Dreams and Visions Nancy van Deusen, 2010-01-13. Dreams and Visions have constituted an important topic and point of departure in the past but also continue to play a present role in literature, political thought, economic theory, and in the arts. An essential historical topos. Dreams and Visions, the second in a series that projects past issues into the present, brings significant contributions from an interdisciplinary spectrum of standpoints in order to discover fresh insights. Perhaps this is the essence in any case of Vision to discover new, fresh ways of conceptualizing a problem, topic, or historical enquiry, which is the goal of this volume. Small is Powerful Adam Lent, 2016-06-30 Humanity started small Where did we get the idea big is better The establishment promote big business big government or big culture more often than not all three In *Small is Powerful* Adam Lent reveals how our faith in big was manufactured in the 1900s by a group of powerful business leaders politicians and thinkers and gripped the collective imagination throughout the twentieth century But the notion that vast concentrations of power should reside in the state in corporations or the church has failed to create a stable fairer world In *Small is Powerful* Lent challenges this failure of imagination and asks us to consider a world where ownership power and resources are dispersed on a smaller scale in way that is better for everyone He explores the roots of the small revolution in the 1970s and demonstrates how contrary to received wisdom this movement is intensifying today Millions are setting up their own small businesses political and social change is increasingly delivered by grassroots initiatives and people are making their own decisions about how to live their lives *Small is Powerful* delivers an informed and impassioned plea to stand up and fight for the fairer wealthier and more stable world we want It is an impassioned plea for smallists everywhere to stand up and be counted

Visions of Freedom Morris Brian Morris, 2019-10-15 Every ten years notoriously eclectic thinker Brian Morris takes a year of sabbatical and launches out into another field about which he knows nothing In the 1980s it was botany in the 1990s zoology in the 2000s entomology The quintessential polymath Morris has written on his incredible breadth of interests in wide ranging essays with subjects ranging from boxing to deep ecology to new age gurus Collected here for the first time *Visions of Freedom* brings together all of Morris's concise yet diverse essays on politics history and ecology written since 1989 It includes book reviews letters and articles in the engaging and accessible style for which Morris is known The thinkers he deals with are as diverse as Thomas Paine to C L R James from Karl Marx to Krishnamurti from Max Weber to Naomi Klein He also delves into the canon of classic anarchist thinkers like Kropotkin Bakunin Reclus Proudhon and Flores Magnon Taking a stance against the obscurantism of contemporary academic discourse Morris's writings demonstrate an interdisciplinary approach that moves seamlessly between topics developing practical connections between scholarly debates and the pressing social ecological and political issues of our times

Mysticism Jess Byron Hollenback, 1996 This sweeping study of mysticism by Jess Hollenback considers the writings and experiences of a broad range of traditional religious mystics including Teresa of Avila Black Elk and Gopi Krishna It also makes use of a new category of sources that more traditional scholars have almost entirely ignored namely the autobiographies and writings of contemporary clairvoyants mediums and out of body travelers This study contributes to the current debate about the contextuality of mysticism by presenting evidence that not only are the mystic's interpretations of and responses to experiences culturally and historically conditioned but historical context and cultural environment decisively shape both the perceptual and affective content of the mystic's experience as well Hollenback also explores the linkage between the mystic's practice of recollection and the onset

of other unusual or supernormal manifestations such as photisms the ability to see auras telepathic sensitivity clairvoyance and out of body experiences He demonstrates that these extraordinary phenomena can actually deepen our understanding of mysticism in unexpected ways A unique feature of this book is its in depth analysis of empowerment an important phenomenon ignored by most scholars of mysticism Empowerment is a peculiar enhancement of the imagination thoughts and desires that frequently accompanies mystical states of consciousness Hollenback shows its cross cultural persistence its role in constructing the perceptual and existential environments within which the mystic dwells and its linkage to the fundamental contextuality of mystical experience *Proceedings, the Second International Conference on Industrial & Engineering Applications of Artificial Intelligence & Expert Systems*, 1989

Summoning Knowledge in Plato's Republic Nicholas D. Smith, 2019-07-04 Nicholas D Smith presents an original interpretation of the Republic considering it to be a book about knowledge and education Over the course of *Summoning Knowledge in Plato's Republic* he argues for four main theses Firstly the Republic is not just a work that has a lot to say about education it is a book that depicts Socrates as attempting to engage his interlocutors in such a way as to help to educate them and also engages us the readers in a way that helps to educate us Secondly Plato does not suppose that education properly understood should have as its primary aim putting knowledge into souls that do not already have it Instead the education Plato discusses represents occurring between Socrates and his interlocutors and hopes to achieve in his readers is one that aims to arouse the power of knowledge in us and then to begin to train that power always to engage with what is more real rather than what is less real Thirdly Plato's conception of knowledge is not the one typically presented in contemporary epistemology It is rather the power of conceptualization by the use of exemplars And finally Plato engages this power of knowledge in the Republic in a way he represents as only a kind of second best way to engage knowledge and not as the best way which would be dialectic Instead Plato uses images that summon the power of knowledge to begin the process by which the power may become fully realized
