

"If we've learned any lessons during the past few decades, perhaps the most important is that preservation of our environment is not a partisan challenge; it's common sense. Our physical health, our social happiness, and our economic well-being will be sustained only by all of us working in partnership as thoughtful, effective stewards of our natural resources."

Elliot Brownlee, Hugh Davis Graham, 2003 Table of contents **Presidents and the American Environment** Otis L. Graham, Jr., 2015-06-23 In 1891 Benjamin Harrison the first president engaged in conservation had to have this new area of public policy explained to him by members of the Boone and Crockett Club This didn t take long as he was only asked to sign a few papers setting aside federal timberland But from such small moments great social movements grow and the course of natural resource protection policy through 22 presidents has altered Americans relationship to the natural world in then almost unimaginable ways Presidents and the American Environment charts this course Exploring the ways in which every president from Harrison to Obama has engaged the expanding agenda of the Nature protection impulse the book offers a clear close up view of the shifting and nation shaping mosaic of both green and brown policy directions over more than a century While the history of conservation generally focuses on the work of intellectuals such as Muir Leopold and Carson such efforts could only succeed or fail on a large scale with the involvement of the government and it is this side of the story that Presidents and the American Environment tells On the one hand we find a ready environmental engagement as in Theodore Roosevelt s establishment of Pelican Island bird refuge upon being informed that the Constitution did not explicitly forbid it On the other hand we have leaders like Calvin Coolidge playing hide and seek games in the Oval Office while ignoring reports of coastal industrial pollution The book moves from early cautious sponsors of the idea of preserving public lands to crusaders like Theodore Roosevelt from the environmental implications of the New Deal to the politics of pollution in the boom times of the forties and fifties from the emergence of environmentalism to recent presidential detractors of the cause From Harrison s act which established the American system of National Forests to Barack Obama s efforts on curbing climate change presidents have mattered as they resisted or used the ever changing
