How Professors Play the Cat Guarding the Cream Richard M. Huber, 1993-11-12 This book is a must read for every parent who has ever signed a check for tuition every student who has ever wondered where all the distinguished professors are hiding and everyone else who has ever questioned what faculty do with themselves all day In this lucid and engaging account Richard Huber identifies faculty productivity as the major reason why college tuition at America s most prestigious institutions rose at more than twice the rate of inflation throughout the 1980s He argues that at the heart of the productivity issue lies an organization with two competing aims research and teaching The resulting organizational culture majors in genteel delusion Huber raises taboo subjects such as increased and differential faculty teaching loads putting himself at the forefront of the new movement for increased accountability in our colleges And he does so with humor grace and empathy as one who has been inside the university This is controversy with an impish grin

Resources in Education , 1980 *The Case Against the SAT* James Crouse, Dale Trusheim, 1988-03-31 The College Entrance Examination Board and the Educational Testing Service claim that the SAT helps colleges select students helps

college bound students select appropriate institutions and furthers equality of opportunity But does it really Drawing on three national surveys and on hundreds of studies conducted by colleges the authors refute the justifications the College Board and the ETS give for requiring high school students to take the SAT They show that the test neither helps colleges and universities improve their admissions decisions nor helps applicants choose schools at which they will be successful They outline the adverse effect the SAT has on students from nonwhite and low income backgrounds They also question the ability of the College Board and the ETS to monitor themselves adequately The authors do not however recommend abolishing either college admissions testing or the College Board and the ETS Rather they propose dropping the SAT and relying on such already available measures as students high school coursework and grades and they raise the possibility that new achievement tests that measure the mastery of high school courses could be developed to replace the SAT Gender and Fair Assessment Warren W. Willingham, Nancy S. Cole, 2013-12-16 There have been many important changes in the participation of women and men in American society over the past quarter century Tests play a role in those changes by providing evidence of the diverse achievement and proficiency of women and men They aid the learning process and reflect inequalities in opportunity to learn and participate In addition they provide useful information in considering what alternatives in education and work make most sense for individuals and influence views about groups of students educational programs and a wide range of issues For all of these reasons it is important that tests assess fairly and reflect accurately the ways young people are and are not achieving as well as desired The test performance of women and men is a research topic of historical interest and has received much attention in recent years Because of this increased interest there is a great deal of new research and data available The purpose of the study presented in this volume was to review this new information with two objectives in mind to clarify patterns of gender difference and similarity in test performance and related achievements and to see what implications those findings might have for fair assessment and as a corollary examine the assessment process as a possible source of gender differences This study is interested in tests used in education to assess developed knowledge and skill In order to gain a broader view of gender similarity and difference the contributors looked at other types of measures and other characteristics of young women and men Their hope is to contribute to a firmer basis for insuring fairness in tests an objective which is particularly important as the field moves increasingly to new forms of assessment in which there is less experience *Newsletter* ,1979 Race at the Top Natasha Warikoo, 2024-05-20 Introduction good parenting in an age of migration Chasing excellence in the suburbs Tensions over the right way to achieve academic excellence The racial divides of extracurricular excellence emotional well being happiness and status The right way to parent Conclusion the anxieties of parenting and the American Dream **Game On** Susan F. Paterno, 2021-06-15 Director of the Chapman journalism program and mother of four recent college grads Susan F Paterno leads you through the admissions process to help you and your family make the best decision possible How is it possible that Harvard is more

affordable for most American families than their local state university Or that up to half of eligible students receive no financial aid Or that public universities are rejecting homegrown middle and working class applicants and instead enrolling wealthy out of state students College admission has escalated into a high stakes game of emotional and financial survival How is the deck stacked against you And what can you do about it Susan F Paterno a veteran academic and journalist answers these questions and more in Game On Paterno helped her four very different kids navigate the application process to a wide range of colleges paying for their four year educations on a finite budget She incisively decodes the college admission industry the consultants the tutors the rankers the branding companies hawking advantage and arms you with the knowledge you need to make the system work for you You ll learn how to narrow your focus analyze who gets in and why and look for the right financial fit before considering anything else including geography reputation and especially ranking Among the tools and insights in Game On Why forty years of failed free market policies have led to skyrocketing tuition and historic levels of student debt Why applying to college has become a bewildering maze and how to find your way to a successful result Why college costs are more terrifying than you think How to read beyond the rack rate to negotiate the best financial package with the least debt Why merit is a myth but merit aid is essential The difference between family debt and student debt and how to split it A playbook for the Hunger Games of higher education Game On explains the anxiety uncertainty and chaos in college admission explodes the myth of meritocracy exposes the academy s connection to America s widening gap between rich and poor and provides strategies to beat and reform a broken system

The Middle-Class New Deal A. Mechele Dickerson, 2026-01-06 An expansive policy blueprint for meaningfully expanding the middle class for the first time in a century The US middle class was a product of state and federal policies enacted in the wake of the Great Depression But since the 1980s lawmakers have undermined what they once built shredding the social safety net and instituting laws that virtually guarantee downward mobility for all but the most privileged How can we restore what has been lost Rigorous and highly readable *The Middle Class New Deal* breaks down the policies that have decimated working families and proposes reforms to reverse this trend As Mechele Dickerson shows part of the problem is that politicians disingenuously conflate the middle class with the White lower rich Such propaganda hides how state and federal lawmakers consistently favor education labor housing and consumer credit laws that erode the bank accounts of lower and middle income people especially those who are not White and don t have college degrees Weaving together the latest research with the personal stories of Americans struggling to make ends meet Dickerson provides a clarion call for political leaders to enact a bold agenda like the one that created the middle class almost a century ago
