Natural Order:

Contingency and Natural Order in Early Modern Science Pietro Daniel Omodeo, Rodolfo Garau, 2019-09-09 This volume considers contingency as a historical category resulting from the combination of various intellectual elements epistemological philosophical material as well as theological and broadly speaking intellectual With contributions ranging from fields as diverse as the histories of physics astronomy astrology medicine mechanics physiology and natural philosophy it explores the transformation of the notion of contingency across the late medieval Renaissance and the early modern period Underpinned by a necessitated vision of nature seventeenth century mechanism widely identified apparent natural irregularities with the epistemological limits of a certain explanatory framework However this picture was preceded by and in fact emerged from a widespread characterization of contingency as an ontological trait of nature typical of late Scholastic and Renaissance science On these bases this volume shows how epistemological categories which are preconditions of knowledge as historically situated a priori and seemingly self evident are ultimately rooted in time Contingency is intrinsic to scientific practice Whether observing the behaviour of a photon diagnosing a patient or calculating the orbit of a distant planet scientists face the unavoidable challenge of dealing with data that differ from their models and expectations However epistemological categories are not fixed in time Indeed there is something fundamentally different in the way an Aristotelian natural philosopher defined a wonder or a monstrous birth as contingent a modern scientist defines the unexpected result of an experiment and a quantum physicist the behavior of a photon Although to each inquirer these instances appeared self evidently contingent each also employs the concept differently

The Civil Law in Its Natural Order Jean Domat, 1722

With additional remarks on some material differences between the civil law and the law of England T p *Ontology; Or, The Theory of Being* Peter Coffey, 1926 *Wild Knowledge* Will Wright, 1992 *Law and Morality in Ancient China* R. P. Peerenboom, 1993-02-11 Huang Lao thought a unique and sophisticated political philosophy which combines elements of Daoism and Legalism dominated the intellectual life of late Warring States and Early Han China providing the ideological foundation for post Qin reforms In the absence of extant texts however scholars of classical Chinese philosophy remained in the dark about this important school for over 2000 years Finally in 1973 archaeologists unearthed four ancient silk scrolls the Silk Manuscripts of Huang Lao This work is the first detailed book length treatment in English of these lost treasures

Multi-Stage Production Planning and Inventory Control Sven Axsäter, Christoph Schneeweiss, Edward Silver, 2012-12-06

This paper treats a two echelon inventory system The higher echelon is a single location referred to as the depot which places orders for supply of a single commodity The lower echelon consists of several points called the retailers which are supplied by shipments from the depot and at which random demands for the item occur Stocks are reviewed and decisions are made periodically Orders and or shipments may each require a fixed lead time before reaching their respective destinations Section II gives a short literature review of distribution research Section III introduces the multi echelon distribution system

together with the underlying assumptions and gives a description of how this problem can be viewed as a Markovian Decision Process Section IV discusses the concept of cost modifications in a distribution context Section V presents the test examples together with their optimal solutions and also gives the characteristic properties of these optimal solutions These properties then will be used in section VI to give adapted versions of various heuristics which were used in assembly experiments previously and which will be tested against the test examples

In Defense of Miracles R. Douglas Geivett, Gary R. Habermas, 2025-10-16 Rumors of deception have surrounded claims of Jesus resurrection ever since the soldiers appointed to guard his tomb made their report to the Jewish authorities But no one has led the philosophic charge against miracles quite as influentially as David Hume with his 1748 essay Of Miracles Refined revised restated his arguments still affect philosophic discussions of miracles today During the twentieth century strong arguments have been raised by Antony Flew professor emeritus at Keele University in England Flew has contributed a fresh statement of his objections to the idea of God's acting in history just for this volume which also includes Hume's classic critique as a part of the case against miracles In response Douglas Geivett and Gary Habermas have assembled a distinguished team of scholars to rebut the objections and set forth the positive case for God's action in history Richard Purtill clarifies the word miracle while Norman Geisler critiques Hume's case against miracles Francis Beckwith and Winfried Corduan assess how we would recognize miracles in the past and in the present Ronald Nash examines naturalism's exclusion of miracles and shows its self-referential incoherence J. P. Moreland discusses whether science properly rules out the possibility of miracles God's existence and action in history are probed by David Beck and Stephen Davis while Douglas Geivett argues that within a theistic framework it is reasonable to expect miracles as confirmation of claims to special revelation David Clark examines miracles within the context of various world religions Robert Newman John Feinberg William Lane Craig and Gary Habermas conclude by investigating fulfilled prophecy the virgin birth and incarnation of Jesus the empty tomb and the resurrection appearances In Defense of Miracles is a comprehensive up to date discussion that should not be overlooked by anyone concerned with the current debate over miracles
