Far Country Franco Moretti, 2019-03-19 The influential and controversial critic takes literary history out of the classroom and into the public In the field of literary history and theory, Franco Moretti is synonymous with innovation The cofounder of the Stanford Literary Lab, he brought quantitative methods into the study of the novel, enabling a distant reading that uses computation to

analyze literary production over centuries But at the same time he was also teaching undergraduates the history of literature Knowing Moretti it s no surprise that he didn t teach the course the accepted way one author after another in a long uninterrupted chain Instead he put an irregular chessboard in front of his students that was too strange to be taken for granted Literary history had become a problem and he offered a solution In Far Country Moretti take these lectures out of the classroom and lets us share in the passion and excitement that comes from radical critique Unconstrained by genre Moretti juxtaposes Whitman and Baudelaire the Western and film noir even Rembrandt and Warhol illuminating each through their opposition With his guidance we revel in the process of transformation the earthquakes that shook the how of artistic form and begin to shape a new view on American culture Bracing in its insight and provocative in its conclusions Far Country is a critical look at the development of American cultural hegemony

*Science and Moral Imagination* Matthew J. Brown,2020-11-17 The idea that science is or should be value free and that values are or should be formed independently of science has been under fire by philosophers of science for decades Science and Moral Imagination directly challenges the idea that science and values cannot and should not influence each other Matthew J Brown argues that science and values mutually influence and implicate one another that the influence of values on science is pervasive and must be responsibly managed and that science can and should have an influence on our values This interplay he explains must be guided by accounts of scientific inquiry and value judgment that are sensitive to the complexities of their interactions Brown presents scientific inquiry and value judgment as types of problem solving practices and provides a new framework for thinking about how we might ethically evaluate episodes and decisions in science while offering guidance for scientific practitioners and institutions about how they can incorporate value judgments into their work His framework dubbed the ideal of moral imagination emphasizes the role of imagination in value judgment and the positive role that value judgment plays in science

*The Biology of Human Behavior* Thomas Rowland,2020-01-17 Why do human beings behave the way they do What governs how they act out their daily lives It is not difficult to provide the traditional argument that it s largely a matter of the culture in which we live a product of the influences of family peers teachers religious leaders the movies we see the books we read and so forth Such behavior often contradicts the independent nature of the human spirit demanding a certain compromise we depend on others for our needs and to obtain these we must behave accordingly Evidence grows however that in addition much of our behavior has its roots in biological processes Such information indicates that whether we like to accept it or not our conduct is often governed by biochemical agents within in the brain an expression of our animalistic ancestral past governed by our genetic inheritance and all beyond the level of our conscious decision making This book addresses a series of such behaviors love jealousy travel suicide etc and examines new found perspectives that speak to a biological component in explaining just why we behave as we do Certainly such scientific insights are limited and currently provide only a narrow insight into human behavior However this information clearly forecasts the coming of a greater appreciation that as members of the animal kingdom we remain biological beings as well as members of a cooperative society
