place and an idea *Collaborative and Distributed Processes in Contemporary Music-Making* Richard Glover,Lauren Redhead,2020-04-09 This volume represents the second proceedings of the Royal Musical Association s RMA Music and as Process Study Group It is not surprising that a large number of the contributors to the Music and as Process Study Group are active practitioners in the performance and composition of contemporary music The collaborations documented here represent the bringing together of disciplines joint work between practitioners who contribute their own specific areas of expertise to a composite creative activity and work that crosses disciplines in order to make a critical comment in each of them In this collection these three types of collaborative work describe an increasing amount of contemporary music practice

In addition to the increasing involvement of practice in research the understanding and prevalence of practice methodologies in the form of practice research has also increased in musicology This volume reflects these concerns through contributions from authors who are all active practitioners in their respective fields of music performance composition improvisation and conducting The diversity of these contributions shows the variety of processes and practices that are currently being undertaken by proponents of the field of contemporary music These essays provide a snapshot of the current collaborative and distributed processes that are employed by today s contemporary music practitioners The chapters contained in this volume reveal the varied nature of the approaches to creativity in music making and the ways that these are distributed across its practitioners during each stage of the development of musical works

[Listen Again](#) David Wulstan, 2015-10-29 How do you tell the key of a piece without looking at a score How do you know when a musical work ended before an audience applauds or a radio announcer returns on air Was there in fact a breakdown of tonality in the nineteenth and twentieth centuries These questions and others are the focus of David Wulstan s Listen Again A New History of Music He also shows where the nuove musiche of the early Baroque era came from and what the two critical but unlinked chords in the middle of Bach s Brandenburg Concerto No III signify Previous literature in music does not properly address these questions and innumerable others In Listen Again Wulstan illustrates how music from Bach to Bart k was far less revolutionary than customarily imagined and that the inversionist doctrine of Rameau and kindred acoustical misconceptions courtesy of Heinrich Schenker and other analysts solve fewer problems than their purveyor claim In Listen Again Wulstan takes to task early theorists who were mostly clerics who ignored non ecclesiastical music and their modern equivalents who consider only the blinding white of the written or printed score whilst ignoring music as heard and interpreted by the ear and brain Instead Wulstan enquires into the musical activities of the common folk to addressing key issues that early and modern theorists have regularly overlooked The book will appeal anyone who has dismissed harmony theory and the like as alien in effect to practical music Readers will find in Listen Again that the true history of music has far more practical relevance for performers than the aridity of music theory coursework demonstrating by example how this work a book about music not as in the case of so

much theoretical work a book about books **Catalog of Copyright Entries** Library of Congress. Copyright Office, 1975
