Several Complex Variables II G.M. Khenkin,A.G. Vitushkin,2012-12-06 Plurisubharmonic functions play a major role in the theory of functions of several complex variables The extensiveness of plurisubharmonic functions the simplicity of their definition together with the richness of their properties and most importantly their close connection with holomorphic functions have assured plurisubharmonic functions a lasting place in multidimensional complex analysis Pluri subharmonic functions first made their appearance in the works of Hartogs at the beginning of the century They figure in an essential way for example in the proof of the famous theorem of Hartogs 1906 on joint holomorphicity Defined at first on the complex plane \mathbb{C}^n the class of subharmonic functions became thereafter one of the most fundamental tools in the investigation of analytic functions of one or several variables The theory of subharmonic functions was developed and generalized in various directions subharmonic functions in Euclidean space \mathbb{R}^n plurisubharmonic functions in complex space \mathbb{C}^n and others Subharmonic functions and the foundations of the associated classical potential theory are sufficiently well exposed in the literature and so we introduce here only a few fundamental results which we require More detailed expositions can be found in the monographs of Privalov 1937 Brelot 1961 and Landkof 1966 See also Brelot 1972 where a history of the development of the theory of subharmonic functions is given **The Neo-Aramaic Dialect of Qaraqosh** Geoffrey Khan,2017-07-03 Containing a detailed grammatical description of the spoken Aramaic dialect of the Christian community in the town of Qaraqosh which lies on the Mosul plain in Northern Iraq this volume also includes a transcription of oral texts recorded in the dialect The grammar is based on extensive fieldwork carried out among native speakers It consists of sections on phonology morphology and syntax There is also a study of semantic fields in the lexicon of the dialect and full glossaries of lexical items This Aramaic dialect has never been described before It is one of the most archaic dialects in group known as

North Eastern Neo Aramaic that contains many features that have not been found in other dialects These include several lexical elements that are not found in earlier literary Aramaic but can be traced back to Akkadian and Sumerian Knowledge of the dialect is now being lost among the younger generations so this volume is an important linguistic record
