Exotic Nuclei - Exon-2001, Proceedings Of The International Symposium Evgeni A Cherepanov, Yuri Erastovich Penionzhkevich, 2002-05-15 This book is a collection of talks presented at the International Symposium on Exotic Nuclei held at Lake Baikal Russia on 24-28 July 2001. The talks were given by the leading scientists in the physics of exotic nuclei. Among the topics of the Symposium were the following: production and study of properties of nuclei in extreme states: strongly deformed nuclei, highly excited nuclei and nuclei far from the line of stability as well as nuclei having large angular momenta. New results of investigations are presented in the book in particular the data on new nuclei with proton or neutron haloes, on the changes in the shell structure of nuclei near the drip lines and on the structure of exotic nuclei including information on the island of inversion. The latest results on the synthesis of new superheavy elements are also provided and existing detecting devices and accelerators of exotic nuclei as well as future projects for the creation of similar set ups are presented.

Exotic Nuclei and Atomic Masses Juha Äystö, Peter Dendooven, Ari Jokinen, Matti Leino, 2013-11-11 The ENAM2001 Conference was held on July 2-7 2001 at the Rantasipi Aulanko Hotel in Hämeenlinna in southern Finland. The conference was organized by the Department of Physics and the Accelerator Laboratory of the University of Jyväskylä with support from the Physics Departments of the Universities of Helsinki and Turku. This conference Exotic Nuclei and Atomic Masses has now gained the status of a major nuclear physics serial conference. The previous conference was held in Bellaire, Michigan, USA. The conference was first held in 1967 in Lysekil, Sweden, then entitled Conference on Nuclei Far from Stability. ENAM2001 welcomed 270 participants from 34 countries including 17 accompanying persons. The content of the program was selected based on the advice of the International Advisory Committee. The Committee members read and considered 253 submitted abstracts in selecting oral contributions. During the conference week 76 invited and oral talks were given. The rest of the contributions were presented in dedicated poster sessions. Many thanks go to the speakers of oral and poster presentations for their enthusiasm and for the high quality of their work which demonstrated the liveliness of the field. Participation in the lectures was high and contributions from the audience were important towards the success of this conference. The organizers would like to especially thank Cary Davids of Argonne National Laboratory for his comprehensive summary talk which is also included in these Proceedings.

Atomic Masses and Fundamental Constants 4 J. Sanders, 2012-12-06 The Conference on Nuclear Masses and their Determination which was held at the Max Planck Institute in Mainz from 10 to 12 July 1956 resulted in the formation by the International Union of Pure and Applied Physics of a Commission on Atomic Masses and Related Constants Under the auspices of this Commission conferences covering these subjects were held in Hamilton Ontario 12-16 September 1960 in Vienna 15-19 July 1963 and in Winnipeg 28 August-1 September 1967 After the last of these conferences the Commission felt that the position regarding nuclear masses was reasonably good and that as a consequence the fundamental constants should get more emphasis in future conferences For this reason they were very pleased to accept an offer from the National Physical Laboratory to accept the main burden of organizing the Fourth International Conference on Atomic Masses and Fundamental Constants An Organizing Committee was appointed with the members J H Sanders Chairman B W Petley Secretary A Horsfield Treasurer P Dean A H Wapstra They were assisted by a Program Committee consisting of A H Wapstra Chairman E R Cohen A Horsfield W H Johnson Jr J H Sanders J Terrien

Atomic Masses and Fundamental Constants 6 Jerry A. Nolen, 2012-12-06 The Sixth International Conference on Atomic Masses was held in East Lansing Michigan Sept 18-21 1979 The conference was initiated organized and sponsored by the Commission on Atomic Masses and Fundamental Constants of the International Union of Pure and Applied Physics The members of the conference committee are listed below W Benenson Chairman Michigan State University R C Barber University of Manitoba E R Cohen Rockwell International Institute of Chemical Physics V I Goldanskii Moscow J C Hardy Chalk River Canada W H Johnson University of Minnesota E Kashy Michigan State University Orsay France R Klapisch J A Nolen Jr Michigan State University R G H Robertson Michigan State University E Roeckl G S I Darmstadt B N Taylor National Bureau of Standards O Schult IKF Julich A H Wapstra IFO Amsterdam N Zeldes Racah Institute Jerusalem The conference was a little different from the preceding one in Paris 1975 in that the fundamental constant aspects were limited to those directly related to atomic masses The gap is to be filled by the second International Conference on Precision Measurement and Fundamental Constants which is now scheduled for June 1981 in Gaithersburg Maryland Only one of the seven sessions in this conference was devoted to fundamental constant determinations The conference was very strongly supported by the Department of Energy the National Science Foundation and the International Union of Pure and Applied Physics

Giovanni C Bonsignori, Mauro Bruno, Alberto Ventura, Dario Vretenar, 2001-11-09 The Conference Bologna 2000 Structure of the Nucleus at the Dawn of the Century was devoted to a discipline which has seen a strong revival of research activities in the last decade New experimental results and theoretical developments in nuclear physics will certainly make important contributions to our knowledge and understanding of Nature s fundamental building blocks The interest aroused by the Conference among the scientific community was clearly reflected in the large number of participants These represented the most important nuclear physics laboratories in the world The Conference covered five major topics of modern nuclear physics nuclear structure nucleus nucleus collisions hadron dynamics nuclear astrophysics and transdisciplinary and peaceful applications of nuclear science It reviewed recent progress in the field and provided a forum for the discussion of

current and future research projects **Nuclear Science Abstracts** ,1970 **Condensed Matter Nuclear Science - Proceedings Of The 10th International Conference On Cold Fusion** Peter L Hagelstein, Scott R Chubb, 2005-12-09 This volume is a collection of papers from the Tenth International Conference on Cold Fusion attended by most of the important groups around the world that are active in the field New results are presented in the area of excess heat production including observations of excess heat correlation of excess heat and helium and laser stimulation of excess heat Nuclear emissions from metal deuterides are put forth by several groups Observations of transmutation including the Iwamura experiment and others are also discussed Updates on theoretical efforts from the different groups are included as well **Interpretation of Mass Spectra of Organic Compounds** Mynard Hamming, 2012-12-02 Interpretation of Mass Spectra of Organic Compounds outlines the basic instrumentation sample handling techniques and procedures used in the interpretation of mass spectra of organic compounds The fundamental concepts of ionization fragmentation and rearrangement of ions as found in mass spectra are covered in some detail along with the rectangular array and interpretation maps Computerization of mass spectral data is also discussed This book consists of nine chapters and begins with a historical overview of mass spectrometry and a discussion on some important developments in the field along with a summary of interpretation objectives and methods The following chapters focus on instruments ion sources and detectors recording of the mass spectrum and the instrumental and sample variables affecting the mass spectrum sample introduction systems and fragmentation reactions Correlations as applied to interpretations are also considered with emphasis on applications of the branching rule as well as beta bond and alpha bond cleavages Example interpretations calculations data processing procedures and computer programs are included This monograph is intended for organic chemists biochemists mass spectroscopists technicians managers and others concerned with the whys and wherefores of mass spectrometry **Neutron Cross Sections and Technology** David T. Goldman, 1968 *NBS Technical Note* ,1970 **Condensed Matter Nuclear Science - Proceedings Of The 11th International Conference On Cold Fusion** Jean-paul Biberian, 2006-02-15 The International Conference on Condensed Matter Nuclear Science is held annually on a different continent every time This volume documents the proceedings of the 11th conference held in Marseilles France It includes articles that indicate the current position of the condensed matter nuclear science field With an extensive collection of articles this volume is indispensable since very few papers related to this field are published in scientific journals An Advanced Course in Modern Nuclear Physics J.M. Arias, M. Lozano, 2008-01-11 The eld of nuclear physics is entering the 21st century in an interesting and exciting way On the one hand it is changing qualitatively since new experim tal developments allow us to direct radioactive and other exotic probes to target nuclei as well as to sparko extremely energetic nuclear collisions In parallel detector systems are of an impressive sophistication It is di cult to envisage all the discoveries that will be made in the near future On the other hand the app cations of nuclear science and technology are broadening the limits in medicine industry art archaeology and the environmental sciences etc

This implies that the public perception of our field is changing smoothly but drastically in contrast to former times where nuclear weapons and nuclear power plants were the dominant applications perceived by citizens. Both aspects scientific dynamism and popular recognition should lead the field to an unexpected revival. One of the consequences of the former could be that many brilliant students consider nuclear physics as an excellent field in which to acquire professional expertise. Therefore one of the challenges of the international nuclear physics community is to try to make the field attractive. That means simply being pedagogic and enthusiastic. Thus as organisers of an already established summer school our contribution was to put an emphasis in this session on pedagogy and enthusiasm.
