Power Of Identity:

The Power of Identity Claims Dale T. Miller, 2020-10-12 This book draws on research in psychology and behavioral economics to show how striving to live up to our identity claims profoundly affects our daily lives. The author argues the claims we make about who we are and what we stand for powerfully influence us and our social world. Asking questions such as Why do people resist the temptation to cheat when cheating would benefit them greatly and no one would find out? Why do people express different beliefs about climate change when they are first reminded of their political affiliation? Why do people prefer to be compensated for donating blood with cholesterol screening than with money? Miller puts forth a novel and compelling argument regarding how strongly our identity claims affect our daily lives. The book provides explanations for many forms of puzzling behavior such as why people sometimes act against their economic self interest, how they avoid situations that test their moral identities, and how they respond to failures to live up to their moral identities. It paints an intriguing picture of people's investment in their identity claims by showing how they seek opportunities to demonstrate their validity, avoid actions and circumstances that challenge their legitimacy, and employ psychological defenses when others challenge their legitimacy. Based on extensive research in the fields of psychology, economics, and political science, this book is fascinating reading for students and academics interested in identity and the self. It also provides an expanded tool kit for those who seek behavioral change in their organization or community. The Information Age: The power of identity, 1999

Power, Identity, and the Rise of Modern Architecture Koompong Noobanjong, 2003 This dissertation examines the evolution of Western and Modern architecture in Siam and Thailand. It illustrates how various architectural ideas have contributed to the physical design and spatial configuration of places associated with negotiation and allocation of political power, which are throne halls, parliaments, and government and civic structures since the 1850s. **Gender, Identity and the Culture of Organizations** Iris Aaltio-Marjosola, 2002 In particular, this book reflects the growing interest in the organizational identity formation and its implications for individuals and organizational outcomes in terms of gender. Language, Power, and Identity in the Lament Psalms of the Individual Amy C. Cottrill, 2008-05-15 No Marketing Blurb The Effects of Power on Identity Andrea M. Librado, 2016 Despite the recognition that our identities are shaped by our environment, e.g. Erikson 1968, 1980; Hermans 2001; Simon 2004; Vygotsky 1981, etc., there is a dearth of literature on the effects of power on identity. This interdisciplinary exploratory and grounded theory study sought to empirically examine how Haugaard's 2002 macro level six fold typology of conflictual and consensual power applies at the micro level and to explore possible mechanisms between power and identity which in turn may help to bridge the gap between macro and micro levels of understanding of power and identity. Regarding power dynamics, the results of the study found the emergence of content based and process based nuances to Haugaard's typology in addition to a new component, i.e. barriers at the micro level. Regarding possible mechanisms between power and identity, the results of the study led to the development of two

working models of the effects of power on identity One working model based on power dynamics directly related to participants goal pursuit linked power and identity via identity examination internal and external decision making changes in agency and subsequent identity formation modification and or solidification A second working model based on power dynamics indirectly related to participants goal pursuit linked power and identity via beliefs and role models Regarding specific effects of power on identity the findings suggested effects of consensual power on identity e g self development identity solidification and effects of barriers on identity e g negative self attribution value development Implications for research and clinical practice as well as limitations of the study are discussed Keywords power dynamics identity urban emerging adults grounded theory *Language, Power and Identity Politics* Máiréad Nic Craith, 2007-10-23 Dominance identity and resistance are key themes in this examination of language in global virtual and local settings It focuses on world languages linguistic rights and minority protection Case studies explore the social strategies employed by migrants speaking non indigenous tongues and the effect of religion in sensitive political contexts *The Power of Identity* Kenneth Hoover, 1997-01-01 After a long period of neglect political scientists are again noticing identity politics Hoover s book is beautifully written brief by comprehensive and appropriate for a wide range of undergraduate courses Most impressive Hoover links micro level processes human development and the construction of individual identities with macro politics the formation and maintenance of organized systems of power examining among other topics gender multiculturalism and the sources and consequences of democracy and authoritarianism Alec Stone Sweet University of California Irvine *Exploring Identity Work in Chinese Communication* Xinren Chen, 2021-10-21 There is growing acceptance among pragmatists that identity is often deconstructed and negotiated in communication in order to impact the outcome of the interaction Filling an important gap in current research this book offers the first systematic pragmatic theory to account for the generative mechanisms of identity in communication Using data drawn from real life communicative contexts in China Xinren Chen examines why identity strategies are adopted how and why identities are constructed and what factors determine their appropriateness and effectiveness In answering these questions this book argues that identity is an essential communicative resource present across various domains and able to be exploited to facilitate the realization of communicative needs Demonstrating that communication in Chinese involves the dynamic choice and shift of identity by discursive means *Exploring Identity Work in Chinese Communication* suggests that identity is intersubjective in communication in all languages and that it can be accepted challenged or even deconstructed **Security Strategies of Middle Powers in the Asia Pacific** Ralf Emmers, Sarah Teo, 2018-02-05 *Security Strategies of Middle Powers in the Asia Pacific* examines what drives the different regional security strategies of four middle powers in the Asia Pacific Australia Indonesia South Korea and Malaysia Drawing on the extant middle power literature the authors argue that the regional security strategies of middle powers could take two forms namely functional or normative A functional strategy means that the middle power targets its

resources to address a specific problem that it has a high level of interest in while a normative strategy refers to a focus on promoting general behavioural standards and confidence building at the multilateral level This book argues that whether a middle power ultimately employs a more functional or normative regional security strategy depends on its resource availability and strategic environment **Challenges for Language Education and Policy** Bernard Spolsky, Ofra

Identity in International Relations Raymond Taras, 2012-10-02 Bringing together leading scholars from Russia and outside experts on Russia this book looks at the difference between the image Russia has of itself and the way it is viewed in the West It discusses the historical cultural and political foundations that these images are built upon and goes on to analyse how contested these images are and their impact on Russian identity The book questions whether differing images explain fractiousness in Western Russian relations in the new century or whether distinct imaginary solitudes offer a better platform from which to negotiate differences Providing an innovative comparative study of contemporary images of the country and their impact the book is a significant contribution to studies of globalisation and international relations Looking Into

Primary Headship Geoff Southworth, 2002-11-01 This is both a study of leadership and a research methods text It offers an analytical description of a primary headteacher at work over the course of one school year Using a mix of participant observation and interviews the book provides a portrait of this head s approach to his work his background beliefs the school as a context what he did how he dealt with change and development power and the personal dimension of headship The portrait is matched to the contemporary literature and an hypothesis is formulated about primary headship and is then used to critique existing ideas about school leadership The book also suggests ways of developing heads and school teachers

Identity Change and Foreign Policy Linus Hagstrom, 2015-10-05 Identity has become an explicit focus of International Relations theory in the past two to three decades with one case attracting and puzzling many early identity scholars Japan These constructivist scholars typically ascribed Japan a pacifist or antimilitarist identity an identity which they believed was constructed through the adherence to peaceful norms and antimilitarist culture Due to the alleged resilience of such

adherences little change in Japan's identity and its international relations was predicted. However, in recent years Japan's foreign and security policies have begun to change in spite of these seemingly stable norms and culture. This book seeks to address these changes through a pioneering engagement with recent developments in identity theory. In particular, most chapters theorize identity as a product of processes of differentiation. Through detailed case analysis, they argue that Japan's identity is produced and reproduced but also transformed through the drawing of boundaries between self and other. In particular, they stress the role of emotions and identity entrepreneurs as catalysts for identity change. With the current balance between resilience and change, contributors emphasize that more drastic foreign and security policy transformations might loom just beyond the horizon. This book was originally published as a special issue of *The Pacific Review*.

Power, Identity and Miracles on a Medieval Frontier Catherine Clarke, 2018-04-19. A thriving port and frontier base for the lords of Gower and a multi-cultural urban community, the south Wales town of Swansea was an important centre in the Middle Ages at a nexus of multiple identities, cultural practices and configurations of power. As the principal town of the Marcher lordship of Gower and seat of the Marcher lord's rule, Swansea was a site of contested authority, colonial control and complex interactions and collisions between different cultures, languages and traditions. Swansea also features in the miracle collection prepared for the canonisation of Thomas Cantilupe, Bishop of Hereford, d. 1282, as the setting for the intriguing case of the hanging and strange revival of the Welsh rebel William Cragh. Taking medieval Swansea and Wales as its starting point, this volume brings into focus questions of place, power, identity and belief, bringing together interdisciplinary perspectives which span History, Literary Studies and Geography, Archaeology and engaging with current debates in the fields of medieval frontier studies, urban history, manuscript studies and hagiography. This book was originally published as a special issue of the *Journal of Medieval History*.

Identity Capitalists Nancy Leong, 2021-02-09. Nancy Leong reveals how powerful people and institutions use diversity to their own advantage and how the rest of us can respond and do better. Why do people accused of racism defend themselves by pointing to their black friends? Why do men accused of sexism inevitably talk about how they love their wife and daughters? Why do colleges and corporations alike photoshop people of color into their websites and promotional materials? And why do companies selling everything from cereal to sneakers go out of their way to include a token woman or person of color in their advertisements? In this groundbreaking book, Nancy Leong coins the term identity capitalist to label the powerful insiders who eke out social and economic value from people of color, women, LGBTQ people, the poor and other outgroups. Leong deftly uncovers the rules that govern a system in which all Americans must survive the identity marketplace. She contends that the national preoccupation with diversity has counterintuitively allowed identity capitalists to infiltrate the legal system, educational institutions, the workplace and the media. Using examples from law to literature, from politics to pop culture, Leong takes readers on a journey through the hidden agendas and surprising incentives of various ingroup actors. She also uncovers a dire dilemma for outgroup members: do they play along and let their

identity be used by others or do they protest and risk the wrath of the powerful Arming readers with the tools to recognize and mitigate the harms of exploitation Identity Capitalists reveals what happens when we prioritize diversity over equality

Rethinking Middle Powers in the Asian Century Tanguy Struye de Swielande,Dorothee Vandamme,David Walton,Thomas Wilkins,2018-09-27 The term middle power is conceptually fragile Some scholars have even argued for abandoning it This book argues that the concept needs to be analysed more profoundly and that new analytical tools need to be developed to better understand the phenomenon The traditional approach based on Western states is insufficient and has become increasingly irrelevant in a transformed global environment Instead of drawing from a single theory of international relations the contributors have chosen to build upon a wide range of theories in a deliberate demonstration of analytic eclecticism A pluralistic approach provides stronger explanations while remaining analytically and intellectually rigorous Many of the theory contributions are reconsidering how the largely Western bases of such theorising need revising in light of the emerging middle powers many of which are in Asia Presenting a strong argument for studying middle powers this book explores both the theory and empirical applications of the concept by rethinking the definition and characteristics of middle powers using a range of case studies It examines changes in the study of middle powers over the last decade proposing to look at the concept of middle powers in a coherent and inclusive manner Finally it aims to further the discussion on the evolution of the international system and provides sound conclusions about the theoretical usefulness and empirical evolution of middle powers today
