detailed analysis of a selection of films exploring their contribution to the cinematic geography of London and showing the ways in which feature films have responded to and created changing views of the city She traces London's transformation from imperial capital to global city through the different ways in which the local is imagined in films ranging from Ealing comedies to *Pressure* 1974 as well as through the shifting imagery of the River Thames and the Docks She addresses the role of cinematic genres such as horror and film noir in the constitution of the cinematic city as well as the recurrence of figures such as the cockney the gangster and the housewife Challenging the view that London is not a particularly cinematic city Brunsdon demonstrates that many London set films offer their own meditation on the complex relationships between the cinema and the city
