the middle and upper atmosphere and their significance relative to natural variability *Spectrum Great Britain: Parliament: House of Commons: Culture, Media and Sport Committee, 2011-11-03* This report looks at the way in which commercial spectrum holdings are allocated and regulated This investigation was prompted by the imminence of the next spectrum auction in 2012 Ofcom as spectrum regulator has a very difficult role to play in striking a balance between the needs of consumers spectrum users and service providers and the public purse The report finds that Ofcom is doing a good job in striking this balance and is often having to make very difficult and commercially sensitive judgements Ofcom's consultation on the rules for the next auction has divided opinion among the four mobile network operators but the Committee remarks that they rarely agree on matters concerning spectrum allocation Ofcom proposes that one of the spectrum licences available at the auction will contain a coverage obligation requiring the successful bidder to offer mobile internet coverage to an area in which at least 95% of the population lives The Committee believes that this does not go far enough to hasten the roll out of mobile broadband and recommends that the coverage obligation should be set at 98% and that Ofcom consider applying this obligation to more than one licence The Committee agree with proposals to implement spectrum caps and floors at the auction this being the best viable option to ensure a competitive tension in the spectrum market place Ofcom's remit should be widened in order that the interests of British businesses whose spectrum use plays an important part in the UK economy are best served

### **Mechanisms of Neuronal Migration during**

**Corticogenesis** Chiaki Ohtaka-Maruyama, Kazunori Nakajima, Alessandra Pierani, Nobuaki Maeda, 2016-07-15 The cerebral cortex plays central roles in many higher order functions such as cognition language consciousness and the control of voluntary behavior These processes are performed by the densely interconnected networks of excitatory pyramidal neurons and inhibitory interneurons and the balanced development of these two types of neuron is quite important During cortical development pyramidal neurons and interneurons show quite different migratory behaviors radial migration and tangential migration respectively Pyramidal neurons are generated in the ventricular zone of the dorsal telencephalon and migrate radially along radial glial fibers toward the pial surface forming a six layered cortical structure in an inside out manner On the other hand cortical interneurons are generated in the medial and caudal ganglionic eminence in the ventral telencephalon and follow long tangential migratory paths into the cortex Defects in these migration processes result in abnormalities in the cortical layer structure and neuronal networks which may cause various neurological and psychiatric conditions such as epilepsy and schizophrenia Accordingly besides basic scientific interest elucidation of the mechanism of neuronal migration is essential for understanding the pathogenesis of these diseases This Research Topic includes a series of

articles ranging from the basic mechanism of neocortical development to the malformation and evolution of the neocortex We do hope that the present ebook will further stimulate the interest in the fascinating investigations of neuronal migration and corticogenesis Annales Geophysicae ,2009 **Polysaccharide-Based Nanocomposites for Gene Delivery and Tissue Engineering** Showkat Ahmad Bhawani,Zoheb Karim,Mohammad Jawaaid,2021-06-02 Polysaccharide Based Nanocomposites for Gene Delivery and Tissue Engineering presents quantitative background on new polysaccharide nanocomposites in a clear and logical way highlighting the most exciting applications in gene delivery and tissue engineering and their progress The book focuses on the different types of polysaccharide nanocomposites for gene delivery and tissue engineering and covers polysaccharide hydrogels for tissue engineering and polysaccharide magnetic nanocomposites for gene delivery Chapters cover various nanocomposites presented in twenty one separate chapters This book will be of great interest to all those researching the development and applications of polysaccharide based nanocomposites for modeling As polysaccharide based nanocomposites promise cutting edge applications in gene delivery and tissue engineering with their development at the forefront of modern medicine this book is a welcome title on this exciting science Presents quantitative background on new polysaccharide nanocomposites for advanced medicine Focuses on polysaccharide nanocomposites in relation to gene delivery and tissue engineering Highlights the most exciting leading edge applications in gene delivery and tissue engineering Covers polysaccharide hydrogels for tissue engineering and magnetic nanocomposites for gene delivery Offers a logical and useful presentation of polysaccharide nanocomposites organized first by application and then by nanocomposite
