully reconsidered the lessons to be drawn from the Institute's record in its first half century and reshaped its plans of activities for the 1980s As in an earlier cold peace era the Council is united in its resolve not to be taken by surprise by any of the contingencies that on a darkening world scene must be anticipated in medium range planning It is thus only in keeping with comparable action taken in earlier phases of the Institute's existence that the Council has decided to suspend the publication of the Year Book after this Volume
