unpredictable paths of automatic practice and ideology present a means by which to explore both the utopian and dystopian possibilities of technological and cultural innovation Focusing on the poetry of T S Eliot Ezra Pound and William Butler Yeats Alan Ramon Clinton argues that given the wide reaching influence of automatism as much can be learned from these writers means of production as from their finished products At a time when criticism has grown polarized between political and aesthetic approaches to high modernism this book provocatively develops its own automatic procedures to explore the works of these writers as fields rich in potential choices some more spectral than others The Encyclopedia of Science Fiction
