María Zambrano's Ontology of Exile Karolina Enquist Källgren, 2019-03-26 This book analyzes the exile ontology of Spanish philosopher María Zambrano 1904-1991 Karolina Enquist Källgren connects Zambrano's lived exile and

political engagement with the Spanish Civil War to her poetic reason and argues that Zambrano developed a theory of expressive subjectivity that combined embodiment with the expressive creativity of the human mind The analysis of recurring literary figures and concepts such as new materialism the confession image the ruin the heart and awakening show how a comprehensive argument runs as a thread through her works Further this book situates Zambrano's thought in a larger European philosophical context by showing how Zambrano's poetic reason was directly related to her unconventional exile readings of Martin Heidegger Aristotle Immanuel Kant and Xavier Zubiri among others *Sixth International Conference on Information Technology , Cognitive Creativity and Ontological Dynamism in Negrita Poetry* Victor A. Freedom and Existence Matthew Aaron Tennant,2023-08-07 Is theology a dead corpse or living organism For Uruguayan Jesuit Juan Luis Segundo 1925 1996 theology is dynamic Freedom and existence for central themes Segundo believed that

theology should be transformative in human lives For a theology to be transformative there must be a connection to existence That is it must be existential Yet most scholars have overlooked this assumption in critical analyses of liberation theology This prima facie connection to existence is distinguishable from existentialism as a school of philosophy By showing the significant existential dimension to Segundo s theology assessing his work and contribution to twentieth century theology relates to freedom ecumenism the role of faith in society and the relationship between faith and ideologies *Decolonising Curricula and Pedagogy in Higher Education* Shannon Morreira, Kathy Lockett, Siseko H. Kumalo, Manjeet Ramgotra, 2021-05-31 This book brings together voices from the Global South and Global North to think through what it means in practice to decolonise contemporary higher education Occasionally a theoretical concept arises in academic debate that cuts across individual disciplines Such concepts which may well have already been in use and debated for some time become suddenly newly and increasingly important at a particular historical juncture Right now debates around decolonisation are on the rise globally as we become increasingly aware that many of the old power imbalances brought into play by colonialism have not gone away in the present The authors in this volume bring theories of decoloniality into conversation with the structural cultural institutional relational and personal logics of curriculum pedagogy and teaching practice What is enabled in practice when academics set out to decolonize their teaching spaces What commonalities and differences are there where academics set out to do so in universities across disparate political and geographical spaces This book explores what is at stake when decolonial work is taken from the level of theory into actual practice The chapters in this book were originally published as a special issue of Third World Thematics **Lithium Extraction in Chile** Daniela Soto-Hernández, 2025-07-17 This book explores lithium extraction in Chile as part of the global energy transition unravelling the ontological ecological and economic dimensions behind this type of extractivism A transition away from fossil fuels is urgent in the context of climate change and one of the main challenges so far has been to store the variable energy provided by renewable energy sources Due to its role in the lithium ion batteries that power electric vehicles lithium has been framed as a critical mineral to transit towards low carbon economies Chile is the second lithium exporting country worldwide and while it aims to expand its production the delicate wetland ecosystems and Indigenous territories where lithium comes from face increasing pressure This book looks at the worlds ecologies and economies that are becoming increasingly extracted and the effects of these processes Drawing on the case of extractivism in the Salar de Atacama watershed in the Antofagasta region in Chile and engaging with Indigenous and non Indigenous local communities NGOs state officials companies and lithium workers through a twelve month ethnography the book offers a unique perspective into the contested narratives around what is being extracted and the manifold effects of it By putting the Indigenous cosmovision forward and showing the local experiences with an industry powered by the ongoing energy transition this book connects the notions of interconnection and fragmentation to provide a wider understanding of future challenges where ontologies ecologies and

economies are intertwined The book weaves together different disciplinary strands and takes them forward to show how the solutions based on extractivism are menacing to destroy the marginalized worlds and ecosystems of human and non human communities As such the book not only fills the gaps in current literature but also goes further to rethink the ways in which academics engage with natural resources and how the pluriverse is currently experienced in the Salar de Atacama watershed This book will be of great interest to academics students and environmental advocates studying energy transitions critical minerals anti colonial and indigenous perspectives around development and lithium extraction *Advances in Web*
