Naturalistic Realism And The Antirealist Challenge:

Naturalistic Realism and the Antirealist Challenge Drew Khlentzos, R. L. Kosut, Sandro Mussa-Ivaldi, 2004 Examining the antirealist argument from a realist perspective *Naturalism, Realism, and Normativity* Hilary Putnam, 2016-04-11 Hilary Putnam's writings have shaped epistemology ethics metaphysics philosophy of physics and mathematics and philosophy of mind This volume illustrates his willingness to revisit past arguments above all how to articulate a theory of naturalism which acknowledges that normative phenomena form an ineluctable part of human experience **Continental Anti-Realism** Richard Sebold, 2014-11-03 There has been a resurgence of interest in the problem of realism the idea that the world exists in the way it does independently of the mind within contemporary Continental philosophy Many if not most of those writing on the topic demonstrates attitudes that range from mild skepticism to outright hostility Richard Sebold argues that the problem with this is that realism is correct and that the question should then become what happens to Continental philosophy if it is committed to the denial of a true doctrine Sebold outlines the reasons why realism is superior to anti realism and shows how Continental philosophical arguments against realism fail Focusing on the work of four important philosophers Kant Hegel Nietzsche and Husserl all of who have had a profound influence on more recent thinkers he provides alternative ways of interpreting their apparently anti realist sentiments and demonstrates that the insights of these Continental philosophers are nevertheless valuable despite their problematic metaphysical beliefs **The Consciousness Paradox** Rocco J. Gennaro, 2012 A defense of a version of the higher order thought HOT theory of consciousness with special attention to such topics as concepts and animal consciousness Consciousness is arguably the most important area within contemporary philosophy of mind and perhaps the most puzzling aspect of the world Despite an explosion of research from philosophers psychologists and scientists attempts to explain consciousness in neurophysiological or even cognitive terms are often met with great resistance In *The Consciousness Paradox* Rocco Gennaro aims to solve an underlying paradox namely how it is possible to hold a number of seemingly inconsistent views including higher order thought HOT theory conceptualism infant and animal consciousness concept acquisition and what he calls the HOT brain thesis He defends and further develops a metapsychological reductive representational theory of consciousness and applies it to several importantly related problems Gennaro proposes a version of the HOT theory of consciousness that he calls the wide intrinsicity view and shows why it is superior to various alternatives such as self representationalism and first order representationalism HOT theory says that what makes a mental state conscious is that a suitable higher order thought is directed at that mental state Thus Gennaro argues for an overall philosophical theory of consciousness while applying it to other significant issues not usually addressed in the philosophical literature on consciousness Most cognitive science and empirical works on such topics as concepts and animal consciousness do not address central philosophical theories of consciousness Gennaro's integration of empirical and philosophical concerns will make his argument of interest to both philosophers and nonphilosophers

Time and Realism Yuval Dolev, 2007-10-05 A new view of the metaphysics of time arguing that the traditional tensed tenseless debate within analytic philosophy should be seen as the first stage in a philosophical investigation of time and that the next stage belongs to phenomenology How does time pass Does time itself move or is time's passage merely an illusion Analytic philosophers belong for the most part to one of two camps on this question the tensed camp which defends the reality of time's passage conceiving the present as ontologically privileged over the past and future and the tenseless camp which denies time's passage and holds that all events whatever their temporal location are ontologically equal In *Time and Realism* Yuval Dolev goes beyond the tensed tenseless debate to argue that neither position is conclusive but that the debate over them should be seen as only the first stage in the philosophical investigation of time The next stage he claims belongs to phenomenology and he argues further the phenomenological analysis of time grows naturally out of the analytic enterprise Dolev shows that the two rival theories share a metaphysical presupposition that tense concerns the ontological status of things He argues that this ontological assumption is natural but untenable and that leaving it behind creates a new viewpoint from which to study central topics in the metaphysics of time Dolev shows that such a study depends on the kind of meticulous attention to our firsthand experiences that drives phenomenological investigations Thus he argues phenomenology is the venue for advancing the investigation of time *Time and Realism* not only analyzes the tensed tenseless debate resolving some of its central difficulties along the way it transcends it It serves as a bridge between the analytic and the continental traditions in the philosophy of mind both of which are shown to be vital to the philosophical examination of time

Peirce on Realism and Idealism Robert Lane, 2018 Re-evaluates Peirce's metaphysics exploring his views on pragmatism reality truth and the mind's relation to the external world

Mental States Andrea C. Schalley, Drew Khlentzos, 2007-12-13 Collecting the work of linguists psychologists neuroscientists archaeologists artificial intelligence researchers and philosophers this volume presents a richly varied picture of the nature and function of mental states Starting from questions about the cognitive capacities of the early hominin *Homo floresiensis* the essays proceed to the role mental representations play in guiding the behaviour of simple organisms and robots thence to the question of which features of its environment the human brain represents and the extent to which complex cognitive skills such as language acquisition and comprehension are impaired when the brain lacks certain important neural structures Other papers explore topics ranging from nativism to the presumed constancy of categorization across signed and spoken languages from the formal representation of metaphor actions and vague language to philosophical questions about conceptual schemes and colours Anyone interested in mental states will find much to reward them in this fine volume

Wittgenstein and the Moral Life Cora Diamond, 2007 Essays by leading scholars that take as their point of departure Cora Diamond's work on the unity of Wittgenstein's thought and her writings on moral philosophy

The Blackwell Companion to Naturalism Kelly James Clark, 2016-02-15 The Blackwell Companion to Naturalism provides a systematic introduction to philosophical naturalism and

its relation to other schools of thought Features contributions from an international array of established and emerging scholars from across the humanities Explores the historical development of naturalism and its ascension to the dominant orthodoxy in the Western academy Juxtaposes theoretical criticisms with impassioned defenses encapsulating contemporary debates on naturalism Includes discussions of metaphysics realism feminism science knowledge truth mathematics free will and ethics viewed through a naturalist lens *The Slightest Philosophy* Quee Nelson, 2007
