Plotinus On Nature Contemplation And The One:

Nature, Contemplation, and the One John N. Deck, 1967-12-15 Plotinus has been so highly regarded as a mystic that his importance as a philosopher has sometimes been thrown into eclipse Yet neoplatonic philosophy lives in and through his works indeed his original development of Platonic and Aristotelian themes stands as a kind of summation of Greek philosophy as it first came to be known in the Christian West In *Nature Contemplation and the One* Professor Deck has undertaken a reappraisal of Plotinus thought from the standpoint of a central doctrine in the *Enneads* that of nature as contemplation This new view enables him to show that the producing of the physical world by means of contemplation is an internally consistent doctrine with ramifications throughout the Plotinian view of being causality and the generation of a plural universe by the self subsistent One The result is a systematic account of Plotinus major teachings and a fresh view of their meaning and philosophic importance Professor Deck has appended a new translation of the parts of the *Enneads* which are central to the doctrine of nature as contemplation and his study proceeds by careful reference to the original texts Students philosophers and historians will welcome this important and unusually clear headed approach to a major figure in Western thought

Five Books of Plotinus Plotinus, 1794 **Nature, Contemplation, and the Other One** John N. Deck, 1967 **Five Books of Plotinus, Viz. On Felicity; On the Nature and Origin of Evil; On Providence; On Nature, Contemplation, and the One; and on the Descent of the Soul: Translated from the Greek, with an Introduction ... By T. Taylor. MS. Notes**, 1794 Physics and Philosophy of Nature in Greek Neoplatonism Riccardo Chiaradonna, F. T. Trabattoni, 2009 Traditional scholarship has generally neglected the philosophy of nature in Greek Neoplatonism In the last few decades however this attitude has changed radically Natural philosophy has increasingly been regarded as a crucial aspect of late antique thought Furthermore several studies have outlined the impressive historical legacy of Neoplatonic physics Building on this new interest the ten papers published here concentrate on Neoplatonic philosophy of nature from Plotinus to Simplicius and on its main conceptual features and its relation to the previous philosophical and scientific traditions The papers were presented at a conference sponsored by the European Science Foundation in Castelvecchio Pascoli in June 2006 This volume makes an important contribution to the understanding of Greek Neoplatonism and its historical significance

The Structure of Being International Society for Neoplatonic Studies, 1982-01-01 Neoplatonism has sometimes been seen as a species of mysticism This volume shows that Neoplatonism has on the contrary a characteristic and definable structure It presents the logic of Neoplatonism and carefully distinguishes it from the logic of other forms of philosophy

Autonomous Nature Carolyn Merchant, 2015-08-27 *Autonomous Nature* investigates the history of nature as an active often unruly force in tension with nature as a rational logical order from ancient times to the Scientific Revolution of the seventeenth century Along with subsequent advances in mechanics hydrodynamics thermodynamics and electromagnetism nature came to be perceived as an orderly rational physical world that could be engineered controlled and managed

Autonomous Nature focuses on the history of unpredictability why it was a problem for the ancient world through the Scientific Revolution and why it is a problem for today The work is set in the context of vignettes about unpredictable events such as the eruption of Mt Vesuvius the Bubonic Plague the Lisbon Earthquake and efforts to understand and predict the weather and natural disasters This book is an ideal text for courses on the environment environmental history history of science or the philosophy of science

The Structure of Being and the Search for the Good Dominic O'Meara,2024-10-28 The essays in this book discuss a number of the central metaphysical and ethical themes that engaged the minds of Platonist philosophers during late Antiquity and the early Middle Ages One particular theme is that of the structure of reality with the associated questions of the relations between soul and body and between intelligible and sensible reality and the existence of mathematical objects Other topics relate to evil and beauty political life and its purpose the philosophical search for the absolute Good and how one can speak about this Absolute and have union with it Going from Plato to Eriugena the ways in which Platonist philosophers understood and developed these themes are analysed and compared

Nature Loves To Hide: Quantum Physics And The Nature Of Reality, A Western Perspective (Revised Edition) Shimon Malin,2012-03-22 It is naturally important for any of us to have a correct view of the universe we are in Having realized that the Newtonian world view is untenable this book joins others that are searching for an alternative world view It is unique in using quantum physics to promote this search One aim of the book is to present a lucid exposition of quantum mechanics in terms accessible to the general reader Another aim is to show that realism the belief that the outside world exists from its own side regardless of acts of consciousness and locality the belief that nothing moves faster than light are invalid and should be replaced by a new paradigm according to which the universe is alive A third aim is to show that the thinking of quantum physicists evokes the philosophies of Plato and Plotinus The revised edition will include a conversation between two fictional characters to elucidate the discussion of the meaning of wave functions

Mind in Nature Maria-Teresa Teixeira, Aljoscha Berve, Moirika Reker, 2021-01-27 This collection of essays written by leading Whitehead scholars bridges two important philosophical movements in Western philosophy separated by many centuries Neo Platonism and Process Philosophy It focuses on a variety of topics which can be found in both theories including creativity temporality holism potentiality causality evolution organism and multiplicities They all concur with an integral natural worldview showing that wholeness complexity and indivisibility are prevalent in Nature All in all it brings together Neo Platonism and Process Philosophy through the impact the former had on the latter This volume shows that process philosophy can contribute to an integral worldview as it draws on ancient philosophy setting new paradigms for novel approaches to nature science and metaphysics

 contradictory theories of sight shaped their cosmologies theologies subjectivities genders and discursive worlds and shows

 about identity agency and epistemology *The Phoenix Complex* Michael Marder,2023-07-04 An innovative wide ranging
 consideration of the global ecological crisis and its deep philosophical and theological roots Global crises from melting Arctic
 ice to ecosystem collapse and the sixth mass extinction challenge our age old belief in nature as a phoenix with an infinite
 ability to regenerate itself from the ashes of destruction Moving from antiquity to the present and back Michael Marder

provides an integrated examination of philosophies of nature drawn from traditions around the world to illuminate the theological mythical and philosophical origins of the contemporary environmental emergency From there he probes the contradictions and deadlocks of our current predicament to propose a philosophy of nature for the twenty first century As Marder analyzes our reliance on the image and idea of the phoenix to organize our thoughts about the natural world he outlines the obstacles in the path of formulating a revitalized philosophy of nature His critical exposition of the phoenix complex draws on Chinese Indian Russian European and North African traditions Throughout Marder lets the figure of the phoenix guide readers through theories of immortality intergenerational and interspecies relations infinity compatible with finitude resurrection reincarnation and a possibility of liberation from cycles of rebirth His concluding remarks on a phoenix suffused philosophy of nature and political thought extend from the Roman era to the writings of Hannah Arendt

The Philosophy of Spirituality Heather Salazar, Roderick Nicholls, 2018-11-05 The essays in The Philosophy of Spirituality explore a new field in philosophy Until recently most philosophers in the analytic and continental Western traditions treated spirituality as a religious concept Any non religious spirituality tended to be neglected or dismissed as irremediably vague Here from various philosophical and cultural perspectives it is addressed as a subject of independent interest This is a philosophical response to increasing numbers of spiritual but not religious people inhabiting secular societies and the heightened interaction between a multitude of spiritual traditions in a globalized age A provocative array of approaches African Indigenous Indian Stoic and Sufic perspectives as well as Western analytic and continental views offer fresh insights many articulated by emerging voices Contributors are Mariapaola Bergomi Moses Biney Christopher Braddock Drew Chastain Kerem Eksen Nikolay Milkov Roderick Nicholls Jerry Piven Heather Salazar Eric Steinhart Richard White Mark Wynn and Eric Yang

The Geometry of Christian Contemplation David Albertson, 2025-05-16 The writings of ancient and medieval Christian mystics were rediscovered in the twentieth century and today they are read more widely than ever before But do modern assumptions about religious experience influence how we hear those premodern voices Do we do them justice by thinking of mysticism as interior and ineffable Or can mystical experience intersect with the natural environment and indeed the cosmos which science calculates with precise quantities David Albertson's The Geometry of Christian Contemplation Measure without Measure suggests a fresh approach to the history of mystical theology that is oriented toward exteriority more than interiority and toward the measurable world outside more than the invisible world within The ancient Greek philosopher Plotinus had taught contemplatives to close their eyes and withdraw into the soul Most Christians followed his directions but others dissented In three critical episodes an alternative model of Christian contemplation began to emerge from Dionysius the Areopagite to the Byzantine monks John of Damascus and Theodore the Studite to eccentric humanists in medieval Paris Together these episodes add up to a very different theological aesthetics one that can enliven the modern study of mysticism and correct some of its imbalances For in the centuries before the scientific revolution and

the secularization of nature Christians still saw God in the exterior world not only the interior soul God was not an ineffable and formless Absolute immeasurable as the soul but an infinite Measure who leaves behind geometrical traces in the figures of the world The God who became a human body in the Incarnation not only entered time and matter but also spatial extension and with it the conditions of measure points lines curves shapes planes dimensions and magnitudes Today the wisdom of this counter tradition can strengthen the study of mysticism not only by supplementing our contemporary fascination with negative theology by redefining what it means to name God positively but by suggesting a new connection between Christian mysticism and the hyper measured hyper technologized world that surrounds us **Thinking on**

Thinking Robert M. Berchman, 2021-04-23 Aristotle and Plotinus set the horizon of inquiry thinking is thinking on thinking Discussion of mind meaning and subjectivity begins with the question How is thinking on thinking different from the kind of thinking with which we are familiar The answer is that thinking on thinking is about the presuppositions concepts and problems that generate questions in ancient and modern metaphysics epistemology aesthetics philosophy of mind and philosophy of language Topics examined include the nature of intentionality and meaning identity and relation mind and consciousness self identity and subjectivity which lead into discussions concerning other minds the limits of thought and language and the emergence of aesthetics of the self The effects of thinking on thinking are mapped particularly in parsing problems in ancient modern analytic and phenomenological thought with advocacy of its importance in the present age
