Plays For Living And Learning:

Play and Learning in Early Childhood Settings Ingrid Pramling Samuelsson, Marilyn Flear, 2008-11-14 This book represents the outcome of the joint activities of a group of scholars who were concerned about the lack of international research in play for children from birth to 3 years The authors are members of the Organisation Mondiale pour l'Education Prescolaire OMEP For further information see <http://www.om.org.net> The idea of carrying out a research project internationally was born at the OMEP's World Congress in Melbourne Australia 2004 All member countries were invited and 10 countries decided to participate of which three have withdrawn during the process The reason for this might be that in these countries only one person was working with the project while other seven countries have been working in a team of two or more persons The countries that have carried out research and contributed to this book with a chapter each are Australia Chile China Japan New Zealand Sweden and USA Wisconsin For more information about the participating countries and their corresponding addresses see Appendix I This book project started in Melbourne with a discussion about what is general in early childhood education globally and what is culturally specific The discussion was inspired by one of the keynote speakers Nazhat Shameem 2004 judge in the supreme court in Fiji when she said If we all think we are so different and specific in each culture the role of human rights has no value anymore We formulated three questions

College of Early Childhood Education Norway **Play and Performance** Carrie Lobman, Barbara E. O'Neill, 2011-10-16

Play and Performance offers hope to those lamenting the loss of play in the twenty first century and aims to broaden the understanding of what play is. This volume showcases the work of programs from early childhood through adulthood in a variety of educational and therapeutic settings and from a range of theoretical and practical perspectives. The chapters cover an array of practices that can be seen across the play to performance continuum. Taken together, the myriad ways that play is performance and performance is play become clear, sometimes blurring the need for distinction. The volume provides play advocates, researchers, and practitioners a wealth of practical and theoretical ideas for expanding the use of performance as a tool for creating playful environments where children and adults can create and develop. **Planning for Play,**

Observation, and Learning in Preschool and Kindergarten Gaye Gronlund, 2012-11-16 Play is an important vehicle for learning in the early years. With intentional planning frameworks, this resource provides teachers with tools and strategies to organize and develop curriculum around high level purposeful play. Practical application techniques help teachers create a cycle of planning and observation as they use a play based curriculum to help young children thrive in the classroom. Gaye Gronlund is an early childhood education consultant who trains early childhood educators across the country. She is the author of six books. **Families at Play** Sinem Siyahhan, Elisabeth Gee, 2024-07-02 How family video game play promotes intergenerational communication, connection, and learning. Video games have a bad reputation in the mainstream media. They are blamed for encouraging social isolation, promoting violence, and creating tensions between parents and children. In this book, Sinem Siyahhan and Elisabeth Gee offer another view. They show that video games can be a tool for connection, not isolation, creating opportunities for families to communicate and learn together. Like smartphones, Skype, and social media, games help families stay connected. Siyahhan and Gee offer examples. One family treats video game playing as a regular and valued activity and bonds over Halo. A father tries to pass on his enthusiasm for Star Wars by playing Lego Star Wars with his young son. Families express their feelings and share their experiences and understanding of the world through playing video games like The Sims, Civilization, and Minecraft. Some video games are designed specifically to support family conversations around such real world issues and sensitive topics as bullying and peer pressure. Siyahhan and Gee draw on a decade of research to look at how learning and teaching take place when families play video games together. With video games, they argue, the parents are not necessarily the teachers and experts; all family members can be both teachers and learners. They suggest video games can help families form, develop, and sustain their learning culture, as well as develop skills that are valued in the twenty first century workplace. Educators and game designers should take note. Young People's Play,

Wellbeing and Learning Dimitra Hartas, 2020-11-21 This book explores the shifting geographies and contexts of children's play and learning. The author examines both free and guided play through the lenses of class, gender, and disability, drawing links between face to face and online interactions. As young people increasingly spend time in virtual environments, it is

important to adjust understandings of how and when they engage with learning The book examines play as a continuum of activities and peer interactions interrogating what it takes to bridge the gap between academic and wellbeing goals for children with disabilities and disadvantage as well as those at the intersection with other markers of difference e g gender and race It will be of interest and value to scholars of play and education as well as those working with disabled or disadvantaged children
