The Plough that Broke the Steppes David Moon, 2013-02-28 This is the first environmental history of Russia's steppes From the early eighteenth century settlers moved to the semi arid but fertile grasslands from wetter forested regions in central and northern Russia and Ukraine and from central Europe By the late nineteenth century they had turned the steppes into the bread basket of the Russian Empire and parts of Europe But there was another side to this story The steppe region was hit by recurring droughts winds from the east whipped up dust storms the fertile black earth suffered severe erosion crops failed and in the worst years there was famine David Moon analyses how naturalists and scientists came to understand the steppe environment including the origins of the fertile black earth He also analyses how scientists tried to understand environmental change including climate change Farmers and the scientists who advised them tried different ways to deal with the recurring droughts planting trees irrigation and cultivating the soil in ways that helped retain scarce moisture More sustainable however were techniques of cultivation to retain scarce moisture in the soil Among the pioneers were Mennonite settlers Such approaches aimed to work with the environment rather than trying to change it by planting trees or supplying more water artificially The story is similar to the Dust Bowl on the Great Plains of the USA which share a similar environment and environmental history David Moon places the environmental story of the steppes in the wider context of the environmental history of European colonialism around the globe

Bronze Age Settlement and Land-Use in Thy, Northwest Denmark (Volume 1 & 2) Jens-Henrik Bech, Kristian Kristiansen, Berit Valentin Eriksen, 2018-06-04 This two volume monograph about the region of Thy in the early Bronze Age provides a high resolution archaeological and ecological model of the organisation of landscape settlements and households during the period 1500 1100 BC Bordering the North Sea to the west and the calmer waters of the Limfjord to the east the region of Thy in Denmark experienced four centuries of intense economic and demographic expansion By combining results from environmental and economic research pollen and palaeo botanical analyses with intensive field surveys and excavations of farmsteads with exceptional preservation it has

been possible to open a window to the changes that transformed Bronze Age society and its environment during a few centuries of exceptional expansion and wealth consumption The results from this interdisciplinary venture made it possible to link together the histories of local farmsteads with the wider regional and global history of the Bronze Age in North western Europe during this period Here is much to feed on for students and researchers of the Bronze Age alike **Travels During the Years 1787, 1788, & 1789** Arthur Young,1794 **Travels During the Years 1787, 1788, & 1789; Undertaken More Particularly with Cultivation, Wealth, Resources, and National Prosperity of the Kingdom of France. Vol. 1.[-2.],1794** **Long Term Hillslope and Fluvial System Modelling** Andreas Lang,Kirsten P. Hennrich,Richard Dikau,2008-01-26 This volume presents a collection of papers given at a Rhine LUCIFS Land use and climate impact on fluvial systems the aim being to bring together researchers with longstanding experience in developing concepts and modelling approaches for long term landscape evolution and scientists involved in more classical studies on the evolution of the Rhine river system It is divided into two parts part one reviews the Rhine river system and gives case studies to demonstrate the types of data that can be extracted from sedimentary archives Part two provides a state of the art review on concepts for fluvial system research as well as modelling the components of large river basins written by leading European scientists in this field Frontiers in Offshore Geotechnics II Susan Gourvenec,David White,2010-10-04 Frontiers in Offshore Geotechnics II comprises the Proceedings of the Second International Symposium on Frontiers in Offshore Geotechnics ISFOG organised by the Centre for Offshore Foundation Systems COFS and held at the University of Western Australia UWA Perth from 8 10 November 2010 The volume addresses current and emerging challenges **The New Review** ,1895 **Frontiers in Offshore Geotechnics** Susan Gourvenec,Mark Cassidy,2005-10-13 This book addresses current and emerging challenges facing those working in offshore construction design and research Keynote papers from leading industry practitioners and academics provide a comprehensive overview of central topics covering deepwater anchoring pipelines foundation solutions for offshore wind turbines site investigation geoh *The Papers of Thomas Jefferson: Retirement Series, Volume 14* Thomas Jefferson,2004 The Retirement Series documents Jefferson s written legacy between his return to private life on 4 March 1809 and his death on 4 July 1826 During this period Jefferson founded the University of Virginia and sold his extraordinary library to the nation but his greatest legacy from these years is the astonishing depth and breadth of his correspondence with statesmen inventors scientists philosophers and ordinary citizens on topics spanning virtually every field of human endeavor From publisher description Palestinian Women and Muslim Family Law in the Mandate Period Elizabeth Brownson,2019-07-01 In this volume Brownson sheds new light on Palestinian Muslim women s agency in shari a courts from the British Mandate period to the present Her extensive archival research on wife initiated maintenance claims divorce and child custody cases deepens our understanding of women s position in the courts demonstrating that Muslim women were and are active participants in their legal affairs Using court registers and

interviews Brownson uncovers a variety of ways women have manipulated the system to their benefit despite its patriarchal bias She also finds that few reforms were implemented during the Mandate period The British were uninterested in improving colonized women s legal status and sought to avoid further antagonizing Palestinians At the same time Palestinians wished to uphold the one indigenous institution they still controlled while both British rule and Zionism threatened their nationalist aspirations Although Palestinian women have had few alternatives to using this male privileged system to redress grievances with their husbands and in laws they continue to resist its injustices every day Brownson finds that women s understanding of family law fundamentals has enabled some to deftly navigate the system however a unified reformed law reflecting society s current needs is required so women can have full access to their rights **Five Thousand Receipts in All the Useful and Domestic Arts** Colin Mackenzie,1825
