beautiful epic a truly significant page in the history of medicine a staggering scene in which several actors come into play both fundamentalists and clinical practitioners eager to place all these new developments at the disposal of those suffering from ill health Everyone is passionate about their work be it providing new knowledge or perfecting new therapeutic methods Man has always been fascinated by the possibility of replacing a damaged organ with a healthy one Several attempts have been made over the centuries and some miracles have been reported such as those of Saint Damien and Saint Come as illustrated by Fra Angelico The modern saga however started more modestly on the mouse It is on the mouse that the first tissue group was discovered yet the study of human tissue groups could only be carried out on a human One human must be subjected to the thousands of tests that have enabled us to unravel the extraordinary complexity of the HLA system

Respiratory Infections Lionel Mandell, Mark Woodhead, Santiago Ewig, Antoni Torres, 2006-10-27 The aim of the volume is to provide an authoritative and international treatise bringing together current knowledge in the field of respiratory infection The book will be organised by presentation rather than causative organism a differentiating feature from the existing competition and will be divided into four parts General Issues Community acquired Infections Nosocomial Infections and Respiratory Infection in Immunocompromised Patients Each chapter will conclude with a summary highlighting practical take home messages regarding patient management for the reader It will be highly illustrated including colour plates where appropriate The principal market will be pulmonologists with a specialist interest in this area and infectious disease specialists but that the text will also be of interest to clinical researchers and a useful library reference

HIV/AIDS in the Post-HAART Era John C. Hall, Brian John Hall, Clay J. Cockerell, 2011 The science of the virus and its effects and the clinical approaches to its treatment and transmission prevention are placed in the context of the history and epidemiology of the HIV/AIDS pandemic Each organ system of the body is explored as to manifestations of the disease treatment now and in the future as well as what the disease has taught us about the immune response The science of epidemiology which is so important in allowing for tracking of the disease and potential limitation of transmission is another aspect of AIDS explored in detail The pandemic manifests differently in different parts of the world and the relevance of the volume is enhanced by its international group of contributors No other text provides the historical and epidemiological context of this disease along with an update of diagnosis and treatment The underlying science and epidemiology of AIDS are not neglected so the student or clinician who is treating patients with AIDS can gain a full understanding of HIV/AIDS in individual patients and in their communities
