The Maya and Their Central American Neighbors Geoffrey E Braswell, 2014-04-16 The ancient Maya created one of the most studied and best known civilizations of the Americas Nevertheless Maya civilization is often considered either within a vacuum by sub region and according to modern political borders or with reference to the most important urban civilizations of central Mexico Seldom if ever are the Maya and their Central American neighbors of El Salvador and Honduras considered together despite the fact that they engaged in mutually beneficial trade intermarried and sometimes made war on each other The Maya and Their Central American Neighbors seeks to fill this lacuna by presenting original research on the archaeology of the whole of the Maya area from Yucatan to the Maya highlands of Guatemala western Honduras and El Salvador With a focus on settlement pattern analyses architectural studies and ceramic analyses this ground breaking book provides a broad view of this important relationship allowing readers to understand ancient perceptions about the natural and built environment the role of power the construction of historical narrative trade and exchange multiethnic interaction in pluralistic frontier zones the origins of settled agricultural life and the nature of systemic collapse

Geochemical Evidence for Long-Distance Exchange Michael D. Glascock, 2002-12-30 Studies of prehistoric exchange of goods provide information about the types of economic interaction social organization or political structures in which prehistoric peoples were engaged Long distance exchange is a special situation where the materials exchanged crossed significant boundaries whether they were geographic social political or otherwise By examining the types and quantities of goods exchanged along with the directions and distances they moved archaeologists are able to examine the dynamic properties of exchange systems i e how they operate and why they undergo change The purpose of this volume is to present a number of case studies of long distance exchange from around the world which demonstrate the use of geochemical analysis of artifacts to find evidence of exchange More important than the use of analytical technique employed or the types of artifacts studied are the interpretations themselves which illustrate that exchange studies are maturing and helping archaeologists to develop more accurate models of exchange
