Naturalist In New Guinea:

The Victorian Naturalist ,1888 *Naturalist Histories* Jamon Alex Halvaksz,Joshua A. Bell,2024-03-31 From early explorers to contemporary scientists naturalists have examined island flora and fauna of Oceania discovering new species carefully documenting the lives of animals and creating work central to the image of Oceania These discoveries and exploratory moves have had profound local and global impacts Often however local knowledge and communities are silent in the ethologies and histories that naturalists produce This volume analyzes the ways that Indigenous and non Indigenous naturalists have made island natures visible to a wider audience their relationship with the communities where they work as well as the unique natures that they explore and help make In staking out an area of naturalist histories each contributor addresses the relationship between naturalists and Oceanic communities how these histories shaped past and present place and practices the influence on conservations and development projects and the relationship between scientific and indigenous knowledge The essays span across colonial and postcolonial frames tracing shifts in biological practice from the eighteenth and nineteenth century focus on taxonomy and discovery to the twentieth century disciplinary restructurings and new collecting strategies and contemporary concerns with biodiversity loss conservation and knowledge formation The production of scientific knowledge is typically seen in ethnographic accounts as oppositional contrasting Indigenous and western local and global objective and subjective Such dichotomous views reinforce differences and further exaggerate inequities in the production of knowledge More dangerously value distinctions become embedded in discussions of Indigenous identity rights and sovereignty Contributors acknowledge that these dichotomous narratives have dominated the approach of the scientific community while informing how social scientists have understood the contributions of Pacific communities The essays offer a nuanced gradient as historical narratives of scientific investigation in dialogue with local histories and reveal greater levels of participation in the creation of knowledge The volume highlights how power infuses the scientific endeavor and offers a distinct and diverse view of knowledge production in Oceania Combining senior and emerging international scholars the collection will be of interest to researchers in the social sciences history as well as biology and allied fields The Australian Naturalist ,1909 **Queensland Naturalist** ,1908 The Naturalist and His 'beautiful Islands' David Russell Lawrence,2014-10-28 I know no place where firm and paternal government would sooner produce beneficial results than in the Solomons Here is an object worthy indeed the devotion of one s life Charles Morris Woodford devoted his working life to pursuing this dream becoming the first British Resident Commissioner in 1897 and remaining in office until 1915 establishing the colonial state almost singlehandedly His career in the Pacific extended beyond the Solomon Islands He worked briefly for the Western Pacific High Commission in Fiji was a temporary consul in Samoa and travelled as a Government Agent on a small labour vessel returning indentured workers to the Gilbert Islands As an independent naturalist he made three successful expeditions to the islands and even climbed Mt Popomanaseu the highest

mountain in Guadalcanal However his natural history collection of over 20 000 specimens held by the British Museum of Natural History has not been comprehensively examined The British Solomon Islands Protectorate was established in order to control the Pacific Labour Trade and to counter possible expansion by French and German colonialists It remaining an impoverished largely neglected protectorate in the Western Pacific whose economic importance was large scale copra production with its copra considered the second worst in the world This book is a study of Woodford the man and what drove his desire to establish a colonial protectorate in the Solomon Islands In doing so it also addresses ongoing issues not so much why the independent state broke down but how imperfectly it was put together in the first place The American Naturalist, 1894

The Essential Naturalist Michael H. Graham, Joan Parker, Paul K. Dayton, 2011-05-15 Like nearly every area of scholarly inquiry today the biological sciences are broken into increasingly narrow fields and subfields its practitioners divided into ecologists evolutionary biologists taxonomists paleontologists and much more But all these splintered pieces have their origins in the larger field of natural history and in this era where climate change and relentless population growth are irrevocably altering the world around us perhaps it s time to step back and take a new fresh look at the larger picture The Essential Naturalist offers exactly that a wide ranging eclectic collection of writings from more than eight centuries of observations of the natural world from Leeuwenhoek to E O Wilson from von Humboldt to Rachel Carson Featuring commentaries by practicing scientists that offer personal accounts of the importance of the long tradition of natural history writing to their current research the volume serves simultaneously as an overview of the field s long history and as an inspirational starting point for new explorations for trained scientists and amateur enthusiasts alike

Naturalist in the River, *A Naturalist in Cannibal Land*, by A.S. Meek A. S. Meek, Lionel Walter Rothschild Baron Rothschild, 1913 Includes description of life as a cattleman on Coomoooolaroo Station Queensland in the 1890 s collecting specimens in the South Sea Islands and Papua New Guinea Includes comments on hunting ability of Australian Aborigines
