the Classroom: Strategic Activities Volume One Heinz-Otto Peitgen,Hartmut Jürgens,Dietmar Saupe,Evan Maletsky,Terry Perciante,Lee Yunker,2012-12-06 There are many reasons for writing this first volume of strategic activities on fractals The most pervasive is the compelling desire to provide students of mathematics with a set of accessible hands on experiences with fractals and their underlying mathematical principles and characteristics Another is to show how fractals connect to

many different aspects of mathematics and how the study of fractals can bring these ideas together A third is to share the beauty of their structure and shape both through what the eye sees and what the mind visualizes Fractals have captured the attention enthusiasm and interest of many people around the world To the casual observer their color beauty and geometric structure captivates the visual senses like few other things they have ever experienced in mathematics To the computer scientist fractals offer a rich environment in which to explore create and build a new visual world as an artist creating a new work To the student fractals bring mathematics out of past history and into the twenty first century To the mathematics teacher fractals offer a unique new opportunity to illustrate both the dynamics of mathematics and its many connecting links
