Pleasure Gardens Of Virginia From Jamestown To Virginia:

The Pleasure Gardens of Virginia Peter Martin, 2001 Using a rich assortment of illustrations and biographical sketches Peter Martin relates the experiences of colonial gardeners who shaped the natural beauty of Virginia's wilderness into varied displays of elegance. He shows that ornamental gardening was a scientific, aesthetic, and cultural enterprise that thoroughly engaged some of the leading figures of the period, including the British governors at Williamsburg and the great plantation owners George Washington, Thomas Jefferson, William Byrd, and John Custis. In presenting accounts of their gardening efforts, Martin reveals the intricacies of colonial garden design, plant searches, and experimentation, as well as the problems in adapting European landscaping ideas to local climate. *The Pleasure Gardens of Virginia* also brings to life the social and commercial interaction between Williamsburg and the plantations and examines early American ideas about gracious living. While placing Virginia's garden tradition within the larger context of that of the colonial South, Martin tells a very human story of how this art both influenced and reflected the quality of colonial life. As Virginia grew economically and culturally, the garden became a projection of the gardener's personal identity, as exemplified by the endeavors of Washington at Mount Vernon and Jefferson at Monticello. Martin draws upon both pictorial representations and the findings of modern archaeological excavations in order to recapture the gardens as they existed in colonial times.

He shows that ornamental gardening was a scientific, aesthetic, and cultural enterprise that thoroughly engaged some of the leading figures of the period, including the British governors at Williamsburg and the great plantation owners George Washington, Thomas Jefferson, William Byrd, and John Custis. In presenting accounts of their gardening efforts, Martin reveals the intricacies of colonial garden design, plant searches, experimentation, and the problems in adapting European landscaping ideas to local climate. These writings also bring to life the social and commercial interaction between Williamsburg and the plantations, together with early American ideas about cultured living. While placing Virginia's gardening in the larger context of the colonial South, Martin tells a very human story of how this art both influenced and reflected the quality of colonial life. As Virginia grew economically and culturally, the garden became a projection of the gardener's personal identity, as exemplified by the endeavors of Washington and Jefferson at Mount Vernon and Monticello. In order to recapture the gardens as they existed in colonial times, Martin brings together paintings, drawings, and the findings of modern archaeological excavations. Marter, 2011 Arranged in alphabetical order these 5 volumes encompass the history of the cultural development of America with over 2300 entries **George Washington, Architect** Allan Greenberg, 1999 The building of a nation **A "Topping People"** Emory G. Evans, 2009-04-14 A Topping People is the first comprehensive study of the political economic and social elite of colonial Virginia Evans studies twenty one leading families from their rise to power in the late 1600s to their downfall over one hundred years later These families represented the upper echelons of power serving in the upper and lower houses of the General Assembly often as speaker of the House of Burgesses Their names Randolph Robinson Byrd Carter Corbin Custis Nelson and Page to note but a few are still familiar in the Old Dominion some three hundred years later Their decline was due to a variety of factors economic social and demographic The third generations showed an inability to adapt their business philosophies to the changing economic climate Their inclination was to mirror the English landed gentry living off the income of their landed estates Economic diversification was the norm early on but it became less effective after 1730 Scots traders for example introduced chain stores making it more difficult to continue family run stores And land speculation was no substitute for diversification An increase in population resulted in the creation of new counties which weakened the influence of the Tidewater region These leading families began to spend more than they earned and became heavily indebted to British mercantile firms The Revolution only served to make matters worse and by 1790 these families had lost their political and economic status although their social status remained A Topping People is a thorough and engrossing study of the way families came to gain and eventually lose great power in this turbulent and progressive period in American history *Writing North America in the Seventeenth Century* Catherine Armstrong, 2016-12-05 Since the first permanent English colony was established at Jamestown Virginia in 1607 and accounts of the new world started to arrive back on the English shores English men and women have had a fascination with their transatlantic neighbours and the landscape they inhabit In this excellent study Catherine Armstrong looks at the wealth of literature written by settlers of the new colonies adventurers and commentators back in England that presented this new world to early modern Englanders A vast amount of original literature is examined including travel narratives promotional literature sermons broadsides ballads plays and journals to investigate the intellectual links between mother country and colony Representations of the climate landscape flora and fauna of North America in the printed and manuscript sources are considered in detail as is the changing understanding of contemporaries in England of the colonial settlements being established in both Virginia and New England and how these interpretations affected colonial policy and life on the ground in America The book also recreates the context of the London book trade of the seventeenth century and the networks through which this literature would have been

produced and transmitted to readers This book will be valuable to those with interests in colonial history the Atlantic world travel literature and historians of early modern England and North America in general *The American Lawn* Georges Teyssot,1999 The site of political demonstrations sporting events and barbecues and the object of loving if not obsessive care and attention the lawn is also symbolically tied to our notions of community and civic responsibility serving in the process as one of the foundations of democracy Wild, Tamed, Lost, Revived Diane Flynt,2023-09-18 For anyone who s ever picked an apple fresh from the tree or enjoyed a glass of cider writer and orchardist Diane Flynt offers a new history of the apple and how it changed the South and the nation Showing how southerners cultivated over 2 000 apple varieties from Virginia to Mississippi Flynt shares surprising stories of a fruit that was central to the region for over 200 years Colorful characters abound in this history including aristocratic Belgian immigrants South Carolina plantation owners and multiple presidents each group changing the course of southern orchards She shows how southern apples ranging from northern varieties that found fame on southern soil to hyper local apples grown by a single family have a history beyond the region from Queen Victoria s court to the Oregon Trail Flynt also tells us the darker side of the story detailing how apples were entwined with slavery and the theft of Indigenous land She relates the ways southerners lost their rich apple culture in less than the lifetime of a tree and offers a tentatively hopeful future Alongside unexpected apple history Flynt traces the arc of her own journey as a pioneering farmer in the southern Appalachians who planted cider apples never grown in the region and founded the first modern cidery in the South Flynt threads her own story with archival research and interviews with orchardists farmers cidermakers and more The result is not only the definitive story of apples in the South but also a new way to challenge our notions of history **Lines that Divide** James A. Delle,Stephen A. Mrozowski,Robert Paynter,2000 The division of human society by race class and gender has been addressed by scholars in many of the social sciences Now historical archaeologists are demonstrating how material culture can be used to examine the processes that have erected boundaries between people Drawing on case studies from around the world the essays in this volume highlight diverse moments in the rise of capitalist civilization both in Western Europe and its colonies In the first section the contributors address the dynamics of the racial system that emerged from European colonialism They show how archaeological remains shed light on the institution of slavery in the American Southeast on the treatment of Native Americans by Mormon settlers and on the color line in colonial southern Africa The next group of articles considers how gender was negotiated in nineteenth century New York City in colonial Ecuador and on Jamaican coffee plantations A final section focuses on the issue of class division by examining the built environment of eighteenth century Catalonia and material remains and housing from early industrial Massachusetts These essays constitute an archaeology of capitalism and clearly demonstrate the importance of history in shaping cultural consciousness Arguing that material culture is itself an active agent in the negotiation of social difference they reveal the ways in which historical archaeologists can contribute to both the definition and dismantling of the lines that divide

Mr. Jefferson's Lost Cause Roger G. Kennedy, 2003-03-06 Thomas Jefferson advocated a republic of small farmers free and independent yeomen And yet as president he presided over a massive expansion of the slaveholding plantation system particularly with the Louisiana Purchase squeezing the yeomanry to the fringes and to less desirable farmland Now Roger G Kennedy conducts an eye opening examination of the gap between Jefferson s stated aspirations and what actually happened Kennedy reveals how the Louisiana Purchase had a major impact on land use and the growth of slavery He examines the great financial interests such as the powerful land companies that speculated in new territories and the British textile interests that beat down slavery s many opponents in the South itself Native Americans African Americans Appalachian farmers and conscientious opponents of slavery He describes how slaveholders cash crops first tobacco then cotton sickened the soil and how the planters moved from one desolated tract to the next Soon the dominant culture of the entire region from Maryland to Florida from Carolina to Texas was that of owners and slaves producing staple crops for international markets The earth itself was impoverished in many places beyond redemption None of this Kennedy argues was inevitable He focuses on the character

ideas and ambitions of Thomas Jefferson to show how he and other Southerners struggled with the moral dilemmas presented by the presence of Indian farmers on land they coveted by the enslavement of their workforce by the betrayal of their stated hopes and by the manifest damage being done to the earth itself Jefferson emerges as a tragic figure in a tragic period Mr Jefferson's Lost Cause was a CHOICE Outstanding Academic Title for 2003
