[Ecopsychology](#) Peter H. Kahn, Jr., Patricia H. Hasbach, 2012-07-20 An ecopsychology that integrates our totemic selves our kinship with a more than human world with our technological selves We need nature for our physical and psychological well being Our actions reflect this when we turn to beloved pets for companionship vacation in spots of natural splendor or spend hours working in the garden Yet we are also a technological species and have been since we fashioned tools out of stone Thus one of this century's central challenges is to embrace our kinship with a more than human world our totemic self and integrate that kinship with our scientific culture and technological selves This book takes on that challenge and proposes a reenvisioned ecopsychology Contributors consider such topics as the innate tendency for people to bond with local place a meaningful nature language the epidemiological evidence for the health benefits of nature interaction the theory and practice of ecotherapy Gaia theory ecovillages the neuroscience of perceiving natural beauty and sacred geography Taken together the essays offer a vision for human flourishing and for a more grounded and realistic environmental psychology

Identity and the Natural Environment Susan Clayton, 2003-11-07 The often impassioned nature of environmental conflicts can be attributed to the fact that they are bound up with our sense of personal and social identity Environmental identity how we orient ourselves to the natural world leads us to personalize abstract global issues and take action or not according to our sense of who we are We may know

about the greenhouse effect but can we give up our SUV for a more fuel efficient car Understanding this psychological connection can lead to more effective pro environmental policymaking Identity and the Natural Environment examines the ways in which our sense of who we are affects our relationship with nature and vice versa This book brings together cutting edge work on the topic of identity and the environment sampling the variety and energy of this emerging field but also placing it within a descriptive framework These theory based empirical studies locate environmental identity on a continuum of social influence and the book is divided into three sections reflecting minimal moderate or strong social influence Throughout the contributors focus on the interplay between social and environmental forces as one local activist says We don't know if we're organizing communities to plant trees or planting trees to organize communities
