Nuclear Pursuits:

Nuclear Pursuits Ruth Fawcett, 1994-06-06 Born in England in 1908 Lewis earned a doctorate at the Cavendish Laboratory in 1934 and continued his research on nuclear physics there until 1939 During the war he worked on the development of radar and in 1945 became chief superintendent of the Telecommunications Research Establishment at Malvern A year later he agreed to head Canada's fledgling nuclear research facility at Chalk River Ontario where he made his professional home for the next twenty seven years Lewis's drive intelligence and remarkable organizational skills placed him at the forefront of Canada's nuclear program Convinced that nuclear energy could be used economically for generating electricity Lewis fostered a collaboration between Atomic Energy of Canada Limited AECL and Ontario Hydro that led to the development of the CANDU reactor CANDU has proven to be an efficient reactor whose performance compares very favourably with all other power reactors around the world Lewis's efforts in developing this design and his effective support of a strong tradition of basic research are his most important legacies Under his guidance scientists at AECL achieved excellence in a number of fields and the laboratories have maintained those standards to the present Though not every project he promoted came to fruition and he seemed never to recognize the political aspects of the nuclear energy program Lewis's influence on the development of science technology and industry in Canada and abroad was unique and profound His story sheds new light on Canada's postwar science history debates concerning national science policy and growing international scientific collaborations Nuclear Pursuits will be of interest to a wide audience including scientists engineers historians of science and industry and students of postwar Canadian history Pakistan Intelligence, Security Activities and Operations Handbook - Strategic Information and Developments IBP, Inc., 2013-08 Pakistan Intelligence Security Activities Operations Handbook **Nuclear Desire** Shampa Biswas, 2014-09-01 Since its enactment in 1970 the Nuclear Non Proliferation Treaty NPT has become one node of a massive sprawling multibillion dollar regime that is considered essential to slowing the proliferation of nuclear weapons and weapons technology However according to Shampa Biswas these well intentioned efforts to halt the spread of nuclear weapons deflect attention from a hierarchical global nuclear order dominated by powerful states and capitalist interests that benefit from the status quo In Nuclear Desire Biswas proposes that pursuit and production of nuclear power is sustained by this unequal global order whose persistent and daily harmful effects are experienced by some of the most vulnerable bodies around the world Making a compelling case for nuclear abolition she shows that the path to nuclear zero is more successfully traversed through the perspective of postcolonialism and the political economy of injustice rather than through the prism of security In the end the nonproliferation regime maintains a hierarchy of haves and have nots one that reinforces inequalities that run counter to the NPT's broader goal Innovative forcefully argued and long overdue Nuclear Desire moves beyond conventional critiques to give scholars and students of international relations new insights into how a more secure world might simultaneously be more peaceful and just **The**

Age of Hiroshima Michael D. Gordin, G. John Ikenberry, 2020-01-14 A multifaceted portrait of the Hiroshima bombing and its many legacies On August 6 1945 in the waning days of World War II the United States dropped an atomic bomb on the Japanese city of Hiroshima The city's destruction stands as a powerful symbol of nuclear annihilation but it has also shaped how we think about war and peace the past and the present and science and ethics The Age of Hiroshima traces these complex legacies exploring how the meanings of Hiroshima have reverberated across the decades and around the world Michael D Gordin and G John Ikenberry bring together leading scholars from disciplines ranging from international relations and political theory to cultural history and science and technology studies who together provide new perspectives on Hiroshima as both a historical event and a cultural phenomenon As an event Hiroshima emerges in the flow of decisions and hard choices surrounding the bombing and its aftermath As a phenomenon it marked a revolution in science politics and the human imagination the end of one age and the dawn of another The Age of Hiroshima reveals how the bombing of Hiroshima gave rise to new conceptions of our world and its precarious interconnectedness and how we continue to live in its dangerous shadow today

Fear and Insecurity Jonathan G. Leslie, 2022-11-01 To observers of the Iran Israel conflict its vitriolic rhetoric might suggest an ancient hatred between Jews and Muslims a biblical feud dating back hundreds or thousands of years But this rivalry is a far more modern development In this authoritative study Jonathan G

Leslie examines the origins of the conflict Drawing on extensive archival and open source research he concludes that despite the animosity surrounding the Iran Israel relationship the twenty first century s hostilities are not inevitable consequences of these nations history nor of contemporary political events The intensification of tensions has been largely the product of one nation s efforts with Israel viewing Iran as a far greater danger than Iran does Israel Using a novel theoretical approach considering the power of narrative within historical context Leslie outlines how Israel s leaders successfully reimaged their erstwhile ally Iran as an existential threat Former Prime Minister Benjamin Netanyahu took this further employing populist strategies in an attempt to rewrite history depict Iran as a global menace and recruit allies against the JCPOA nuclear deal Fear and Insecurity provides important new insights into the history of the Iran Israel conflict and offers fresh prospects for defusing the tensions threatening both global and regional security

Pakistan Army Weapon Systems Handbook *The Russia-China Axis* Douglas E. Schoen,Melik Kaylan,2014-09-09 The United States is a nation in crisis While Washington s ability to address our most pressing challenges has been rendered nearly impotent by ongoing partisan warfare we face an array of foreign policy crises for which we seem increasingly unprepared Among these none is more formidable than the unprecedented partnership developing between Russia and China suspicious neighbors for centuries and fellow Communist antagonists during the Cold War The two longtime foes have drawn increasingly close together because of a confluence of geostrategic political and economic interests all of which have a common theme of diminishing subverting or displacing American power While America s influence around the world recedes in its military and diplomatic power in its political leverage in its economic might and perhaps most dangerously in the power and appeal of its ideas Russia and China have seen their influence increase From their support for rogue regimes such as those in Iran North Korea and Syria to their military and nuclear buildups to their aggressive use of cyber warfare and intelligence theft Moscow and Beijing are playing the game for keeps Meanwhile America pledged to leading from behind no longer does much leading at all In *The Russia China Axis* Douglas E Schoen and Melik Kaylan systematically chronicle the growing threat from the Russian Chinese Axis and they argue that only a rebirth of American global leadership can counter the corrosive impact of this antidemocratic alliance which may soon threaten the peace and security of the world

ISRAEL'S DIVINE MISSION AGAINST IRAN: How Meticulously Israel Plans To Break Iran's Ayatollah's Neck

Aaron Bernstein, Benjamin Netanyahu Israel s longest serving prime minister emerged from the ashes of the October 7 Hamas massacre with a singular unyielding vision to reshape the Middle East s geopolitical landscape by eradicating the Iranian axis of terror and ensuring Israel s unchallenged security dominance The catastrophic intelligence and military failures of that day which saw over 1 200 Israelis slaughtered and hundreds taken hostage became a catalyst for Netanyahu to recalibrate his strategy pivoting from containment to annihilation of threats Central to his post October 7 doctrine is the

belief that Israel cannot coexist with a nuclear capable Iran or its proxies Hezbollah Hamas and the Houthis and that the Jewish state must act unilaterally if necessary to dismantle Tehran's ring of fire Netanyahu's plan hinges on a three pronged approach decimating Hamas in Gaza to restore deterrence forging unprecedented regional alliances with Sunni Arab states under the banner of countering Iran and preparing for a potential preemptive strike against Iran's nuclear infrastructure His government has accelerated defense partnerships including integrating a U S led Middle East NATO style air defense network into Israel's defense structure and expanding covert operations targeting Iranian nuclear scientists missile engineers and Revolutionary Guard commanders Netanyahu's historical obsession with Iran from his 2012 UN speech brandishing a cartoon bomb to his vehement opposition to the 2015 JCPOA nuclear deal has crystallized into an existential imperative Post October 7 he frames Iran not merely as a sponsor of terrorism but as the architect of a genocidal coalition leveraging proxies to encircle Israel while advancing toward weapons grade uranium enrichment To fracture this axis Israel has intensified shadow war tactics cyberattacks crippling Iranian fuel stations and nuclear facilities drone strikes on IRGC convoys in Syria and assassinations like the 2023 takedown of Seyed Razi Mousavi a senior IRGC logistical intermediary in Damascus Netanyahu's ultimate objective however transcends tactical victories He seeks to realign the region by normalizing ties with Saudi Arabia a process frozen on October 7 but quietly revived through U S brokered talks conditioned on Riyadh joining an anti Iran coalition and accepting Israeli military supremacy Fordow's mountain shielded centrifuges and Natanz's fortified halls would require a complex aerial campaign likely involving hundreds of sorties mid air refueling and bunker buster bombs to penetrate granite and concrete Yet Netanyahu emboldened by Israel's growing self reliance in defense tech and Mossad's global reach appears undeterred His rhetoric echoes Menachem Begin's 1981 Osirak strike framing preemption as a moral duty Domestically he leverages the trauma of October 7 to silence opposition portraying critics as naive to Iran's apocalyptic ambitions Internationally he capitalizes on Arab states fatigue with Tehran's destabilization from Houthi Red Sea attacks to Iraqi militia rocket barrages to position Israel as the region's indispensable guardian Netanyahu's endgame is clear a Middle East where Iran's nuclear program lies in ruins its proxies disarmed and Sunni states integrated into an Israeli led security architecture But his legacy and Israel's survival hinge on eliminating the Iranian threat Until then he warns the October 7 horrors will repeat metastasizing into a nuclear nightmare Whether through diplomacy sabotage or war Netanyahu's unfinished revolution seeks to ensure that Iran's empire of terror never darkens the region again

Rising Star Bates Gill, 2010-10-01

China's diplomatic strategy has changed dramatically since the mid 1990s creating both challenges and opportunities for other world powers Through a combination of pragmatic security policies growing economic clout and increasingly deft diplomacy China has established productive and increasingly solid relationships throughout Asia and around the globe Yet U

S policymakers are still trying to comprehend these critical changes Rising Star provides a coherent framework for understanding China's new security diplomacy and guiding America's China policy Bates Gill has completely updated his original analysis focusing on Chinese policy in three areas regional security mechanisms nonproliferation and arms control and questions of sovereignty and intervention Looking to the future he offers specific recommendations for a balanced and realistic approach that emphasizes what China and the United States have in common rather than what divides them The main arguments and recommendations of the original book continue to hold true and in many respects are more compelling now than ever before given China's continued ascendancy
