Mother Madonna Whore The Idealization And Denigration Of Motherhood:

Mother, Madonna, Whore Estela V. Welldon, 1988 Welldon explores why the quality of their bodies is fundamental to women's psychology how this may lead to self mutilation and how such perverse behavior may also be aimed at objects which women see as their own creations specifically their babies The potential causes and consequences of these conditions including maternal and paternal incest and its frequent aftermath prostitution are also discussed

The Mother in Psychoanalysis and Beyond Rosalind Mayo, Christina Moutsou, 2016-10-04 The question of what it means to be a mother is a very contentious topic in psychoanalysis and in wider society The Mother in Psychoanalysis and Beyond explores our relationship to the maternal through psychoanalysis philosophy art and political and gender studies Over two years a group of psychotherapists and members of the public met at the Philadelphia Association for a series of seminars on the Maternal In the discussions that followed a chasm opened up slowly and painfully between the idealised longings and fantasies we all share and the realities of maternal experiences here were met the great silences of love loss longing memories desire hatred and ambivalence This book is the result of this bringing together in conversation and reflections of what so often seems unsayable about the Mother It examines how issues of personal and gender identity are shaped by the ideals of separation from the mother the fears and anxiety of merging with the mother and how this has often led in psychoanalysis and society to holding mothers responsible for a variety of personal and social ills and problems in which maternal vulnerability is denied and silenced There are two main themes running throughout the book Matricide and Maternal Subjectivity On the theme of matricide several contributors discuss the ways in which the discourse and narratives of the Mother have been silenced on a sociocultural level and within psychoanalysis and philosophy in favour of discourses that promote independence autonomy power and the avoidance and denial of our fundamental helplessness and vulnerability On the theme of maternal subjectivity several chapters look at the actual experience of mothering and or our relationship to our mother to highlight the ways in which the maternal is intimately connected with human subjectivity The Mother in Psychoanalysis and Beyond provides new and provocative thinking about the maternal and its place in various contemporary discourses It will appeal to psychoanalysts psychotherapists and psychologists of different schools scholars and advanced students of art gender studies politics and philosophy as well as anyone interested in maternity studies and the relationship between the maternal and human subjectivity

Uncovering the Act of Maternal Infanticide from a Psychological, Political, and Jungian Perspective Brooke Laufer, 2024-07-02 Using a wide range of disciplinary backgrounds Laufer examines the topic of maternal infanticide through the lens of Jungian theory and presents an integrated and forensic view of this issue as an aggregate of personal and political moments and as a feminine and feminist outcry urging human evolution The first part of the book will dissect the identity of the infanticidal mother and the Death Mother archetype with the author providing firsthand accounts of patients that she has worked with in her professional career The second part of the book focuses on

interpreting that act of maternal infanticide and these chapters will look to the construct of patriarchal Motherhood as a way of explaining the drive and actions of an infanticidal mother The third and final section of the book takes the concept of evolution and transmutation a step further and addresses what is required in our modern state for the event of maternal infanticide This is an important new book for Jungian and analytic clinicians and scholars with an interest in maternal archetypes as well as psychologists and psychiatrists who specialize in perinatal mental health It would also be appropriate for forensic psychologists and legal analysts and academics and clinicians in the fields of women's health and studies

Mothers Accused and Abused Angela Foster, 2018-10-26 Mothers Accused and Abused Addressing Complex Psychological Needs brings together stories about mothers who are accused of harming and in some cases killing their children children who subsequently harm or kill others and the challenges to professionals who work with them Contributors consider the deeply rooted cycles of neglect and abuse manifested in the childhoods of mothers who only come to our attention when their extreme distress is expressed through their actions By recognising the long standing unmet dependency needs of abused and neglected women the book argues that longer term engagement can prevent a seemingly endless repetition of court hearings and imprisonment and thereby address cycles of neglect With sections on mothers in prison and interventions following child care proceedings Mothers Accused and Abused will be a valuable resource to those working in the criminal and civil justice systems social work and mental health as well as others who in a professional or personal capacity encounter troubled mothers and their children

Feminism, Psychoanalysis, and Maternal Subjectivity Alison Stone, 2013-03-01 In this book Alison Stone develops a feminist approach to maternal subjectivity Stone argues that in the West the self has often been understood in opposition to the maternal body so that one must separate oneself from the mother and maternal care givers on whom one depended in childhood to become a self or in modernity an autonomous subject These assumptions make it difficult to be a mother and a subject an autonomous creator of meaning Insofar as mothers nonetheless strive to regain their subjectivity when their motherhood seems to have compromised it theirs cannot be the usual kind of subjectivity premised on separation from the maternal body Mothers are subjects of a new kind who generate meanings and acquire agency from their position of re immersion in the realm of maternal body relations of bodily intimacy and dependency Thus Stone interprets maternal subjectivity as a specific form of subjectivity that is continuous with the maternal body Stone analyzes this form of subjectivity in terms of how the mother typically reproduces with her child her history of bodily relations with her own mother leading to a distinctive maternal and cyclical form of lived time

Gender and Power in Families Ann C. Miller,Rosine Jozef Perelberg,2018-06-04 The

systems approach to the family is based on the assumptions that there is equality between men and women in the family and that women and men are treated equally in clinical practice The contributors to this book challenge these hidden assumptions discussing the issues from both a conceptual and clinical viewpoint They argue strongly that questions of gender and power should be central to family therapy training and practice What Does a Woman Want?
