Nuclear radiation: risks and benefits

Edward Pochin

Nuclear Radiation Risks And Benefits

**United States. Congress. Senate.
Committee on Appropriations**

Nuclear Radiation Risks And Benefits:

Nuclear Radiation Sir Edward Eric Pochin,1983 **Nuclear Radiation** Edward Pochin,1983 **Nuclear Radiation** Edward Pochin,1983 **Dose, Benefit, and Risk in Medical Imaging** Lawrence T. Dauer,Bae P. Chu,Pat B. Zanzonico,2018-10-11 This timely overview of dose benefit and risk in medical imaging explains to readers how to apply this information for informed decision making that improves patient outcomes The chapters cover patient and physician perspectives referral guidelines appropriateness criteria and quantifying medical imaging benefits The authors have included essential discussion about radiologic physics in medical imaging fundamentals of dose and image quality risk assessment and techniques for optimization and dose reduction The book highlights practical implementation aspects with useful case studies and checklists for treatment planning Clinicians students residents and professionals in medical physics biomedical engineering radiology oncology and allied disciplines will find this book an essential resource with the following key features Discusses risk benefit dose optimization safety regulation radiological protection and shared informed decision making Covers regulatory oversight by government agencies manufacturers and societies Highlights best practices for improving patient safety and outcomes Gives guidelines on doses associated with specific procedures Uncertainty in Risk Assessment, Risk Management, and Decision Making V.T. Covello,Lester B. Lave,Alan Moghissi,V.R.R. Uppuluri,2013-03-08 The subject of this volume uncertainties in risk assessment and management reflects an important theme in health safety and environmental decision making Most technological hazards are characterized by substantial uncertainty Recent examples include nuclear waste disposal acid rain asbestos in schools carcinogens in food and hazardous waste dealing with such uncertainty is arguably the most difficult and challenging task facing risk assessors and managers today Four primary sources of uncertainty in risk assessment and management can be identified 1 uncertainties about definitions 2 uncertainties about scientific facts 3 uncertainties about risk perceptions and attitudes and 4 uncertainties about values Uncertainties about definitions derive primarily from disagreements about the meaning and interpretation of key concepts such as probability Uncertainties about scientific facts derive primarily from disagreements about failure modes the probability and magnitude of adverse health or environmental consequences cause and effect relationships dose response relationships and exposure patterns Uncertainties about risk perceptions and attitudes derive primarily from disagreements about what constitutes a significant or acceptable level of risk Uncertainties about values derive primarily from disagreements about the desirability or worth of alternative risk management actions or consequences The papers in this volume address each of these sources of uncertainty from a variety of perspectives Reflecting the broad scope of risk assessment and risk management research the papers include contributions from safety engineers epidemiologists toxicologists chemists biostatisticians biologists decision analysts economists psychologists political scientists sociologists ethicists and lawyers

Encyclopedia of Science and Technology Communication Susanna Hornig Priest,2010-07-14 In the academic world the

term science communication refers both to a set of professions such as science journalism and public information work and to an interdisciplinary scholarly research specialization Much of this research is aimed at improving our understanding of the best ways to communicate complex information especially to people who are not scientists Science communication specialists are concerned with giving people useful information about health environment and technology as well as science itself In order to do this we also need to improve our understanding of how people think form opinions and process information Additionally professional practitioners in science communication are engaged in strategic and ethical decisions every day such as How should reporters cover the issue of climate change Should the views of scientists who do not believe that climate change has been caused by human activity be included alongside the views of those who do in order to give a balanced story or does this mislead the public into thinking that both of these positions are equally accepted within the scientific community The Encyclopedia of Science and Technology Communication provides information on the entire range of interrelated issues in this interdisciplinary field in one place along with clear suggestions on where to begin the search for more Geared towards undergraduate and graduate students in journalism communication mass communication and media studies as well as towards working journalists public information officers and public relations specialists this encyclopedia introduces this vast fascinating field while challenging the reader to question assumptions inherent in communication across disciplinary boundaries Key Themes Associations and Organizations Audiences Opinions and Effects Challenges Issues and Controversies Changing Awareness Opinion And Behavior Critical Influences and Events Global and International Aspects Government Agencies US History Philosophy and Sociology of Science Important Figures Journal Publications Key Cases and Current Trends Law Policy Ethics and Beliefs Major Infrastructural Initiatives Practices Strategies and Tools Professional Roles and Careers Public Engagement Approaches Theory and Research Venues and Channels

Technical Books & Monographs United States. Energy Research and Development Administration,1976 *Environmental Health Perspectives* ,1972 **Low-level Radiation** United States. Department of Energy. Radiobiology Textbook Sarah Baatout,2023-09-23 This open access textbook focuses on the various aspects of radiobiology The goal of radiobiological research is to better understand the effects of radiation exposure at the cellular and molecular levels in order to determine the impact on health This book offers a unique perspective by covering not only radiation biology but also radiation physics radiation oncology radiotherapy radiochemistry radiopharmacy nuclear medicine space radiation biology physics environmental and human radiation protection nuclear emergency planning molecular biology and bioinformatics as well as the ethical legal and social considerations related to radiobiology This range of disciplines contributes to making radiobiology a broad and rather complex topic This textbook is intended to provide a solid foundation to those interested in the basics and practice of radiobiological science It is a learning resource meeting the

needs of students scientists and medical staff with an interest in this rapidly evolving discipline as well as a teaching tool with accompanying teaching material to help educators

Technical Books & Monographs Sponsored by the U.S. Atomic Energy Commission U.S. Atomic Energy Commission, **Connecting to the Living History of Radiation Exposure** Jacob Hamblin, Linda M. Richards, 2022-11-14 This book highlights the multiple ways of telling stories of radiation exposure they include stories about Japan Australia the United States the Canadian Arctic and more and they probe the framing of major incidents such as Three Mile Island Chernobyl and Fukushima All the chapters in this book are written by authors who participated in our work at Oregon State University and have benefited from hearing not only from scientists but also from those whose lives were directly affected by the history of radiation exposure The question What is at stake when researching and narrating the histories of radiation exposure is discussed but the book does not reinforce existing frameworks such as legal decisions or government policies but rather highlights what narrative framings accomplish and commit by scrutinizing them with rigorous research varied approaches and above all listening to those whose lives were most affected by exposure Previously published in Journal of the History of Biology Volume 54 issue 1 April 2021 **Communicating about Risks to Environment and Health in Europe** Philip C.R. Gray, Richard M. Stern, Marco Biocca, 2013-04-18 Public experience with risk communication differs greatly from country to country in Europe and there has been little opportunity for the transfer of experience and learning between countries This is especially true for the many new European States including the countries in transition from centralised to market economies This book presents case studies on risk communication One of its unifying concepts is the role of risk communication in the risk management process Technical and philosophical introductions to risk communication and risk management and research in risk communication are given The case studies themselves occupy the central portion of the book each one covering a particular hazard risk or situation seen from a particular point of view The issue of the special circumstances for environmental and health risk communication in central and eastern Europe is also addressed through a separate presentation and discussion of an appropriate case study A different approach to risk communication is taken by examining how it forms part of the risk management process at the local level Research into risk perception a field that forms an important foundation for many aspects of risk communication is summarised and practical guidelines for risk communication are reviewed These include discussions on how to carry out public information programmes and methods for increasing public involvement in risk management decisions *Hearings, Reports and Prints of the Senate Committee on Appropriations* United States. Congress. Senate. Committee on Appropriations, 1972 Hearings United States. Congress. Senate. Committee on Appropriations, 1973 **Risk-Benefit Analysis in Drug Research** J.F. Cavalla, 2012-12-06 The appreciation of risk like the awareness of beauty lies very much in the eyes of the beholder It involves a value judgement and can never be absolute Yet paradoxically modern society is demanding ever greater degrees of safety in the medicines it takes to the extent that nothing short of the total absence of risk will be

tolerated Since 1960 and mainly as a result of the thalidomide tragedy governmental regulation of testing and use of new medicines has grown apace throughout the world It has derived impetus not only from the understandable wish of the public to seek protection but also from the anxiety of bureaucrats and politicians not to be seen to have made mistakes Both these concerns have been inflamed by the recognition of the media that all drugs make news and horror drugs make the best news of all Prior to this time the physician and his cures enjoyed a relatively supportive public It was true that quacks existed and were recognized as such but in the main people wanted to take medicines and expected them to do them good *Global Ethics and Environment* Nicholas Low,2002-09-11 As global capitalism expands and reaches ever further corners of the world practical problems continue to escalate and repercussions become increasingly serious and irreversible These practical problems carry with them equally important and ethical issues *Global Ethics and Environment* explores these ethical issues from a range of perspectives and using a wide range of case studies Chapters focus on the impact of development in new industrial regions the ethical relationship between human and non human nature the application of ethics in different cultural and institutional contexts environmental injustice in the location of hazardous materials and processes the ethics of the impact of a single event Chernobyl on the global community the ethics of transitional institutions This collection will both stimulate debate and provide an excellent resource for wide ranging case study material and solid academic context
