Osiris Gregg Mitman,Michelle Murphy,Christopher Sellers,2004 Osiris Gregg Mitman,Michelle Murphy,Christopher Sellers,2004 **A Companion to American Environmental History** Douglas Cazaux Sackman,2010-02-12 A Companion to American Environmental History gatherstogether a comprehensive collection of over 30 essays that examinethe evolving and diverse field of American environmental history Provides a complete historiography of American environmentalhistory Brings the field up to date to reflect the latest trends andencourages new directions for the field Includes the work of path breaking environmental historians from the founders of the field to contributions frominnovative young scholars Takes stock of the discipline through five topically themedparts with essays ranging from American Indian EnvironmentalRelations to Cities and Suburbs *Histories of Technology, the Environment and Modern Britain* Jon Agar,Jacob Ward,2018-04-09 Histories of Technology the Environment and Modern Britain brings together historians with a wide range of interests to take a uniquely wide lens view of how technology and the environment have been intimately and irreversibly entangled in Britain over the last 300 years It combines for the first time two perspectives with much to say about Britain since the industrial revolution the history of technology and environmental history Technologies are modified environments just as nature is to varying extents engineered Furthermore technologies and our living and non living environment are both predominant material forms of organisation and self organisation that surround and make us Both have changed over time in intersecting ways Technologies discussed in the collection include bulldozers submarine cables automobiles flood barriers medical devices museum displays and biotechnologies Environments investigated include bogs cities farms places of natural beauty and pollution land and sea The book explores this diversity but also offers an integrated framework for understanding these intersections **Toxic Archipelago** Brett L. Walker,2011-07-01 Every person on the planet is entangled in a web of ecological relationships that link farms and factories with human consumers Our lives depend on these relationships and are imperiled by them as well Nowhere is this truer than on the Japanese archipelago During the nineteenth century Japan saw the rise of Homo sapiens industrialis a new breed of human transformed by an engineered industrialized and poisonous environment Toxins moved freely from mines factory sites and rice paddies into human bodies Toxic Archipelago explores how toxic pollution works its way into porous human bodies and brings unimaginable pain to some of them Brett Walker examines startling case studies of industrial toxins that know no boundaries deaths from insecticide contaminations poisonings from copper zinc and lead mining congenital deformities from methylmercury factory effluents and lung diseases from sulfur dioxide and asbestos This powerful probing book demonstrates how the Japanese archipelago has become industrialized over the last two hundred years and how people and the environment have suffered as a consequence **The Lost History of the New Madrid Earthquakes** Conevery Bolton Valencius,2013-09-25 From December 1811 to February 1812 massive earthquakes shook the middle Mississippi Valley collapsing homes snapping large trees midtrunk and briefly

but dramatically reversing the flow of the continent's mightiest river. For decades people puzzled over the causes of the quakes but by the time the nation began to recover from the Civil War the New Madrid earthquakes had been essentially forgotten. In *The Lost History of the New Madrid Earthquakes* Conevery Bolton Valencius remembers this major environmental disaster demonstrating how events that have been long forgotten even denied and ridiculed as tall tales were in fact enormously important at the time of their occurrence and continue to affect us today. Valencius weaves together scientific and historical evidence to demonstrate the vast role the New Madrid earthquakes played in the United States in the early nineteenth century shaping the settlement patterns of early western Cherokees and other Indians heightening the credibility of Tecumseh and Tenskwatawa for their Indian League in the War of 1812 giving force to frontier religious revival and spreading scientific inquiry. Moving into the present Valencius explores the intertwined reasons environmental scientific social and economic why something as consequential as major earthquakes can be lost from public knowledge offering a cautionary tale in a world struggling to respond to global climate change amid widespread willful denial. Engagingly written and ambitiously researched both in the scientific literature and the writings of the time *The Lost History of the New Madrid Earthquakes* will be an important resource in environmental history geology and seismology as well as history of science and medicine and early American and Native American history.

Seizing the Means of Reproduction Claudette Michelle Murphy, 2012-11-26 In *Seizing the Means of Reproduction* M. Murphy's initial focus on the alternative health practices developed by radical feminists in the United States during the 1970s and 1980s opens into a sophisticated analysis of the transnational entanglements of American empire population control neoliberalism and late twentieth century feminisms. Murphy concentrates on the technoscientific means the technologies practices protocols and processes developed by feminist health activists. They argue that by politicizing the technical details of reproductive health alternative feminist practices aimed at empowering women were also integral to late twentieth century biopolitics. Murphy traces the transnational circulation of cheap do it yourself health interventions highlighting the uneasy links between economic logics new forms of racialized governance U.S. imperialism family planning and the rise of NGOs. In the twenty first century feminist health projects have followed complex and discomfiting itineraries. The practices and ideologies of alternative health projects have found their way into World Bank guidelines state policies and commodified research. While the particular moment of U.S. feminism in the shadow of Cold War and postcolonialism has passed its dynamics continue to inform the ways that health is governed and politicized today.

Rubber and the Making of Vietnam Michitake Aso, 2018-04-25 Dating back to the nineteenth century transplantation of a latex producing tree from the Amazon to Southeast Asia rubber production has wrought monumental changes worldwide. During a turbulent Vietnamese past rubber transcended capitalism and socialism colonization and

decolonization becoming a key commodity around which life and history have revolved In this pathbreaking study Michitake Aso narrates how rubber plantations came to dominate the material and symbolic landscape of Vietnam and its neighbors structuring the region's environment of conflict and violence Tracing the stories of agronomists medical doctors laborers and leaders of independence movements Aso demonstrates how postcolonial socialist visions of agriculture and medicine were informed by their colonial and capitalist predecessors in important ways As rubber cultivation funded infrastructural improvements and the creation of a skilled labor force private and state run plantations became landscapes of oppression resistance and modernity Synthesizing archival material in English French and Vietnamese Aso uses rubber plantations as a lens to examine the entanglements of nature culture and politics and demonstrates how the demand for rubber has impacted nearly a century of war and at best uneasy peace in Vietnam
