Arms Control and Disarmament Agency, 1966 **Frozen Empires** Adrian Howkins, 2016-11-01 Perpetually covered in ice and snow the

mountainous Antarctic Peninsula stretches southward towards the South Pole where it merges with the largest and coldest mass of ice anywhere on the planet. Yet far from being an otherworldly Pole Apart, the region has the most contested political history of any part of the Antarctic Continent. Since the start of the twentieth century, Argentina, Britain, and Chile have made overlapping sovereignty claims, while the United States and Russia have reserved rights to the entire continent. The environment has been at the heart of these disputes over sovereignty, placing the Antarctic Peninsula at a fascinating intersection between diplomatic history and environmental history. In *Frozen Empires*, Adrian Howkins argues that there has been a fundamental continuity in the ways in which imperial powers have used the environment to support their political claims in the Antarctic Peninsula region. British officials argued that the production of useful scientific knowledge about the Antarctic helped to justify British ownership. Argentina and Chile made the case that the Antarctic Peninsula belonged to them as a result of geographical proximity, geological continuity, and a general sense of connection. Despite various challenges and claims, however, there has never been a genuine decolonization of the Antarctic Peninsula region. Instead, imperial assertions that respective entities were conducting science for the good of humanity were reformulated through the terms of the 1959 Antarctic Treaty, and Antarctica's frozen empires remain in place to this day. In arguing for imperial continuity in the region, Howkins counters the official historical narrative of Antarctica, which rests on a dichotomy between bad sovereignty claims and good scientific research. *Frozen Empires* instead suggests that science, politics, and the environment have been inextricably connected throughout the history of the Antarctic Peninsula region and remain so, and shows how political prestige in the guise of conducting science for the good of humanity continues to influence international climate negotiations.

The Ethics of Criticism Tobin Siebers, 2018-03-15 Tobin Siebers asserts that literary criticism is essentially a form of ethics. *The Ethics of Criticism* investigates the moral character of contemporary literary theory, assessing a wide range of theoretical approaches in terms of both the ethical presuppositions underlying the critical claims and the attitudes fostered by the approaches. Building on analyses of the moral legacies of Plato, Kant, Nietzsche, and Freud, Siebers identifies the various fronts on which the concerns of critical theory impinge on those of ethics.

Lessons to be Learned from Non-proliferation Failures and Successes A. I. Nikitin, 2009 Assessing sticks and carrots in the non-proliferation arsenal of the world community, this book compares UN-based and national level sanctions and efforts aimed at reassuring non-proliferation. It deals with the lessons learned or that need to be learned from the concrete regional cases of proliferation or its risks.

Arms Control Kenneth W. Thompson, 1990 Many of the world's most influential policy makers and analysts view arms control as a scientific and technological problem. They tend to ignore the human and qualitative aspects of power. This book shifts the emphasis to elements bound up in the moral, political, and historical lessons of the nuclear age. Non-quantitative factors have been central to studies of national defense and military power since the rise of the modern nation-state system. One purpose of this collection of papers is to redirect attention to the moral, political, and historical lessons that the nuclear age presents. What

most distinguishes the writings of contributors to this volume is their use of certain well established principles and concepts long acknowledged in military and foreign policy analysis

India - From Regional to World Power Ashok Kapur, 2006-04-18 This book provides an in depth account of India's role in world politics at the beginning of the twenty first century The author shows how the approach laid down by Nehru and followed by his successors an approach that included nuclear self restraint the search for friendly relations with Pakistan and China seeking the high ground in moral and diplomatic spheres and giving a lead to the non aligned Third World has been replaced The new more self confident and assertive approach of this book is based on India's growing economic strength and has a more strategic and pro Western orientation Meticulous in approach this book discusses this change shows how it has come about and explores how India's role in world politics might develop going forward This book will be of interest to students and scholars of South Asian studies Asian politics international relations and security studies
