Radical Kate Pickert, 2019-10-01 In this powerful and unflinching page turner New York Times a healthcare journalist examines the science history and culture of breast cancer As a health care journalist Kate Pickert knew

the emotional highs and lows of medical treatment well but always from a distance through the stories of her subjects That is until she was unexpectedly diagnosed with an aggressive type of breast cancer at the age of 35 As she underwent more than a year of treatment Pickert realized that the popular understanding of breast care in America bears little resemblance to the experiences of today's patients and the rapidly changing science designed to save their lives After using her journalistic skills to navigate her own care Pickert embarked on a quest to understand the cultural scientific and historical forces shaping the lives of breast cancer patients in the modern age Breast cancer is one of history's most prolific killers Despite billions spent on research and treatments it remains one of the deadliest diseases facing women today From the forests of the Pacific Northwest to an operating suite in Los Angeles to the epicenter of pink ribbon advocacy in Dallas Pickert reports on the turning points and people responsible for the progress that has been made against breast cancer and documents the challenges of defeating a disease that strikes one in eight American women and has helped shape the country's medical culture Drawing on interviews with doctors economists researchers advocates and patients as well as on journal entries and recordings collected over the author's treatment Radical puts the story of breast cancer into context and shows how modern treatments represent a long overdue shift in the way doctors approach cancer and disease itself Journal of the National Cancer Institute ,2005 Current Catalog National Library of Medicine (U.S.), First multi year cumulation covers six years 1965-70 *The New York Times Index* ,2008 *The Journal of Immunology* ,2007 *Atlanta* ,2004-07 Atlanta magazine's editorial mission is to engage our community through provocative writing authoritative reporting and superlative design that illuminate the people the issues the trends and the events that define our city The magazine informs challenges and entertains our readers each month while helping them make intelligent choices not only about what they do and where they go but what they think about matters of importance to the community and the region Atlanta magazine's editorial mission is to engage our community through provocative writing authoritative reporting and superlative design that illuminate the people the issues the trends and the events that define our city The magazine informs challenges and entertains our readers each month while helping them make intelligent choices not only about what they do and where they go but what they think about matters of importance to the community and the region **Her-2** Robert Bazell,Amy Bernstein,1998 The dramatic account of a remarkable new breast cancer drug from its creation to the moving tales of women whose lives it is saving The chief correspondent of NBC News Robert Bazell presents the riveting account of how this drug moved from the lab to the bedside **F & S Index United States Annual** ,2005 **Bibliography of Agriculture** ,1990-04 *Proceedings of the National Academy of Sciences of the United States of America* National Academy of Sciences (U.S.),2007 Her-2 Robert Bazell,2011-04-27 Two years after she underwent a mastectomy and chemotherapy Barbara Bradfield's aggressive breast cancer had recurred and spread to her lungs The outlook was grim Then she took part in Genentech's clinical trials for a new drug Five years later she remains cancer free Her 2 is the biography of Herceptin the drug that provoked dramatic responses

in Barbara Bradfield and other women in the trials and that offers promise for hundreds of thousands of breast cancer patients Unlike chemotherapy or radiation Herceptin has no disabling side effects It works by inactivating Her 2 neu a protein that makes cancer cells grow especially quickly produced by a gene found in 25 to 30 percent of all breast tumors Herceptin caused some patients cancers to disappear completely in others it slowed the progression of the disease and gave the women months or years they wouldn't otherwise have had Herceptin is the first treatment targeted at a gene defect that gives rise to cancer It marks the beginning of a new era of treatment for all kinds of cancers Robert Bazell presents a riveting account of how Herceptin was born Her 2 is a story of dramatic discoveries and strong personalities showing the combination of scientific investigation money politics ego corporate decisions patient activism and luck involved in moving this groundbreaking drug from the lab to a patient's bedside Bazell's deft portraits introduce us to the remarkable people instrumental in Herceptin's history including Dr Dennis Slamon the driven UCLA oncologist who played the primary role in developing the treatment Lily Tartikoff wife of television executive Brandon Tartikoff who tapped into Hollywood money and glamour to help fund Slamon's research and Marti Nelson who inspired the activists who lobbied for a compassionate use program that would allow women outside the clinical trials to have access to the limited supplies of Herceptin prior to FDA approval of the drug And throughout there are the stories of the heroic women with advanced breast cancer who volunteered for the trials risking what time they had left on an unproven treatment Meticulously researched written with clarity and compassion Her 2 is masterly reporting on cutting edge science
