Pleasure Zones David Bell, Jon Binnie, Ruth Holliday, Robyn Longhurst, Robin Peace, 2001-07-01 How does a subculture appropriate space within the dominant culture What is the city's relationship to the body Geographers from England and New Zealand apply queer theory in their consideration of the human body as a vehicle for understanding relationships between people and place These provocative essays examine the body as an entity constricted by gender sexuality race class nationality and disability They also look at sexual identity as it relates to communities and how humans do gender through regulated practices such as heterosexuality **Pleasure Zones** tackles topics such as the politics of gay men's health the relationship of sex and death to the city erotic urban landscapes and how public policy labels lesbians Each essay attempts to reconcile queer theory and social and cultural theory with the discipline of geography The result is an illuminating and accessible look at the formation of personal and collective identities Building on two decades of geography that recognizes the body as a politicized site of struggle and applying the perspective of the sexual dissident **Pleasure Zones** brings a fascinating variety of human experiences into sharp relief

Space, Place, and Sex Lynda Johnston, Robyn Longhurst, 2010 This accessible and engaging book explores the ways that space place and sex are inextricably linked from the micro to the macro level from the individual body to the globe Drawing on queer feminist gender social and cultural studies Lynda Johnston and Robyn Longhurst highlight the complex nature of sex and sexuality and how they are connected to both virtual and physical spaces and places Their aim is to enrich our understanding of sexual identities and practices whether they be lesbian gay bisexual transsexual asexual queer or heterosexual They show that bodies are defined and connected through media such as television movies ads and the Internet as well as through real places such as homes churches sports arenas city streets beaches and wilderness Drawing on a diverse array of historical and contemporary examples the authors argue convincingly that sexual politics permeate all places and spaces at every level of geographical scale Thus they illustrate sexuality affects the way people live in and interact with space and place as space and place in turn affect people's sexuality

Unplanned Visitors Olivier Vallerand, 2022-03-30 Sexuality and gender have long been influential in understanding the construction of domestic space its meanings often revealing a binary division of private and public female and male By reconstructing the foundation of queer critiques of space and by analyzing the representation of domesticity in contemporary art and architecture **Unplanned Visitors** shows the blurring of private and public that can occur in any domestic space and explores the potential of queer theory for understanding and designing the built environment Olivier Vallerand investigates how queer critiques building on pioneering feminist work question the relation between identity and architecture and

highlight normative constructs underlying domestic spaces He draws out a genealogy of queer space in theoretical discourse in architecture studying projects by Mark Robbins Joel Sanders J Mayer H Elmgreen Dragset Andr s Jaque and MYCKET among others These works blur the traditional borders between architecture and art to emphasize the tensions between private and public and their impact on assumptions about domestic space and family structure The challenges in moving from experimental installations to built environments suggest how designers must acknowledge and respond to the social contexts that shape architecture rethinking how domestic spaces can be designed to allow everyone to better manage the expression of their self identification through their living environments Unplanned Visitors poses a challenge to traditional architectural theory and history but also suggests a renewed and more inclusive ethics whereby designers explicitly address social and political power structures The potential of a queer approach to architectural design history theory and education is precisely to enact a method that creates more inclusive buildings and safer neighbourhoods for everyone Alabaster Cities
